# Korea's priorities for the G20 Seoul Summit

The Challenge now is to **maintain** the momentum and **solidify its position** as the premier forum for int'l economic cooperation.

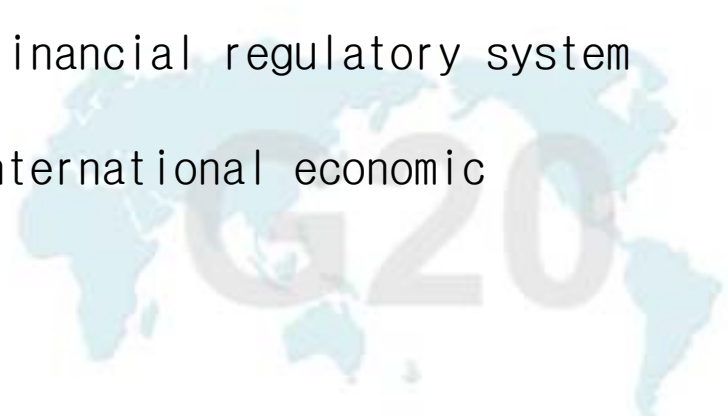

■ Toward this end, at the Davos Forum in January, President Lee Myung-bak presented three **priorities** for the G20 Seoul Summit .

1. The implementation of previous commitments
2. Bringing new perspectives to the work of the G20
3. Inclusive outreach activities

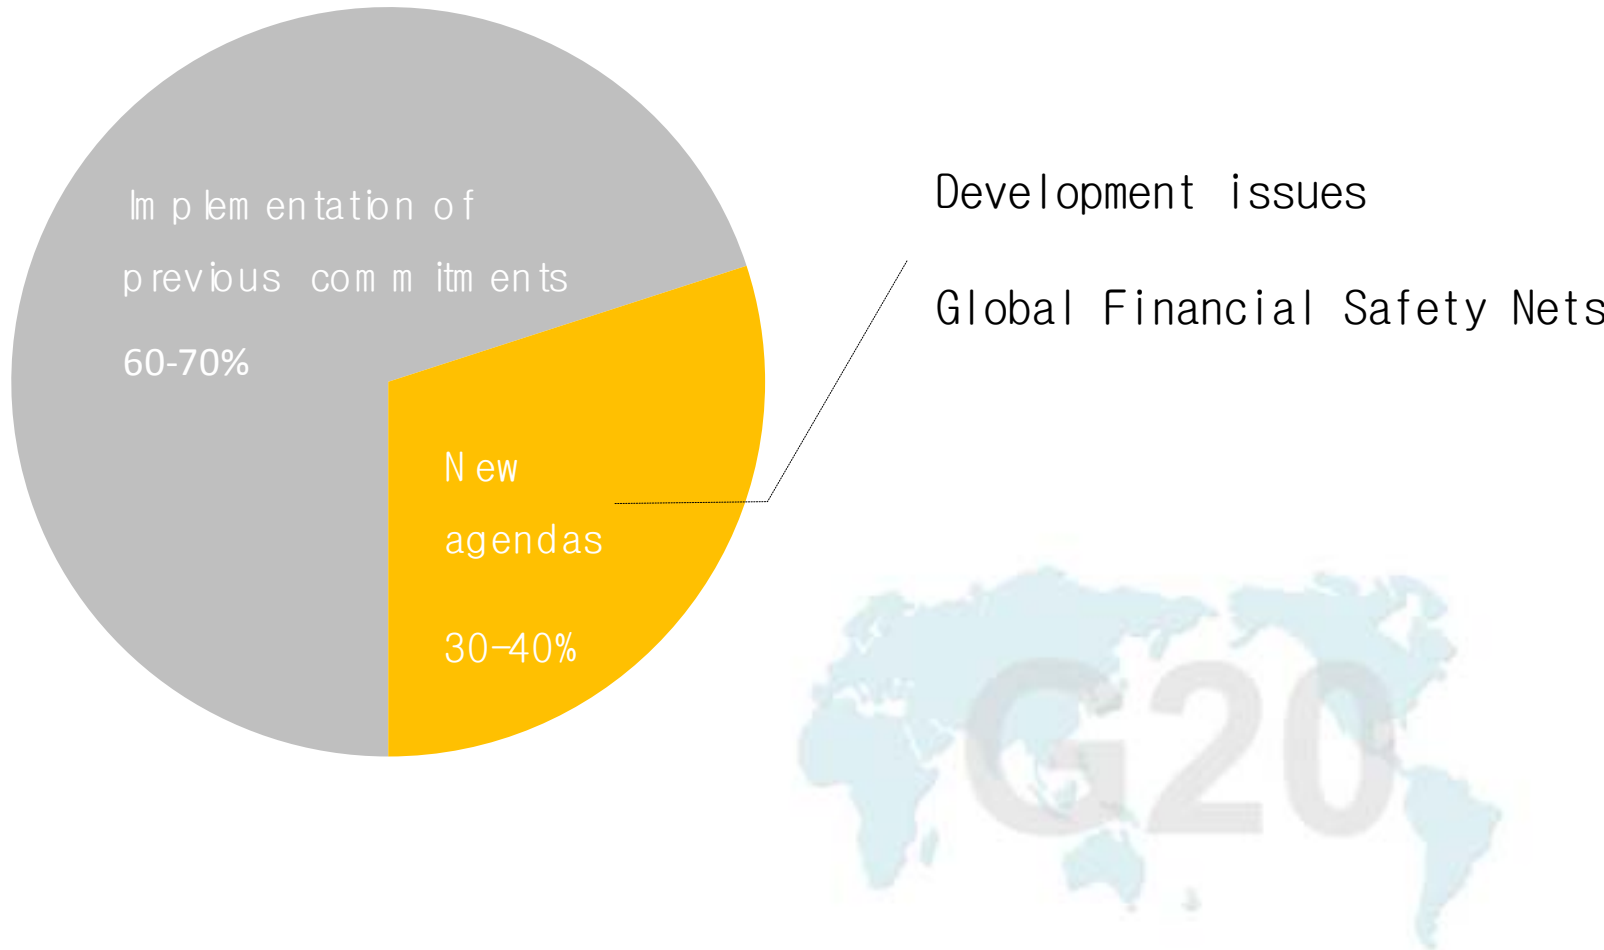

# I. G20 commitments and implementation

- Our first priority will be to follow up on previous commitments within the given timeframe. Those commitments include :
  - Maintaining economic support measures until recovery is fully assured
  - Ensuring strong, sustainable, and balanced global growth
  - Building a stronger international financial regulatory system
  - Modernizing the architecture for international economic cooperation

## II. Bringing new perspectives to the G20

### III. Inclusive Outreach Activities

1. Outreach activities for further inclusiveness
2. Closely collaborating with the United Nations

Thank you
