TERMS OF REFERENCE

1. Background

Micro and Small Enterprises (MSEs) are an important source of employment and economic output in Indonesia. Almost 99.8 percent of over 57 million firms in Indonesia are considered as micro and small enterprises. MSEs provide jobs to over 93 percent of the labour force engaged in wage employment. However, in terms of value added MSEs contribute relatively less to GDP (43 percent) compared to medium and large businesses (57 percent).

One of the major constraints faced by MSEs which affects their growth is lack or limited access to financial services. There are a range of financial (banking and non-banking) institutions offering services in the market.

Commercial banks dominate the industry in terms of their assets. There are also more than 1,600 rural banks (BPRs) providing limited banking services to individuals and MSEs. In addition to that, at the downstream level, Bank Rakyat Indonesia has over 4,417 units catering to rural population. Besides banks it is estimated that there are 36,486 saving and lending cooperatives (USP), and 3,297 pawnshops providing microfinance services.

Despite the rapid growth of the financial sector and presence of several banking and non-banking institutions, access to finance remains a challenge for MSEs, perhaps understandably, in an archipelagic country as large as Indonesia.

While access to finance is limited, several financial institutions in Indonesia are also grappling to strike a balance between their commercial and social objectives. Globally, there is an increasing recognition that clients can no longer be treated simply as means to maximize profit. A long-term view that places a client at the center of the business is not only a responsible way of doing business, it also yields greater returns for the financial institution.

Against the above backdrop, the International Labour Organization (ILO) with funding from the Swiss State Secretariat for Economic Affairs (SECO) and in partnership with the Government of Indonesia has launched a programme, titled Promoting Micro and Small Enterprises through Entrepreneurs Access to Finance (PROMISE IMPACT). The project aims to support MSEs to access quality financial and business development services which can contribute towards productivity, growth, and employment.

One of the key deliverables of the project is to assist financial service providers (FSPs) in Indonesia to implement pilot projects to test products and services that create greater value for the clients while enhancing profitability for the financial institution. The innovative services can include improving existing financial services, additional financial services, or delivering non-financial services as part of a "loan package".

A total of 7 FSPs have already drafted their project proposals with possibly another 5-7 FSPs expected to submit their proposals in August. At this stage we are assuming that not all the FSPs will go through the full project cycle

ANNEX III

or some may even drop out. The minimum target is to pilot test 10 financial innovations in two provinces i.e. East Java and West Java.

Each project is intended to test whether providing an integrated set of services (both financial and non-financial), FSPs can contribute towards growth and development of small enterprises. Besides impact at the enterprise level, the research will also test the "business case" for FSPs to provide a broader range of financial and non-financial services to the clients.

In order to measure the impact at the client level, the project includes a research component to measure change as a result of the pilot intervention. In this regard, randomized control trial (RCT) will be used for measuring results at the client and household level. The second part of the research is to do a cost-benefit analysis for the business case by comparing results from the RCT (client level) and administrative data of FSPs related to performance of the loan portfolio and profitability

With regards to above, the project is seeking the services of a company or a team of individuals to provide technical assistance to develop the research methodology, randomization to assign clients into a treatment and control group, provide guidance in data collection, data cleaning and analysis; and present results from all the individual FSP (minimum 10 FSPs) interventions as well as consolidated results from the project as a whole.

It is anticipated that two surveys (baseline & endline) will be carried out. The surveys will target a total of around 7000 clients. The surveys will be conducted by a third party and are not part of the present TOR. Data set from these surveys will be made available to the bidder for analysis. Moreover, administrative data from FSPs will also be made available to the bidder for assessing the business case (cost-benefit) for the FSP.

2. Scope of Work

The bidder will be responsible for reviewing the "results chain" for each of the selected projects and accordingly provide inputs to improve the coherence and internal logic. As a starting point, each FSP, after being preselected, carried out a diagnostic assessment to identify the needs of their clients. Most of the FSPs have completed their surveys. The findings from the assessment were discussed with the management of the FSPs. Based on this, FSPs submitted their proposals to pilot test new service/product for the clients.

An important part of the project intervention is to develop a solid results chain to establish the expected impact and outcomes and what needs to be done to achieve these results. The results chain provides the basis for designing the survey instrument for collecting data to evaluate change. Normally, data is collected before the start of the intervention (baseline) and at the end of the intervention (end line).

For the baseline, a questionnaire has been prepared for the six projects selected so far. It is expected that the bidder will only review the results chain for each of the selected projects and the survey questionnaire and provide feedback. But for the remaining four FSP intervention the bidder will be more involved in developing the results chain and survey instruments.

Right through the baseline data collection process, and as required, the contractor will provide advice and guidance to the project. Once data sets for each baseline are uploaded on the server, the bidder will run the randomization and assign the selected clients into a treatment and control

ANNEX III

group. The randomization will follow standard statistical procedures and best practices in RCTs.

Among the six project proposals that were received, the project has already signed contracts with three FSPs and it is likely that another three projects will be signed in August. It is assumed that for the subsequent batch of projects, the contractor will be more involved in the project design. The evaluation design is closely linked with the implementation design and ideally the two should go hand-in-hand. The expertise that the contractor brings will help to strengthen the theory of change for each project. The early engagement of the bidder will also allow for a richer evaluation and a more comprehensive learning process.

It is assumed that the services described above will be mainly provided remotely using electronic media. The project on its part will ensure that all the required information to the bidder is provided in an electronic form. This includes survey instrument, proposals, and agreed results chain/ log frame for the projects. The project will upload all the data from the baseline and end line survey on a server and provide necessary access to the contractor.

The bidder will not be responsible for the implementation of the pilot interventions. It will be the responsibility of the FSPs with support from the PROMISE IMPACT staff who are on the ground to do it. However, the bidder will be kept informed about the progress and potential challenges that each project may encounter.

It is expected that the bidder will be required to present the results from the research at an event that will be organized in Indonesia after all the interventions have been implemented and the bidder has submitted the reports.

ANNEX III

If based outside Indonesia, the bidder should include the travel cost in the proposal.

9. DELAY, FORCE MAJEURE AND LIQUIDATED DAMAGES

9.1. DELAY:

- 9.1.1. Should the Contractor encounter conditions that do not constitute *Force majeure* and which impede or are likely to impede timely performance of the Contract (**Delay**), the Contractor will immediately notify the ILO in writing with full particulars of the Delay, including its likely duration, and its cause. At the ILO's request, the Contractor and the ILO will consult as soon as practicable after receipt of such notice, to evaluate any available means of mitigation or appropriate remedies provided under the Contract.
- 9.1.2. In addition to any other right or remedy available under the Contract, upon receiving notice of Contractor's Delay (or likely Delay) in performance, the ILO will have the right to:
 - 9.1.2.1. suspend the Contract, in whole or in part, and notify the Contractor not to proceed further with its performance which has been subject to (or will be subject to) Delay;
 - 9.1.2.2. withhold and/or deduct payment to the Contractor for the portion of the Contract subject to Delay; and
 - 9.1.2.3. procure all or part of the Services which the Contractor fails to provide in a timely manner.
- 9.1.3. Without prejudice to any other right or remedy available under the Contract, the Contractor will be liable for any increase in the price payable by the ILO resulting from the procurement of the Services from other sources and the ILO may apply such additional costs incurred, by deduction or otherwise, against future amounts owed by the ILO to the Contractor.
- 9.1.4. Upon receipt of notice of any decision by the ILO to suspend the Contract under subparagraph **9.1.2.1** and with respect to the suspended portion of the Contract, the Contractor will take immediate steps to reduce expenses to a minimum and will not undertake any further obligations; provided, however, that the ILO and the Contractor will continue performance of the Contract to the extent that it is not suspended or cancelled.

9.2. FORCE MAJEURE:

- 9.2.1. Neither Party will be liable to the other Party for failure to perform its respective obligations, if such failure is as a result of an unforeseeable and irresistible event, act of nature (including fire, flood, earthquake, storm, hurricane, epidemic or other natural disaster), any act of war (whether declared or not), invasion, revolution, insurrection, terrorism, or any other acts of a similar nature or force, (**Force Majeure**) provided that such acts arise from causes beyond the control and without the fault or negligence of the invoking Party.
- 9.2.2. The defaulting Party will notify, as soon as possible after the occurrence of the *Force Majeure* event, the other Party in writing with full particulars of the *Force Majeure* event, including its likely duration, the estimated expenditures that will likely be incurred for the duration of the *Force Majeure* event, and any other conditions which threaten to interfere with the defaulting Party's performance of the Contract.
- 9.2.3. Without prejudice to any other right or remedy available under the Contract, if either Party is rendered unable, in whole or in part, by reason of *Force Majeure* to perform its obligations and meet its responsibilities under the Contract and where the *Force Majeure* event exists beyond sixty (60) days then that Party will have the right to

ANNEX IV

suspend or terminate the Contract with a period of written notice of seven (7) days.

- 9.3. **NOTICE OF DELAY AND FORCE MAJEURE:** If notice is not received by a Party in accordance with paragraphs 9.1.1 or 9.2.2, the Party who fails to notify of the Delay or *Force Majeure* event will be liable for damages resulting from such non-receipt, except where the Delay or *Force Majeure* event also prevents transmission of the notice.
- 9.4. **LIQUIDATED DAMAGES:** Without prejudice to any other right or remedy available under the Contract, the Parties agree that if the Contractor breaches the Contract, including a Delay in performance of the Contractor's obligations under the Contract, it will be impractical or difficult to quantify the damages suffered by the ILO. The Parties, therefore, agree that in the event of such a breach by the Contractor, the Contractor will pay to the ILO, as liquidated damages, a sum equal to three-tenths of one (0.3) per cent of the Contract price for each day of delay until actual delivery or performance, up to a maximum of ten (10) per cent of the Contract price. Each Party acknowledges and agrees that the liquidated damages amount specified herein are intended to reasonably compensate the ILO and not intended to punish the Contractor. Without prejudice to any other right or remedy available under the Contract, the ILO reserves the right to recover such liquidated damages by deduction or otherwise, against future amounts owed by the ILO to the Contractor.

10. TERMINATION

10.1. TERMINATION BY THE ILO:

- 10.1.1. Without prejudice to any other right or remedy available under the Contract and without the authorisation of a court or any other authorisation, the ILO may terminate the Contract immediately by written notice in the event that the Contractor:
- 10.1.1.1. is found to have made any material or fraudulent misrepresentation in the making of or performance of the Contract regardless of when the misrepresentation is discovered;
 - 10.1.1.2. becomes bankrupt, otherwise insolvent, or the ILO reasonably determines that the Contractor has become subject to a materially adverse change in its financial condition that threatens to substantially affect the ability of the Contractor to perform any of its obligations under the Contract;
 - 10.1.1.3. fails to perform contractual obligations or to satisfy any guarantees or warranties it has made under the Contract and does not rectify such failure within sixty (60) days following receipt of a written notice by the ILO;
 - 10.1.1.4. is declared undesirable by the government where the Contractor is to perform any of its obligations under the Contract;
 - 10.1.1.5. is the subject of any sanction or temporary suspension imposed by any organization within the United Nations System including the World Bank; or
 - 10.1.1.6. the ILO's activities are curtailed or terminated.
- 10.1.2. Upon receipt of notice of termination by the ILO, the Contractor will take immediate steps to bring any Services to a close in a prompt and orderly manner, will reduce expenses to a minimum and will not undertake any further obligations from the date of receipt of notice of termination.
- 10.1.3. If the Contract should be terminated by the ILO, the ILO will make all payments which may be due up to the effective date of termination for any Services satisfactorily delivered or performed and accepted by the ILO.

10.2. TERMINATION BY THE CONTRACTOR:

- 10.2.1. Without prejudice to any other right or remedy available under the Contract and without the authorisation of a court or any other authorisation, the Contractor may terminate the Contract immediately by written notice in the event that the ILO:
- 10.2.1.1. fails to make payments which are due under the Contract and the ILO does not rectify such failure within a period of sixty (60) days after receipt of the Contractor's written notice of default; or
 - 10.2.1.2. fails in its contractual obligations so as to make it unreasonable for the Contractor to proceed with the performance of its obligations under the Contract and the ILO does not rectify such failure within

a period of sixty (60) days after receipt of the Contractor's written notice of default.

11. WARRANTY

11.1. WARRANTY OF SERVICES:

- 11.1.1. The Contractor warrants that any Services provided in accordance with the Contract will meet the specifications, timeframes and related requirements set forth in the Contract. All materials and workmanship utilized in performing the Services under the Contract will be of the respective kind(s) described in the Contract and free from defects. Materials not conforming to the specifications in the Contract will not be used in performance of the Services without prior written approval of the ILO.
- 11.1.2. If the Services do not meet the requirements referred to above, the Contractor will, at its sole expense, either by repair or replacement, correct, promptly modify or change any faulty workmanship materials, parts and equipment supplied by it to the extent necessary to satisfy the above warranty.
- 11.1.3. If any defect or failure in the Services cannot be rectified by remedial measures within the period agreed by the ILO and the Contractor, the Contractor will be considered to be in default and in addition to exercising any suspension or termination rights set forth in the Contract, the ILO has the right to independently replace or repair the Services and the Contractor will be obligated to reimburse the ILO for all the additional costs so incurred, including by deduction or otherwise, against future amounts owed by the ILO to the Contractor.

12. MISCELLANEOUS

- 12.1. **CHANGE ORDERS:** The ILO may, by written notification, increase or decrease the scope of Services of the Contract provided the stage reached in the performance of the Contract so allows. If any such changes increase or decrease the cost of and/or the time required for the performance of any part of the Contract, an equitable adjustment will be made in the Contract's price or time schedule, or both, and the Contract will accordingly be amended. Any request for consultation or claim for adjustment under this paragraph will be asserted by the Contractor within thirty (30) working days from the date of receipt of ILO's change order.
- 12.2. **AMENDMENTS:** The Parties may by mutual agreement amend the Contract. Amendments will be effective only if in writing and when executed and delivered on behalf of the ILO and the Contractor by persons duly authorized to do so.
- 12.3. **NON-WAIVER OF RIGHTS:** Termination of the Contract in whole or in part by a Party or the failure by either Party to exercise any rights available to it, will not affect the accrued rights or claims and liabilities of either Party to the Contract.
- 12.4. **SURVIVAL:** The obligations contained in paragraphs 4.6 (Insurance); 4.7 (Indemnification); 6.1 (Proprietary Items and Intellectual Property Rights); 6.2 (Confidential Nature of and Responsibility for Proprietary Items, Intellectual Property and Other Information); 6.3 (Publicity and Use of the Name, Emblem or Official Seal); and 11.1 (Warranty of Services) survive the termination or expiration of the Contract.
- 12.5. **LIMITATION ON ACTIONS:** Irrespective of their nature, any dispute, controversy, or claim arising out of the Contract or the breach, termination, or invalidity thereof (other than obligations enumerated in paragraph 12.4) must be asserted within six (6) months after the termination or expiration of the Contract.

13. SETTLEMENT OF DISPUTES

- 13.1. **AMICABLE SETTLEMENT:** The Parties will use their best efforts to amicably settle any dispute, controversy, or claim arising out of the Contract or the breach, termination, or invalidity thereof by direct informal negotiations, including, where agreed, by referral, to an executive level of authority within the Parties. Where the Parties wish to seek such an amicable settlement through conciliation, the conciliation will take place in accordance with the Conciliation Rules then prevailing of the United Nations Commission on

ANNEX IV

- 13.2. **ARBITRATION:** Unless settled amicably under paragraph 13.1, within sixty (60) days, after receipt by one Party of the other Party's written request, any dispute, controversy or claim arising out of the Contract, or the breach, termination or invalidity thereof, will be settled by arbitration in accordance with the UNCITRAL Arbitration Rules then prevailing. In addition:
- 13.2.1. the place of arbitration will be Geneva;
 - 13.2.2. the decisions of the arbitral tribunal will be based on general principles of international commercial law;
 - 13.2.3. the arbitral tribunal will have no authority to award punitive damages;
and
 - 13.2.4. the Parties will be bound by any arbitration award rendered as a result of such arbitration as the final adjudication of any such dispute, controversy, or claim arising out of the Contract, or the breach, termination or invalidity thereof.
- 13.3. **LANGUAGE:** The conciliation and the arbitration proceedings will be conducted in the language in which the Contract is signed provided that it is one of the three working languages of the ILO (English, French and Spanish).
