

## Feedback from Policy Course FR001 in Annecy, France: 13-17 January 2003

★ The course is very educative, carefully designed and opens topics up for easy discussion.

★ This course was very useful to understand five important psychosocial factors that might be spread easily at workplaces and to develop integrated policies using modern approaches.

★ I particularly liked the simulation exercise and drafting the policy statement.

★ I like the concept of negative synergy and the interrelationship between the five psychosocial issues covered in the course.

★ The things I liked about the course were :

- ◆ the case study presentations,
- ◆ the attitude, knowledge, skills process
- ◆ the interaction of different perspectives
- ◆ the presentation of group work as great integration
- ◆ the ecological model integrating community, workplace, family and the individual
- ◆ the balance of work in pairs, in groups and in simulation exercises.

★ I enjoyed the interactive teaching method with active discussions and participation during the slide projections.

★ The topics were presented intensively and clearly. I also appreciated the opportunity to discuss my work with highly experienced and knowledgeable colleagues.
