ILO DWT – New Delhi

Workshop on Labour migration statistics
28 – 29 November 2017, Colombo, Sri Lanka
Contents

• International legal instrument
• Statistical definitions
  – International migrant
  – Migrant workers
  – Remittances
• Sources
• Measurement in household surveys
• ILOSTAT: Data collection processes
International legal instrument

- **UN International Convention on the Protection of the Rights of All Migrant Workers and Members of their Families**
  - Adopted in 1990 by the UN General Assembly resolution 45/158 of 18 December 1990
  - Legal definition that can serve as basis for statistical measurement

**Migrant worker**: refers to a person who is to be engaged, is engaged or has been engaged in a remunerated activity in a State of which he or she is not a national
Categories of migrant workers: UN Convention (1990) I

1. Frontier worker
   - migrant worker who retains his or her habitual residence in a neighbouring State to which he or she normally returns every day or at least once a week

2. Seasonal worker
   - refers to a migrant worker whose work by its character is dependent on seasonal conditions and is performed only during part of the year;

3. Seafarer (including fishermen)
   - refers to a migrant worker employed on board a vessel registered in a State of which he or she is not a national;
3. **Worker on an offshore installation**
   - migrant worker employed on an offshore installation that is under
     the jurisdiction of a State of which he or she is not a national;

4. **Itinerant worker**
   - migrant worker who, having his or her habitual residence in one
     State, has to travel to another State or States for short periods,
     owing to the nature of his or her occupation;

5. **Project-tied worker**
   - migrant worker admitted to a State of employment for a defined
     period to work solely on a specific project being carried out in that
     State by his or her employer
Categories of migrant workers: UN Convention (1990) III

6. Specified-employment worker:
   - Sent by employer for defined period of time to undertake a specific assignment or duty; or
   - Who engages for defined period of time in work that requires professional, commercial, technical or other highly specialized skill; or
   - Who, upon the request of an employer in the State of employment, engages for a restricted and defined period of time in work whose nature is transitory or brief

• Self-employed worker
  - Engaged in remunerated activity otherwise than under a contract of employment and who earns a living through this activity working alone or together with family members
No agreed framework for statistics on migrant workers

In use:

**International migration statistics (UN)**
- **Main objectives**: Demographic accounting of population (immigration/emigration & population change)

**ILO working definitions**
- **Main objectives**: Characterize labour market dynamics, impact, inform employment & labour migration policies

To meet both objectives:
- Need use of coherent concepts, definitions, methods
Statistical definitions:

International migrant (UN)

- UN International recommendations on statistical measurement of international migration (1997):
  - **International migrant:**
    - Any person who changes his or her country of usual residence
  - Identifies two groups:
    - Long-term international migrants
      - Basis for statistics on immigrants and emigrants
    - Short-term international migrants
Statistical definitions:

International migrant (UN)

• Usual residence:

  • UN Recommendations on P&H Censuses, rev. 2
    – Place at which a person has lived continuously for at least 12 months, not including temporary absences for holidays, work assignments, or intends to live for at least 12 months

    – Place at which a person has lived continuously for most of the last 12 months (i.e. for at least 6 months and 1 day), not including temporary absences for holidays, work assignments, or intends to live for at least 6 months

Usual residence determined on the basis of duration of stay
Statistical definitions: 
International migrant (UN)

Long term migrant:

• A person who moves to a country other than that of his/her usual residence for a period of at least a year (12 months), so that the country of destination becomes his/her new country of usual residence

<table>
<thead>
<tr>
<th>Emigrant</th>
<th>Immigrant</th>
</tr>
</thead>
<tbody>
<tr>
<td>-Leave the country by crossing the border</td>
<td>-Enter the country by crossing the border</td>
</tr>
<tr>
<td>-Be a usual resident of country of origin</td>
<td>-Not a usual resident of country when entering</td>
</tr>
<tr>
<td>-Stay (intend to stay) abroad for at least 1 yr</td>
<td>-Stay (intend to stay) in the country for at least 1 yr</td>
</tr>
</tbody>
</table>

*Excludes diplomats, consular corps, members of armed forces, nomads, border workers
Statistical definitions:

International migrant (UN)

Short term migrant:

– A person who moves to a country other than that of his or her usual residence for a period of at least 3 months but less than a year (12 months)

– Except in cases where the move is for purposes of recreation, holiday, visits to friends and relatives, business, medical treatment or religious pilgrimage
Statistical definitions:

International migrant (UN)

• Principal measurement criteria:
  – Move from one country to another country by crossing a border
  – Change in usual residence
  – Minimum duration of stay (3+, 12+)

3 months  |  12 months

Visitors  | Short term migrants  | Long term migrants

Duration of stay
Relation between international migration & migrant workers

International migrants

Migrant workers
Stocks and flows

**Stock**: Number of migrants present in a country at a specified reference date

**Flow**: Number of migrants that changed country of residence during a specified reference period
Stocks and flows: Groups of interest

• Stock of foreign workers (*immigrants*)
• Stock of migrants workers abroad (*emigrants*)
• Inflow of foreign workers
• Outflow of migrant workers
• Return flow of migrant workers
Working statistical definitions: Migrant workers I

- **Stock of foreign workers:**
  - Foreign-born persons (*non-citizens*)* who at a particular date or during specific reference period would be counted as being employed or unemployed in the country.

- **Stock of migrant workers abroad:**
  - Native-born persons (*citizens*)* who at a particular date or during a specific reference period would be counted as being employed or unemployed in another country.
Working statistical definitions:

Migrant workers II

• **Inflow of foreign workers:**
  – Foreign-born persons (non-citizens)* who during a particular reference period arrived in the country with the **objective to take employment** there.

• **Outflow of migrant workers:**
  – Native-born persons (citizens)* who during a particular reference period left the country with the **objective to take employment** in another country.

• **Return flow of migrant workers:**
  – Native-born persons (citizens)* who during a particular reference period returned to their country after having been employed or unemployed in another country.
Working statistical definitions: Migrant workers III

- **Essential criteria**
  - Border crossing
  - Purpose of move: To seek work for pay/profit or To work for pay/profit
  - Labour force status
  - Country of birth
  - **Citizenship***

*Due to its relevance to inform employment policies that define labour market rights on the basis of citizenship.

Note: Change in usual residence & duration of move not essential as they exclude groups of short-term migrant workers
How to identify both:
international migrants & migrant workers

• **Common elements:**
  – Border-crossing
  – Country of origin (usual residence/birth) / destination

• **Additional elements needed:**
  – Duration of trip
    • at minimum: less than 3 mo./ 3 mo. to less than 12 mo./ 12+ mo.
  – Duration in country of origin
    • As per definition of usual residence
  – Purpose of trip
    • at minimum: seek work for pay/profit; work for pay/profit
  – Labour force status
Remittances: International Standards

- IMF, Balance of Payment Statistics (BPM6)
  - Household income from foreign economies arising mainly from the temporary or permanent movement of people to those economies
  - Include cash and non-cash items that flow through formal or informal channels across borders
    - Funds and non-cash items sent or given by individuals who have migrated to a new economy and become residents there
    - Net compensation of border, seasonal, and short-term workers who are temporarily employed in an economy in which they are not resident
Remittances: Components

- **Compensation of employees**
  - Income earned by workers in economies where they are not resident (or from non-resident employers).
  - Comprises wages, salaries, and other benefits (in cash or in kind) earned by individuals—in countries other than those in which they are residents—for work performed for and paid for by residents of those countries.
  - Includes seasonal, other short-term workers and border workers

- **Personal transfers**
  - All current transfers between residents of one economy and residents of another, regardless of source of income, relationship between households, and purpose of transfer.
<table>
<thead>
<tr>

</tr>
</tbody>
</table>
Data sources

- Administrative records
- Population and housing censuses
- Household surveys
### Administrative records

Produced as a by-product of the regular functions of an agency or institution

<table>
<thead>
<tr>
<th>Advantages</th>
<th>Disadvantages</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Best suited to measure flows</td>
<td>- Data not always reported for statistical use</td>
</tr>
<tr>
<td>- Compiled continuously</td>
<td>- Coverage limited to admin. process</td>
</tr>
<tr>
<td>- Cost effective</td>
<td>- Limited information on characteristics of migrants</td>
</tr>
<tr>
<td>- Data relates to the application of rules regulations</td>
<td>- Information may relate to entries/exits not to number of ILM</td>
</tr>
</tbody>
</table>
Types of administrative records

Inflow of labour migrants

- New entry or immigration visas
- New permission to work in the country
- Reports from recruitment agencies
- Reports to tax offices or social security authorities
- Apprehension of people crossing borders without documents
Types of administrative records

Outflow of labour migrants

- New permissions to work abroad
- Reports from recruitment agencies
- New exit permits or emigration visas
- New members of special insurance schemes
## Population Censuses

**Advantages**

- Complete enumeration
- Best to measure stocks
- For basic characteristics
- Benchmark data
- To evaluate & produce national estimates from sample surveys
- Sampling frame & sample design

**Disadvantages**

- Infrequent - every 10 years
- Only few questions on each topic can be included
- If de jure, can exclude groups of recent ILM

> For data quality: (i) publicity campaigns to promote complete enumeration (ii) rules used to determine usual residence (if de jure)
### Household surveys

**Advantages**

- Best to determine labour characteristics
- Can be used to study causes and consequences of migration
- Can be used to make inter-censal stock estimates
- Frequent information

**Disadvantages**

- Small sample size
- Sample design often not optimized to capture ILM
- Coverage tends to exclude foreign population and those living in group quarters

---

For data quality consider: (i) prevalence of migration and (ii) geographic distribution of migrants in the sample design; (iii) coverage of foreign population; (iv) field procedures to reduce underreporting
Good practices to improve statistics

Promote:
1. Inclusion of essential questions in population census
2. Inclusion of migration modules in large-scale household surveys with adequate sample design/size
3. Compilation and release existing administrative data for statistical purposes
4. Harmonization of concepts and definitions across data sources
5. Dissemination of census data tabulations by native/foreign-born status, duration of stay, and basic economic characteristics (LF status, main occupation, industry, status in employment)
6. Sharing of census data on foreign-born population across countries
Survey design issues

• **Rules for defining (usual) household membership**

• Need to take into account:
  – Extent of short term labour migration in the country
  – Main objectives of the data collection
  – Coherence with other statistics

• **Important to define treatment of**
  – Border workers
  – Seasonal workers
  – Itinerant workers

• If work abroad only for short periods <12 months – best to include as usual members of the household

• Those spending 12+ months abroad are not to be treated as usual household members.
ILOSTAT: ILO’s central labour statistics database
Access to Labour migration
# International Labour Migration Tables

**Browse Indicators by Subject**

- **Social protection**
- **Safety and health at work**
- **Industrial relations**
  - **Labour migration**
    - **International migrant stock**
      - Resident population by sex, total and migrants
      - Working-age population by sex and education, total and migrants
      - Working-age population by sex, total and migrants
      - Migrants by country of origin
      - Labour force by sex and age, total and migrants
      - Employment by sex and age, total and migrants
      - Employment by sex and status in employment, total and migrants
      - Employment by economic activity, total and migrants
      - Employment by occupation, total and migrants
      - Employed migrants by country of origin
    - **Nationals abroad**
      - Stock of nationals abroad by sex and country of residence
      - Outflow of nationals by sex and country of destination
      - Outflow of nationals for employment by sex and country of destination
      - Outflow of nationals for employment by sex and education
      - Outflow of nationals for employment by economic activity
      - Outflow of nationals for employment by occupation
    - **International migrant flow**
      - Inflow of working-age migrants by sex and education
      - Inflow of migrants by sex and country of origin
      - Inflow of employed migrants by economic activity
      - Inflow of employed migrants by occupation
      - Mean monthly employment-related income of employed persons by sex, total and migrants
      - Median monthly employment-related income of employed persons by sex, total and migrants
- **Consumer prices**

Excel template questionnaire on labour migration statistics

- Planned links being prepared (not yet active)

*Note: Template discussed in 3rd Workshop on International Labour Migration Statistics in the Asia and the Pacific, 25-27 September 2017, Interciti Hotel, Daejeon, Rep. of Korea*
ILMS data request on migration

• To be launched in April 2018
  – Data due July/Aug

• Email from ILMS_QUEST@ilo.org
  – To: ILMS focal points
  – cc: Heads of agencies

• Provides link to country-specific HTML page
Sample HTML page:
Migration questionnaire

1. Instructions
2. Contacts
3. Data availability
### ILMS questionnaire: indicators

#### [MST] International migrant stock
- Population***
  - Total
  - Working-age
- Labour force**
- Employment***
- Wages/Income*

#### [MNA] Nationals abroad
- Stock of nationals abroad*
- Outflow of nationals*
  - Total
  - For employment

#### [MFL] International migrant flow
- Inflow of migrants
  - Total **
  - Working-age *
  - Returned *
  - Employed **

---

**LEGEND**
- * Reported by < 15 countries
- ** Reported by 15-24 countries
- *** Reported by 25+ countries
## ILMS questionnaire: classifications

<table>
<thead>
<tr>
<th>Classification type</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>Migrant status</td>
<td>Total, migrants (no line for non-migrants)</td>
</tr>
<tr>
<td>Sex</td>
<td></td>
</tr>
<tr>
<td>Education</td>
<td>ISCED-2011</td>
</tr>
<tr>
<td>Economic activity</td>
<td>ISIC-Rev. 4</td>
</tr>
<tr>
<td>Occupation</td>
<td>ISCO-08</td>
</tr>
<tr>
<td>Country</td>
<td>• of origin</td>
</tr>
<tr>
<td></td>
<td>• of destination</td>
</tr>
<tr>
<td></td>
<td>• of residence</td>
</tr>
</tbody>
</table>
For the online questionnaire:
Data unit as persons

- Enter data in units ✓
- Not thousands ❌

- Precision allows for more precise calculations for derived indicators (ex: participation rates)
- Data will be published in thousands
  - Conversion to thousands done automatically through our ILOSTAT questionnaire upload system
Metadata for online questionnaire: Concepts and methods

- Read tips/targets under each topic and indicator
- Refer to guide for further guidance
- Contact ILMS_QUEST@ilo.org for clarifications
Recommended data checks

- Sum of parts = Total
  - Ex: Males + Females = Total
  - Except where data for total and migrants (no line for non-migrants)

- Population > labour force > employment

- Youth < working-age 15+

- Inflows < migrant stock

- Outflows < population
Systemic checks required

- Metadata completed
- Data checks as specified by NSOs
- Consistency over time
  - Identify changes in table totals > 10%
- Consistency across datasets
  - Employment same as in regular annual data collection
