Annex 1. Presentation of National Labour Force Survey (Survei Angkatan Kerja Nasional)

1. **Title of survey:** National Labour Force Survey (Sakernas)
2. **Organization responsible for most recent survey:** BPS
3. **Date of most recent survey:** August 2009
4. **Date of publication of report of the most recent survey:** February 2010
5. **Type of publication:** ☑ paper ☐ internet, see: http://www.bps.go.id.
6. **Date of next survey:** February 2010
7. **Periodicity**
   
   a. **Data collection**
      
      ☐ monthly
      ☐ quarterly
      ☑ twice a year
      ☐ annually
      ☐ other, please, specify...

   b. **Dissemination of results**
      
      ☐ monthly
      ☑ quarterly
      ☐ twice a year
      ☐ annually
      ☐ other, please, specify...

8. **Coverage**

   a. **Population groups**
      
      Minimum age: **10 years old**
      Maximum age: **Indefinite**

      Exclusion of institutional households
      (army, prison, etc.) ☐ No ☑ Yes, specify:...

      Specify exclusion of any other specific population groups (e.g. migrant workers):

   b. **Geographical coverage**
      
      ☑ whole country
      ☐ whole country, excluding…
      ☐ urban only
      ☐ rural only
      ☐ other, please, specify...

9. **Topics covered**

   a. **Economically active population**
   b. **Employment**
   c. **Unemployment**
   d. **Time-related underemployment**
   e. **Hours of work per reference period**
      
      ☑ actual hours worked
      ☐ usual hours worked
      ☑ other, please, specify...

   f. **Employment income: wages, salaries and self-employment income**
   g. **Employment tenure**
   h. **Occasional / casual wage workers**
   i. **Industry**
   j. **Occupation**
   k. **Status in employment**
   l. **Educational level**
   m. **Secondary jobs**
   n. **Employment in informal economy**
   o. **Employment in informal sector**
   p. **Child labour**
   q. **Poverty**
   r. **Safe work**
   s. **Social security**

duration of unemployment

discouraged workers

Training

Other, please, specify...

Note: Data on child labour and social security are included in only specific survey rounds.

10. Concepts and classifications used in the most recent survey

a. Economically active population

- current economic activity (Labour force framework)
- usual economic activity

Are definitions consistent with the ICLS 1982 resolution?  ☑ No  ☑ Yes  

Any other comment...

b. Status in employment

- employees

Differentiation between regular employees and casual/temporary or short-term/seasonal workers?

☐ No  ☑ Yes, specify groups: regular employee, casual worker in agriculture and casual worker not in agriculture

- employers
- own-account workers
- members of producers’ cooperatives
- contributing family workers
- workers not classifiable by status
- others, please, specify:

c. Occupations.

☐ Direct use of ISCO classification

☐ ISCO-08  ☐ ISCO-88  ☐ ISCO-68

☒ Use of a specific national classification of occupations?

☐ not related to ISCO

☒ based on or consistent with:

☐ ISCO-08  ☐ ISCO-88  ☐ ISCO-68

d. Industries

☐ Direct use of ISIC classification

☐ ISIC Rev.3 (1990)  ☐ ISIC Rev.2 (1968)

☒ Use of a specific national classification of industries?

☐ not related to ISIC

☒ based on or consistent with:

☒ ISIC Rev.3 (1990)  ☐ ISIC Rev.2 (1968)

11. Measurement (Labour force framework)

a. Employment

i. One hour criterion for employment used?  ☑ No  ☑ Yes  If no, specify criterion...

ii. Reference period for employment:

☐ last day
iii. Identification of economic activity:
- Use of activity list
- Use of prompt with example of what constitutes work

b. Unemployment
i. Question on availability to work included: ☑ Yes
   If yes: Reference period for availability to work:
   - ☑ Same as for employment
   - ☐ Different from employment
   - ☐ next week
   - ☐ next two weeks
   - ☐ next four weeks
   - ☐ other, please, specify: …

ii. Question on seeking work included: ☑ Yes
   If yes: Reference period for seeking work:
   - ☑ Same as for employment
   - ☐ Different from employment
   - ☐ last week
   - ☐ last two weeks
   - ☐ last four weeks
   - ☐ other, please, specify: …

12. Survey design (most recent survey)
   a. Sample design
      - ☐ Single stage sampling
      - ☑ Multi stage
         Specify sampling unit: ☐ households ☑ individuals
         First stage sampling unit: Households
         Ultimate sampling unit: ☐ households ☑ individuals
   b. Sample frame, including date: Based on two stage sampling frame, first, selection of census block and second, selection of households from the selected census block.
   c. Sample size:
      The survey began in 1976. As the first NLFS conducted by BPS, this survey was a baseline, especially in questionnaire design which was mostly used for other similar surveys. The next NLFS were conducted in 1977, 1978, and 1986 to 1994. East Timor was excluded from the first two surveys. The number of households covered in each period of the NLFS varied as follows:

- 1976 covered about 95,400 households
- 1977 and 1978 NLFS covered about 71,550 households
- 1986 to 1993 NLFS covered about 65,490 households
- 1994 NLFS covered about 65,524 households
• 1997 NLFS covered about 65,664 households
• 1998 NLFS covered about 49,248 households
• 1999 NLFS covered about 48,576 households
• 2000 NLFS covered about 60,000 households
• 2007 NLFS (February) covered about 68,800 households
• 2007 NLFS (August) covered about 278,352 households
• 2008 NLFS (February) covered about 70,000 households
• 2008 NLFS (August) covered about 200,000 households
• 2009 NLFS (February) covered about 70,000 households
• 2009 NLFS (August) covered almost 300,000 households

d. Non Response rate: **February 2008 was 0.26 per cent**
e. Questionnaire design
   - ☑ landscape questionnaire
   - ☐ individual questionnaires
   - ☑ a combination of both
f. Language of questionnaire
   - Original version: **Indonesian**
   - Other versions (list all languages): **English**
   - Oral translation during interviews: ☑ Yes, specify languages: **Local dialect**
g. Data collection method
   - ☑ face-to-face interviews
   - ☐ self-completed questionnaire (mail or drop-off)
   - ☐ phone interviews
   - ☐ other, please, specify ...
h. Use of proxy respondents (e.g. head of household provides answer for absent household members) ☑ Yes

**13. Available series (most recent survey) ******

         First stage sampling unit: **Households**
      Specify sampling unit:  ☒ households  ☒ individuals
      Ultimate sampling unit  ☒ households  ☒ individuals
c. Sample size

NSES has been conducted since 1963, yet the coverage at that time was only Java with the sample size of 16,000 households. Gradually, in 1964, 1967, 1969, 1976, 1978, 1979, 1981, 1989, and 1992 the NSES coverage and sample size varied and finally the survey now covers the whole of Indonesia. Since 1993, SUSENAS data were distinguished between core and module questionnaires. Module questionnaire cover cultural social module and education, housing and health, and consumption and expenditure modules that are only collected every three (3) years.

Core sample size varies ranging from 202,500 households in 1993 to 278,352 households in 2006. Prior 2004 the NSES enumeration was carried out during January-February; since 2005 it is done in the period of June to July. Basically, this survey is aimed to collect data on the socio-economic situation among people in Indonesia. However, the information regarding labour force are also collected, especially in the 1982 NSES when the labour force was set to be the main module. NSES was conducted in all provinces (27) and covered 60,400 households in 1982. Starting in 1992 and at least until 1995, the number of households selected was enlarged to 206,076. It is expected that from this large survey, parameters for smaller areas (regency instead of province) can be estimated.

d. Non Response rate...

e. Questionnaire design

☐ landscape questionnaire  ☑ individual questionnaires  ☑ a combination of both

f. Language of questionnaire

Original version: Indonesian

Other versions (list all languages): To a certain extent, English

Annex 3. Presentation of Inter-censal Population Survey (SUPAS)

1. **Title of survey:** Inter-censal Population Survey (SUPAS)
2. **Organization responsible for most recent survey:** BPS
3. **Date of most recent survey:** June 2005
4. **Date of publication of report of the most recent survey:** June 2006
5. **Type of publication:** [ ] paper [ ] internet, specify website address...
6. **Date of next survey:** June 2015
7. **Periodicity**
   a. Data collection
      - [ ] monthly
      - [ ] quarterly
      - [ ] twice a year
      - [ ] annually
      - [x] other, Every ten years
   b. Dissemination of results
      - [ ] monthly
      - [ ] quarterly
      - [ ] twice a year
      - [ ] annually
      - [x] other, Every ten years
8. **Coverage**
   a. Population groups
      - Minimum age: None
      - Maximum age: None
      - Exclusion of institutional households (army, prison, etc.) [ ] No [x] Yes, specify:
      - Specify exclusion of any other specific population groups (e.g. migrant workers):
   b. Geographical coverage
      - [ ] whole country
      - [x] whole country, excluding NAD (Aceh)
      - [ ] urban only
      - [ ] rural only
      - [ ] other, please, specify...
9. Topics covered
   - economically active population
   - employment
   - unemployment
   - hours of work per reference period
     - actual hours worked
     - usual hours worked
     - other, please, specify...
   - self-employment income
   - employment tenure
   - duration of unemployment
   - discouraged workers
   - occasionally / casual wage workers
   - industry
   - occupation
   - status in employment
   - educational level
   - secondary jobs
   - employment in informal economy
   - employment in informal sector
   - child labour
   - poverty
   - safe work
   - social security
   - training
   - other, please, specify...

10. Concepts and classifications used in the most recent survey
   a. Economically active population
      - current economic activity (Labour force framework)
      - usual economic activity
      - Are definitions consistent with the ICLS 1982 resolution?  No  Yes
      - Any other comment...
   b. Status in employment
      - employees
      - Differentiation between regular employees and casual/temporary or short-term/seasonal workers?
        No  Yes, regular employees, casual workers in agriculture and casual workers in non-agriculture
      - employers
      - own-account workers
      - members of producers’ cooperatives
      - contributing family workers
      - workers not classifiable by status
      - others, please, specify...
   c. Occupations
      - Direct use of ISCO classification
        - ISCO-08  ISCO-88  ISCO-68
      - Use of a specific national classification of occupations?
        - not related to ISCO
        - based on or consistent with:
          - ISCO-08  ISCO-88  ISCO-68
      - Industries
        - Direct use of ISIC classification
Use of a specific national classification of industries?
☐ not related to ISIC
☒ based on or consistent with:
- ISIC Rev.4 (2008)
- ISIC Rev.3.1 (2002)
- ISIC Rev.3 (1990)
- ISIC Rev.2 (1968)

11. Measurement (Labour force framework)
   a. Employment
      i. One hour criterion for employment used? ☐ No ☒ Yes If no, specify criterion…
      ii. Reference period for employment:
          ☒ last week
          ☐ last day
          ☐ last four weeks
          ☐ other, please, specify…
      iii. Identification of economic activity:
          ☒ use of activity list
          ☐ use of prompt with example of what constitutes work
   b. Unemployment
      i. Question on availability to work included: ☐ No ☒ Yes
         If yes: Reference period for availability to work:
         ☒ Same as for employment
         ☐ Different from employment
         ☐ next week
         ☐ next two weeks
         ☐ next four weeks
         ☐ other, please, specify: …
      ii. Question on seeking work included: ☐ No ☒ Yes
         If yes: Reference period for seeking work:
         ☒ Same as for employment
         ☐ Different from employment
         ☐ last week
         ☐ last two weeks
         ☐ last four weeks
         ☐ other, please, specify: …

12. Survey design (most recent survey)
   a. Sample design
      ☑ Multi stage
First stage sampling unit: Households
Ultimate sampling unit: households, individuals

b. Sample frame, including date: See below

The Inter-censal Population Survey (nationally referred to as SUPAS) is a population survey carried out between two population censuses. As the Population Census in Indonesia is conducted every ten years, consequently the IPS is also carried out every ten years, which was in 1976, 1985, 1995, and 2005. In 2005 SUPAS began to be piloted in Bengkulu, South Sulawesi and Papua, with a sample size of 1,728.

The sample frame used in SUPAS 2005 is the list of census block in each district/municipal differentiated between urban and rural. The mapping of the census block in the SUPAS 2005 used the one from the Population Census 2000. Two districts/municipalities are selected in each province, and each district/municipal is represented by three sub-districts (kecamatan), of which each is represented by three villages. In each village three block censuses are determined, in which 16 households for each block census are selected. ³

The selection of census block is carried out using the Probability Proportional to Size-Linear Systematic Sampling that is each census block has a chance to be selected in proportion to the number of households.

d. Non Response rate...

e. Questionnaire design

☐ landscape questionnaire    ☐ individual questionnaires    ☒ a combination of both

f. Language of questionnaire

Original version Indonesian

Other versions (list all languages): English

Oral translation during interviews: ☐ No ☒ Yes: Local dialect

Data collection method

☒ face-to-face interviews
☐ self-completed questionnaire (mail or drop-off)
☐ phone interviews
☐ other, please, specify ...

g. Use of proxy respondents (e.g. head of household provides answer for absent household members) ☐ No ☒ Yes

13. Available series (most recent survey)

Note: Provincial level data can be estimated for the various available indicators.

14. Data access policy

☒ anonymized data file is available to general public (e.g. posted on website)
☒ anonymized data file is available to specialized audience on application
☐ micro-data is not generally made available
☒ other data access policy: Special tabulations and raw data can be purchased upon request.
Annex 4. Presentation of Population Census

1. Title of survey: Population Census
2. Organization responsible for most recent survey: BPS
3. Date of most recent survey: June 2000
4. Date of publication of report of the most recent survey: Early 2002
5. Type of publication: ☒ paper ☐ internet, see: http://www.bps.go.id (for a few tables)
6. Date of next survey: 2010
7. Periodicity
   a. Data collection
      ☐ monthly
      ☐ quarterly
      ☐ twice a year
      ☐ annually
      ☒ other, Every ten years
   b. Dissemination of results
      ☐ monthly
      ☐ quarterly
      ☒ twice a year
      ☐ annually
      ☒ other, Every ten years
8. Coverage
   a. Population groups
      Minimum age: None
      Maximum age: None
      Exclusion of institutional households (army, prison, etc.) ☐ No ☒ Yes, specify:…
      Specify exclusion of any other specific population groups (e.g. migrant workers):
   b. Geographical coverage
      ☒ whole country
      ☐ whole country, excluding…
      ☐ urban only
      ☐ rural only
      ☐ other, please, specify…
9. Topics covered
   ☒ economically active population
   ☒ employment
   ☒ unemployment
   ☒ time-related underemployment
   ☒ hours of work per reference period
      ☒ actual hours worked
      ☐ usual hours worked
      ☐ other, please, specify…
   ☐ employment income: wages, salaries and self-employment income
   ☐ employment tenure
   ☒ duration of unemployment
   ☐ discouraged workers
   ☒ occasional / casual wage workers
   ☒ industry
   ☒ occupation
   ☒ status in employment
   ☒ educational level
   ☒ secondary jobs
   ☐ employment in informal economy
   ☐ employment in informal sector
   ☐ child labour
   ☐ poverty
   ☐ safe work
   ☐ social security
   ☐ training
   ☐ other, please, specify…
10. Concepts and classifications used in the most recent survey
   a. Economically active population
      ☑ current economic activity (Labour force framework)
      ☐ usual economic activity
      Are definitions consistent with the ICLS 1982 resolution? ☐ No ☑ Yes
      Any other comment...
   b. Status in employment
      ☑ employees
      ☐ differentiates between regular employees and casual/temporary or short-term/seasonal workers?
         ☐ No ☑ Yes, regular worker, casual worker in agriculture and casual worker in non-agriculture.
      ☑ employers
      ☐ own-account workers
      ☐ members of producers’ cooperatives
      ☑ contributing family workers
      ☐ workers not classifiable by status
      ☐ others, please, specify...
   c. Occupations: Not asked
      ☐ Direct use of ISCO classification
         ☐ ISCO-08 ☐ ISCO-88 ☐ ISCO-68
      ☐ Use of a specific national classification of occupations?
         ☐ not related to ISCO
         ☐ based on or consistent with:
            ☐ ISCO-08 ☐ ISCO-88 ☐ ISCO-68
      d. Industries
         ☐ Direct use of ISIC classification
            ☐ ISIC Rev.3 (1990) ☐ ISIC Rev.2 (1968)
            ☑ Use of a specific national classification of industries?
               ☐ not related to ISIC
               ☐ based on or consistent with:
                  ☑ ISIC Rev.3 (1990) ☐ ISIC Rev.2 (1968)

11. Measurement (Labour force framework)
   a. Employment
      i. One hour criterion for employment used? ☐ No ☑ Yes If no, specify criterion...
      ii. Reference period for employment:
          ☐ last day
          ☑ last week
          ☐ last four weeks
          ☐ other, please, specify...
      iii. Identification of economic activity:
21

- use of activity list
- use of prompt with example of what constitutes work

b. Unemployment

i. Question on availability to work included:  
   - No
   - Yes
   If yes: Reference period for availability to work:
   - Same as for employment
   - Different from employment
     - next week
     - next two weeks
     - next four weeks
     - other, please, specify: …

ii. Question on seeking work included:
   - No
   - Yes
   If yes: Reference period for seeking work:
   - Same as for employment
   - Different from employment
     - last week
     - last two weeks
     - last four weeks
     - other, please, specify: …

12. Survey design (most recent survey)

a. Sample design
   - Single stage sampling
   Specify sampling unit:  
     - households
     - individuals
   - Multi stage

   First stage sampling unit: All households are covered

   Ultimate sampling unit:  
     - households
     - individuals

b. Sample frame, including date. The construction of the master frame and master sampling frame was done during the Population Census activities. The frame has served as a basis for many different survey (household approaches) conducted since the 2000 Population Census. The master frame was constructed based on the SP2000-RD documents which contained information on village names, codes, urban/rural classification, enumeration areas’ number, and the number of estimated households per enumeration areas.

   The master sampling frame is detailed by the regency/municipality and the provincial MSF. The latter was constructed by the regency/municipality master sampling frame.

c. Sample size: Complete enumeration.

d. Non Response rate…

e. Questionnaire design
   - landscape questionnaire
   - individual questionnaires
   - a combination of both

f. Language of questionnaire
   - Original version: Indonesian
   - Other versions (list all languages): English
Oral translation during interviews: ☐ No ☑ Yes, specify languages: **Local dialect**

- ☑ face-to-face interviews
- ☐ self-completed questionnaire (mail or drop-off)
- ☐ phone interviews
- ☐ other, please, specify ...

h. Use of proxy respondents (e.g. head of household provides answer for absent household members) ☐ No ☑ Yes

21. Survey design (most recent survey)
- [ ] Census
  - [x] Sample survey
    - Sampling unit: Establishment
    - Sample frame, including date ...
    - Sample design: The survey is based on a complete enumeration of large and medium-scale establishments
The Quarterly Large and Medium Manufacturing Industry Survey is based on a sample basis, involving as much as 992 selected establishments. Data on Quarterly Large and Medium Manufacturing Industry Survey are collected in two ways. First, 797 establishments are compiled every quarter. Secondly the remaining establishments (195) are compiled every month. Furthermore, after three months the data which are collected monthly could be consolidated with data which are collected every quarter for computing the Quarterly Production Index.

This survey was conducted by delivering a questionnaire to all selected establishments, through the BPS Provincial or Municipality offices. Usually, not all establishments respond to this system. In such cases usually field enumerators would leave the questionnaires to establishment, and come back later to collect the questionnaire after it had been filled in. Sometimes the data could be collected through direct enumeration (without leaving the questionnaire) by the field enumerator (Mantri Statistik), especially for medium-sized establishments. Therefore, basically, this survey is conducted by applying direct enumeration method. Unlike the quarterly survey, in which data collection is conducted by delivering the questionnaires to all sample of establishments through BPS Provincial or Municipality offices or by direct enumeration involving field enumerators, the monthly survey is fully handled by the Sub-Directorate of Small-Scale and Cottage Industry Statistics. The data collection system of the monthly survey involves three ways: firstly, delivering questionnaires to establishments using facsimile facilities; secondly, by email; and thirdly, by post. Therefore, the monthly survey is conducted by applying a combination of the mailing, facsimile, and email system. The response rate of the annual survey ranges from 84 to 91 per cent of the target, with the response time around 18 months after the reference year.

Sampling unit: Establishments without legal entity status

Sample frame, including date …

Small scale & micro establishments (SME) data are collected through the Integrated Survey of Small-scale Establishments (ISSE), which is a follow-up survey of the 1996 Economic Census. The survey is conducted on a sample basis. Since 1998 these surveys were integrated into the Integrated Establishment Survey (Survei Usaha Terintegrasi or SUSI 1998) that covers all non-agricultural sectors. The sampling unit of this survey is all
establishments without legal entity, irrespective of the number of employees, and including small and cottage industries which are based on the number of employees (i.e. with 5-19 employees for small industries and less than 5 for cottage industries). Due to the concept and terms being used, obviously the results of the ISSE can be used as a proxy to reflect the establishments belonging to the informal sector, although not in the full meaning of the terms.\(^7\) This survey covers around 120 thousand establishments of all non-agricultural sectors, of which around 28 thousand establishments are small and cottage industries.\(^8\)

The ISSE applies two-stage sampling to select its representative establishments. The first is to select a number of enumeration areas from each of the two strata, namely, high-density economic stratum and housing area stratum, while the second stage is to select a number of establishments from each of the selected enumeration areas. A list of all establishments within the selected enumeration areas is constructed through listing, and PPS method was implemented in the establishment selection.

The number of SME units recorded by the 1996 Economic Census was 16.8 million excluding in the agriculture sector. In order to have more comprehensive figures on the characteristics of the existing SME units, a sample of 1.16 million establishments was selected in the census. The survey was not implemented in 1997, but the ISSE itself has been conducted every year since 1998. The sample size for 1998 was only 89,000 establishments. The survey was conducted only once during that year, while in 1999 the survey was conducted four times (quarterly), involving 118,000 establishments (i.e. to 29,500 samples per quarter). The latest survey was the 2000, 2001 and 2002 surveys, each of which employed 59,433 samples, or on average 14,850 samples for each quarter.

Data collection for this survey so far had been done periodically through a census or survey. The complete data collection of this Micro and Small Industry was done through the 1974/1975 Census of Industry. Then, it was done through the Survey of Small and Handicraft Industry in 1982, the 1986 Economic Census, and in 1991, 1993, 1994 and 1995 through the Survey of Small and Handicraft Industry. The data for 1996 was collected
through the 1996 Economic Census, meanwhile for the period of 1998 to 2005 the data were collected through the Integrated Establishment Survey (SUSI) and the 2006 data were collected through the 2006 Economic Census.⁹

2. **Organization responsible for survey:** BPS

3. **Date of survey:** 2006

4. **Date of publication of report of survey:** 2008

5. **Type of publication**
   - X Paper
   - Internet, see: http://www.bps.go.id (only a few tables).

6. **Date of next survey:** 2016

7. **Periodicity**
   a. **Data collection**
      - ☒ monthly
      - ☐ quarterly
      - ☒ twice a year
      - ☐ annually
      - ☒ other, Every ten years
   b. **Dissemination of results**
      - ☒ monthly
      - ☐ quarterly
      - ☒ twice a year
      - ☐ annually
      - ☒ other, Every ten years

8. **Coverage:**

9. **Geographical**
   - ☒ whole country
   - ☐ whole country, excluding...
   - ☐ other, please, specify...

10. **Industries**
    - Included | Excluded
    - A - Agriculture, hunting and forestry | ☐ | ☒
    - B - Fishing | ☐ | ☒
    - C - Mining and quarrying | ☒ | ☐
    - D - Manufacturing | ☒ | ☐
    - E - Electricity, gas and water supply | ☒ | ☐
    - F - Construction | ☒ | ☐
    - G - Wholesale and retail trade; repair of motor vehicles, etc. | ☒ | ☐
    - H - Hotels and restaurants | ☒ | ☐
    - I - Transport, storage and communications | ☒ | ☐
    - J - Financial intermediation | ☒ | ☐
    - K - Real estate, renting and business activities | ☒ | ☐
    - L - Public administration and defence; compulsory social security | ☐ | ☐
    - M - Education | ☒ | ☐
    - N - Health and social work | ☒ | ☐
    - O - Other community, social and personal service activities | ☒ | ☐
    - P - Activities of private households as employers and undifferentiated | ☒ | ☐
production activities of private households
Q - Extraterritorial organizations and bodies

11. Institutional sector

  - ☐ year
  - ☒ month
  - ☐ week
  - ☐ hour
  - ☐ other, please, specify…

- Includes:
18. Hours of work (see definitions in ICLS-R-[2008-12-0006-6]-En.doc/v3)
   X [ ] hours actually worked
   [ ] hours paid for
   [ ] normal hours of work
   [ ] contractual hours of work
   [ ] hours usually worked
   [ ] overtime hours of work
   [ ] absence from work hours

   [ ] Direct use of ISCO classification
     ISCO-08
     ISCO-88
     ISCO-68
   [ ] Use of a specific national classification of occupations?
     [ ] not related to ISCO
     [ ] based on or consistent with:
       ISCO-08
       ISCO-88
       ISCO-68

20. Industries
   [ ] Direct use of ISIC classification
     ISIC Rev.3 (1990) ISIC Rev.2 (1968)
   X [ ] Use of a specific national classification of industries?
     [ ] not related to ISIC
     X [ ] based on or consistent with:
       ISIC Rev.3 (1990) ISIC Rev.2 (1968)

21. Data collection
   X [ ] aggregate level with sex disaggregation
   [ ] aggregate level without sex disaggregation
   [ ] individualised with information on sex
   [ ] individualised without information on sex

22. Survey design (most recent survey)
   X [ ] Census
   [ ] Sample survey
     Sampling unit … establishment
     Sample frame, including date …
     Sample design …
### 23. Available series (most recent survey)

### 24. Data access policy

- ✔ anonymized data file is available to general public (e.g. posted on website)
- ✔ anonymized data file is available to specialized audience on application
- ✔ micro-data is not generally made available
- ✔ other data access policy: **Raw data and special tabulation may be purchased upon request.**
ILO/EC Project “Monitoring and Assessing Progress on Decent Work” (MAP)

Monitoring and assessing progress towards decent work is a long-standing concern for the ILO and its constituents. Implemented by the ILO with funding from the European Union, the project “Monitoring and Assessing Progress on Decent Work” (MAP) helps to address this need. Over a period of four years (2009 to 2013), the project works with Ministries of Labour, National Statistical Offices, other Government agencies, Workers' and Employers' organisations and research institutions to strengthen the capacity of developing and transition countries to self-monitor and self-assess progress towards decent work. The project facilitates the identification of Decent Work Indicators in line with national priorities; supports data collection; and assists in the analysis of data on decent work in order to make them relevant for policy makers. The MAP publication series disseminates project outputs to a broad audience in the ten countries covered by the project and beyond.

For more information on the ILO/EC Project “Monitoring and Assessing Progress on Decent Work” (MAP) see http://www.ilo.org/map
