**Explanatory Notes:**

(1) This phase involves provision of information on DWCP development process with/without some initial consultation on actions to be taken by the ILO and tripartite constituents. The DWCP concept papers could be prepared by a country office for initial discussions but they are not a required step in the DWCP development process. They are prepared to: (i) present analysis and data which help tripartite constituents set DWCP priorities; and (ii) identify and advocate core priorities which should be present in all DWCPs, in particular strengthening tripartite constituents and applying international labour standards.

(2) Draft DWCP documents include all elements of DWCPs, developed through a process of consultation with tripartite constituents. They are appraised by the DWCP Regional Support Groups through the quality assurance mechanism set up to improve the quality of DWCP documents.

(3) DWCP final documents that, while subject to modification if conditions change, have met the requirement for approval and can be cited as the vehicle for ILO action.
