

Feedback from Policy Course MY002 in Penang, Malaysia: 29 January -2 February 2002

★ The approach was non-conventional and participant involvement was at a maximum level. Brainstorming has a positive effect. The workshop has been very fruitful for me. I was able to look at the problems from different perspectives.

★ There were some very good sessions. I liked the method of disseminating information to participants:

- ◆ presentations (with handouts)
- ◆ colourful handouts and exercises (makes it livelier and less boring)
- ◆ two-way communication

★ I liked the awareness that the SOLVE problems are interrelated. All this while I had looked at them as individual problems.

★ I like the active learning that is so well incorporated into SOLVE. In general I've enjoyed the course very much. I've learned a lot.
