Tribhuvan University

Central Department of Population Studies

Kirtipur, Kathmandu

Baseline Survey on Child Porters, Nepal, 2002

Child Questionnaire
 To be asked to children (5-17 years of age) working as Porters (Short and Long route)

Greetings! My name is and I am working as an interviewer for the Central Department of Population Studies, TU which is undertaking a study on Child Porters. The results of the study will be used for possible interventions among the children people and their families. In order to determine what may be appropriate interventions, we are looking into the children's living conditions, the nature of their work, their educational levels, and their life goals and aspirations.

We have a number of questions that we would like to ask you but please be assured that your responses will be treated in complete confidence. The interview will take approximately half an hour to one hour during which time we will be noting down your answers. Would you have the time to help us with our study?
