

First Arab States Regional South-South Development EXPO February 2014, Doha

Successful South-South Solution Nomination Form

How to nominate a solution:

- Please underline one of the three stages of transfer relevant to a South-South solution being nominated:**
 - A solution has proven successful, is packaged, and is considered for a South-South transfer.
 - A solution is already in the process of the South-South transfer.
 - A solution has already been transferred and is being internalized by the recipient country.
- Underline one solution forum to which a South-South solution is being nominated:**

Solution Forum A Promoting Youth Employment through SSTC in the Arab States led by the ILO Solution Forum D [title of the solution forum led by ESCWA]

Solution Forum B [title of the solution forum led by UNEP] Solution Forum E [title of the solution forum led by IFAD]

Solution Forum C [title of the solution forum led by UNDP] Solution Forum F [title of solution forum led by UN Women]
- Acquaint yourself with the selection criteria (provided below) relevant to the stage identified.**
- Kindly fill in the below questionnaire in accordance with the following instructions:**
 - For a solution ready for transfer answer questions in sections A to C.
 - For a solution in the process of transfer answer questions A to D.
 - For a solution already transferred answer questions A to E.
- Please email the nomination form to the following email address: ssc.arabstates@undp.org**
 - The nomination form must be completed and sent before the deadline indicated at the top of this document.
 - The subject field of the email message should say: "EXPO Nomination: Solution Forum [A,B,C,D,E or F]".

Selection criteria:

Stage I: A solution has proven successful, is packaged, and is considered for a South-South transfer.

Criteria I.1: Verifiable results are in place: The solution is successful because it has achieved verifiable results, including in terms of capacities developed. It is also recognized as a successful practice by others.

Criteria I.2: Solution is packaged for a South-South transfer: Knowledge resources and a methodology of transfer are in place, such as technological know-how, manuals, reference information, tools; transfer capacities are in place, such as experts and (to the extent possible) material/financial resources.

Criteria I.3: Level of preparedness of a requesting country (in case it has been already identified): Concrete institutions and/or focal points to participate in the South-South transfer have been already assigned by the requesting country.

Criteria I.4: Relevance of a solution to national development priorities of a requesting country (if already identified): Expected outcomes of implementation of a solution are clearly aligned to one of national development priorities of a recipient country.

Stage II: A solution is already in the process of the South-South transfer.

Criteria II.1: Initial preparations and action plan in place: Preliminary interaction such as exchange visits, peer-to-peer consultations have taken place, as well as some kind of formal endorsement on a South-South transfer and the action plan are in place.

Criteria II.2: Situational analysis initiated: A solution recipient has initiated/conducted, in cooperation with a solution provider, a process of analyzing the context, such as identifying existing capacities and capacity gaps, resource needs and sources, legal frameworks, sustainability of solution after adoption, as well as any other relevant elements.

Criteria II.3: Capacity development initiated: Some time of capacity development exercises initiated/conducted between solution provider and solution recipient, including but not limited to workshops, study tours, on-the job training.

Stage III: A solution has already been transferred and is being internalized by the recipient country.

Criteria III.1: Solution effectively transferred: The majority of planned transfer activities have been successfully implemented as well as all key expected outcomes are achieved.

Criteria III.2: Adaptation of solution initiated (South-South perspective): Relevant legal/regulatory, institutional, financing and other mechanisms adjusted with a view of effective adaptation of a solution, as well as a clear plan of follow up activities is in place.

Criteria III.3: Sustainability: Solution recipient possesses all necessary means and resources, including technical capacity, know-how, access to financial and other material resources to continue to effectively utilize and further develop solution received as a result of a South-South transfer.

First Arab States Regional South-South Development EXPO Successful South-South Solution Nomination Form

Deadline for electronic submission: [15 January 2014]

A. Description of the South-South Cooperation experience	
1. Indicate the title of a South-South Solution:	<i>This may or may not coincide with the project title. It should be "attractive", concise and clear.</i> Arab Countries Green Economy Success Stories - Green Jobs Opportunities
2. Solution-provider	<i>Please indicate the country where a solution originates from.</i> Egypt, Jordan, Lebanon, and Morocco
3. Solution-seeker(s)	<i>Please indicate the country (countries) that could express potential interest in a solution.</i> MENA and Mediterranean Region
4. Which thematic areas of the EXPO does a solution address?	<i>Please underline one or more thematic area(s) addressed by a solution.</i> <u>Green job generation and small to medium enterprise creation for entrepreneurs and youth</u>
5. What did a solution achieve in the originating country?	<i>Please describe initial objectives of a solution in the originating country</i> In the Arab countries there is a strong need to address the chronic problem of employment creation. About where an estimated 700,000 jobs in Egypt only are needed annually to absorb new graduates. The country also suffers from a serious poverty problem and high population rates that significantly hamper economic growth and seriously hinder efforts of reform and development. Empower the people and supporting green initiatives by different community stakeholders is existential in meeting the above-mentioned challenges. There is an emerging need to support the government in disseminating information about green technologies, and benefits of coupling economic and environmental considerations within the context of a 'green economy'. The green economy success stories research report for Egypt supports the government and create an inclusive community dialogue to showcase the benefits of green business ventures, and reinforce the facilitating role that the government should play in support of green projects. The report showcases 8 selected case studies to highlight opportunities and challenges facing green initiatives and present the government with required solutions that delay a green economy national transition. In addition, prior research has been done to identify success stories for sustainable entrepreneur in Arab Mediterranean countries <i>Please describe the outcomes achieved by a solution that are expected to be replicated</i> <ol style="list-style-type: none"> 1- The report has been a significant policy-lobbying document for decision makers to harness national political and public consensus on the definition and importance of green business, programmes and initiatives. 2- It has provided needs assessment of the current challenges and policy gaps that face active businesses and green initiatives. 3- The report has underscored the importance of the role of the government in engaging different community stakeholders in the design and implementation of a green economy related policy framework. 4- It has positively showcased that ventures that adopt green environmental issues could growth into successful and profitable business models capable of replication and scalability. 5- It demonstrates the potential of creating green jobs through successful and profitable business which will contribute in addressing one of Egypt most pressing and chronic problems 6- The sustainable entrepreneur research has provided an excellent examples for job reation that can be replicated in other countries
