It is my great pleasure to welcome you to the “XIX World Congress on Safety and Health at Work” to be convened from September 11 to 15 at Haliç Congress Centre in Istanbul, the European capital of culture for 2010 and the cradle of civilizations for centuries.

The “World Congress on Safety and Health at Work” will serve as an international platform for exchanging opinions among the public and private sector administrators, occupational safety and health professionals, workers’ and employers’ representatives and all stakeholders employed in the field of occupational safety and health, and the experts coming from all around the world.

In recent years, the impact of global financial and economic crisis is felt in every aspect of life, including the fields of employment, working life and occupational safety and health. One of the most effective and efficient ways of eliminating the adverse effects of the global financial and economic crisis is the prevention of occupational accidents and diseases through increased investment for a safe working environment that will eventually increase the welfare of the workers and the productivity of the labour.

The Congress, which has been organised once every three years since 1955, is the World’s greatest and most comprehensively participated international organisation in the field of occupational safety and health. I would like to take this opportunity to indicate that it is also an honour for our Ministry that Turkey has been selected as the host country of the Congress for 2011.

The Congress will be held under the motto of “Building a Global Culture of Prevention for a Healthy and Safe Future” and will include plenary sessions, various technical sessions, symposia, regional meetings, workshops, poster sessions and international multimedia and film festival with active participation of national and international competent institutions. The Congress will also provide you an excellent opportunity to explore the city of Istanbul through several social events.

As the Minister of Labour and Social Security of the Republic of Turkey, I would like to emphasize that your active participation in this Grand Event will be very much appreciated. Take the opportunity to attend the “XIX World Congress on Safety and Health at Work”, and explore Istanbul, the only metropolis in the World that is situated on two continents.

1) Plenary Sessions
Two plenary sessions will be held in the mornings of September 12 and 13, respectively, which will focus on the four main topics of the Congress: I. Comprehensive, Proactive and Preventative Approaches to Safety and Health at Work; II. Systems Approach to Occupational Safety and Health; III. Social Dialogue, Partnerships and Innovation in Occupational Safety and Health; IV. New challenges in a Changing World of Work and the Global Economy. Keynote speakers from all over the world will address these issues providing an opportunity to share recent experiences and good practices in the field of occupational safety and health.

2) Technical Sessions
Technical sessions will also deal with the four main topics of the World Congress. They will be divided into six sessions held respectively by ILO, ISSA and MoLSS.

3) Regional Meetings
Meetings with a regional focus will be held to provide a forum for the regions to share experiences on OSH and to promote dialogue focusing on some of the most hazardous sectors at a regional level. Experts will evaluate national and regional challenges in implementing occupational safety and health, assess ongoing monitoring and evaluation activities and discuss common priorities for action.

4) Symposia
In total, thirty one symposia will offer a chance to gain an understanding of the current situation regarding safety and health as well as an insight into the future challenges.

5) Speakers’ Corner
The Speakers’ Corner will be open during the lunch breaks. It is designed to contribute to the exchange of experiences among OSH practitioners, in a variety of safety and health areas.
6) Poster Sessions
The poster sessions will be held throughout the Congress. They provide the opportunity to present research, good practice as well as other information by an individual or representative of teams with an academic or professional focus on occupational safety and health. They combine text and graphics to make a visually pleasing presentation. The posters at the sessions will present general information and invite viewers to ask more detailed information from the presenters.

7) Training Courses
We would like to kindly invite you to attend and benefit from the training courses to be held within the framework of the XIX World Congress on Safety and Health at Work. All participants who complete the online registration and pay the additional course fee of 50 USD (30 USD - local participant) will receive a certificate of participation issued by the training course organizers at the end of the course. Training courses will be delivered in English.

8) International Film and Multimedia Festival
The International Film and Multimedia Festival is an integral part of the XIX World Congress on Safety and Health at Work. It will take place in Istanbul from September 12 to 14, 2011. The Festival offers an overview of films and multimedia productions from all over the world and provides an opportunity for participants to present their projects to a major group of influential international safety and health professionals. The Festival is organized jointly by the International ISSA Sections “Electricity” and “Information”. We cordially invite you to participate actively in the Film and Multimedia Festival. Your participation will substantially contribute to the success of this unique event.

9) Official Events
Official events such as the Opening Ceremony, Cocktail, Gala Night and Closing Ceremony are excellent opportunities to network with safety and health professionals across the world.

10) International Safety and Health Exhibition
The Ministry of Labour and Social Security of Turkey is pleased to organize the International Safety and Health Exhibition in conjunction with the World Congress. Being part of such a dynamic event, the exhibition will showcase the latest technologies and products. As a World Congress participant, you will have the opportunity to access the exhibition which will be held from September 11 to 15, at the venue of the World Congress.

### Organizer: NSC
**Subject:** Global Responsible Leadership Roundtable  
**Date:** September 11, 2011, 08:00 - 14:00  
**Venue** Sütlüce - 2 Hall

Effective leadership is one of the most critical ingredients for success in safety and health efforts at work. While safety and health research institutes and advocacy organizations seek ways to translate findings into practical workplace solutions, industry leaders with real-life insights are the most eloquent spokespeople for the intrinsic value of safety and healthy to overall business operations.
Discovering and sharing relevant, actionable solutions to the EHS challenges lies at the core of business excellence and sustainability. The Global Responsible Leadership Roundtable at the 2011 World Safety Congress on Safety and Health at Work is an opportunity for open, in-depth dialogue between business leaders and the research/advocacy community. Jointly hosted by ISSA, Turkish Ministry of Labour, Campbell Institute (US National Safety Council), Mercer, and DuPont, the Forum is a platform for truly meaningful, purposeful exchange. The Forum is an exclusive, invitation-only gathering of top-level leaders and decision-makers. It examines holistic, operational perspective on key elements of transformational leadership. Interactive panels and breakout group discussions allow for great opportunity for exchange and networking to bolster future collaborations. Multiple panel discussions featuring known and respected business leaders.

Venue: Kasımpaşa - 2 Hall
The International Federation of Chemical, Energy, Mine and General Workers’ Union (ICEM) will host a panel of experts on health and safety in mines, highlighting the present worldwide situation and making the case for the ratification of ILO Convention 176 (and its associated Recommendation).

Organizer: WHO
Subject: Developing Healthy Workplace Programmes
Date: September 14, 2011, 14:00 - 15:30
Venue: Sütlüce - 1 Hall
A number of effective workplace interventions and good practice approaches exist to address specific hazards in the workplace, but too often their implementation produces mostly short-lived successes due to their limited target area. What is lacking is practical global, regional and country guidance on the best integrated or comprehensive manner to address workplace risks, including principles of occupational health and safety, traditional health promotion and lifestyles, the psychosocial working environment and corporate community action coupled with capacity building and sustainable human and economic development.
In particular, in times of financial uncertainty, there is an urgent need to produce such guidance for businesses to provide opportunities to sustain a healthy workforce and a healthy business and enhance commitment from employers to workers, and workers to businesses to obtain success in all spheres.
This workshop will present the WHO Healthy Workplace Model and a number of case studies demonstrating good practices. Further input by participants will be much appreciated.

Organizer: SESRIC

Venue: Kasımpaşa - 5 Hall

Date: September 14, 2011, 14:00 - 16:00

Subject: To reflect and Benchmark OSH - Aspects in the Waste Management Sector in Different Countries to Discuss Future Prevention Activities

Workshops:

Organizer: ENSHPO General Meeting

Date: September 15, 2011, 14:00 - 17:30

Venue: Sütlüce - 1 Hall

Employees in the field of waste management, especially garbage collectors are multifariously stressed by doing their work. The hazards by chemical or biological substances, UV radiation by outdoor working, manual lifting or carrying of heavy weights or continuous noise pollution during the work are able to cause numerous occupational health problems and diseases. The aim of the workshop is to present and discuss different prevention activities in the field of waste management together with international experts. Furthermore the auditorium will try to create proactive prevention strategies for workplaces in industrial and developing countries.

Organizer: International Section on Prevention of Accident at Work and Occupational Diseases in Agriculture will hold its Bureau and Advisory Board Meeting to discuss the occupational safety issues in the agricultural sector and talk over the

Subject: Safety and Health Prevention in Small and Medium Enterprises (SMEs) of the Hospitality and Tourism Sector

Date: September 15, 2011, 14:00 - 18:00, (S2) Sütlüce - 2 Hall

Venue: Kasımpaşa - 4 Hall

The applicability of general concepts and procedures for safety and health prevention to small and medium enterprises (SMEs) in the hospitality and tourism sector appears to be very limited. While a few best practice examples do exist, pertinent knowledge differs across countries. Accordingly, the overall goal of this workshop is to provide an overview of the concepts and approaches to (a) reach the SMEs in the hospitality and tourism sector (e.g., hotels, restaurants) in different countries, and (b) provide an overview of prevention methods and procedures deemed appropriate and/or efficient in different regions. Given this overall goal, the workshop will encompass three parts: In part one, Peter Barenz will provide a brief overview of the ‘state of the art’ on what appears to work when focused on the SMEs in the hospitality and tourism sector. In part two, best practice examples submitted by workshop participants from different countries/regions will be presented and discussed. Michael Bosnjak will discuss how Social Marketing principles may aid implementing and evaluating safety and health prevention programs in SMEs of the hospitality and tourism sector.

International Film and Multimedia Festival

The International Film and Multimedia Festival (IFMF) is an integral part of the XIX World Congress on Safety and Health at Work. The Festival is organized jointly by the International ISSA Sections Electricity and Information.

A record number of 221 productions from 29 countries were submitted. This shows that the event has worldwide popularity.

The opening of the Film and Multimedia Festival is part of the official opening ceremony, which takes place in the Haliç Hall of the Haliç Congress Center on Sunday 11 September, 2011. From Monday to Wednesday, selected films and multimedia productions related to safety and health at work will be shown in Tophane Hall. Information about the films, the date and schedules is given in the following table.

In front of the cinema, and in the entrance area of the Congress, all congress delegates will have the opportunity to watch the films which have been admitted to the Festival and to use the multimedia productions interactively.

An international jury hall meet in İstanbul to select the winners from a large number of contributions. During the closing ceremony of the Congress on Wednesday 14 September, the award ceremony hall take place.

In your congress bag, you will find a CD with a list of productions participating Istanbul Festival as well as award, the winning films from former Festivals and a few films, that you could use for your safety work.

The ISSA Sections “Electricity“ and “Information“ are pleased to welcome you to this exciting, informative and interesting Festival in Istanbul!

Do not hesitate to use this opportunity to get a good overview of various products, which contribute to promotion of Safety and Health at Work worldwide.

Accompanying Persons’ Programme

Daily tours will be arranged free of charge to the historical, touristic and cultural sights of Istanbul for accompanying persons. Participants will be able to select tours during online registration. Some daily tour samples are given below for accompanying persons.

Bosphorus Boat Tour: Experience the beauty of the Bosphorus by taking this fascinating tour by boat. During the tour you’ll see five Ottoman palaces, namely, Topkapı Palace, Dolmabahçe Palace, Çırağan Palace, Yıldız Palace and Beylerbeyi Palace. The Mecidiye Mosque Selimiye barracks (where Florence Nightingale once worked) and Anadolu Hisarı (the Fortress of Anatolia) will be visited too. Participants will also have the chance to see from the Bosphorus itself the two bridges over the Bosphorus, namely Boğazici Bridge and Fath Sultan Mehmet Bridge.

Kapalı Çarşı (Grand Bazaar Tour): The year 1461 is generally accepted as the foundation date of Grand Bazaar. This biggest and oldest shopping mall of the time has the oldest bank of the world. It is also one of the mysterious and beautiful places in the world, possibly its eighth wonder. The Grand Bazaar is waiting to entertain and embrace its foreign visitors, who are both interested in history and shopping antiquities made by our ancestors while they are enjoying experience of catching up with history. Do not hesitate to give a try to the Grand Bazaar’s health unit, post office, bank branches, private fire department, police station, coffee shops and restaurants, and the historical and cultural treasures hidden inside.

Topkapı and Dolmabahçe Palaces Tour: Topkapı Palace, constructed by Fatih Sultan Mehmet (the Conqueror) in 1478 became the official residence of the Ottoman Sultans. Currently, the Palace has an area of 80,000 sq. m. although it has been abandoned by the Sultans for others; Topkapı Palace had never lost its importance. As for Dolmabahçe Palace, built in the 19th century, it is one of the most glamorous palaces in the world. It was the administrative centre of the Ottoman Empire. Dolmabahçe Palace has a great significance for Turkish people, because Turkey’s President Mustafa Kemal Atatürk used the palace as his residence and spent the most serious part of his illness here and passed away at this palace. Later it was converted into a museum.

Ancient Peninsula Tour: Famous in particular for its massive dome in Istanbul, Hagia Sophia is a former Orthodox patriarchal basilica, later converted into a mosque and a museum later. From the date of its dedication in 360 until 1453, it served as the Cathedral of Constantinople, except between 1204 and 1261, when it became the Cathedral of the Latin Empire. The building was converted into a mosque from 29 May 1453 until 1934. Later, on 1 February 1935, it was opened as a museum. The Sultan Ahmed Mosque is also a spectacular historic architecture in Istanbul. Popularly known as the Blue Mosque because of the blue tiles decorating interior. It was built between 1609 and 1616, under the rule of Ahmed I. Like many other mosques, it also comprises a tomb of the founder, a madrasah and a hospice. While still used as a mosque, the Sultan Ahmed Mosque has also become a popular tourist attraction.

İstiklal Street and Churches Tour: Once named as the “Grand Rue de Pera”, İstiklal Street is a place where you can see most of the beauties of Istanbul together. Its shops, restaurants, bars and pubs are a “must see”. St. Antuan Church is also located on this street. It starts at Taksim Square and ends at the Tunnel (Funicular), which is one of the oldest underground railways in the world.

İstanbul Modern & Santral Istanbul: Founded in 2004, Istanbul Modern is the first private museum organizing modern and contemporary art exhibitions in Turkey and it occupies a large site on the banks of the Golden Horn, encompassing 8,000 square meters. The Museum offers a wide array of services in a multifaceted venue, including permanent and temporary exhibition galleries, a photography gallery, a library, a cinema centre, a café and a design store. In addition, the Museum also offers video, educational and social programmes for the visitors. Santral Istanbul, once known as the Silahtarağa power plant, was the first urban-scale power plant in the Ottoman Empire, which operated between 1911 and 1983. Today, it serves as a modern art gallery and also hosts the Museum of Energy, which is a must see for those who want to learn about the early days of power production.
We begin the day by driving across the first Bosphorus Bridge and head in to the top at Camlica Hill, which affords spectacular panoramic views of Istanbul, the Marmara sea and the Princes' Islands. From here a short drive brings us to the Palace of Beylerbeyi located on the shore of the Bosphorus. Perhaps the most elegant of the late Ottoman palaces, Beylerbeyi boasts six sumptuously furnished reception halls.

**ASIA (DAILY AFTERNOON TOUR)**

Formally called Constantinople, Istanbul was the capital of the Roman Empire and Europe's wealthiest metropolis, and is now the largest city in Turkey.

One of the most famous monuments in both the Turkish and Islamic worlds, the Sultan Ahmed Mosque (also known as the Blue Mosque) is a superb creation in the classical Ottoman style. The mosque has six towering minarets and 260 windows illuminating its vast main chamber, which is decorated with more than 20,000 Iznik tiles.

**Blue Mosque**

The largest and oldest palace in the world, Topkapi is the crown jewel of the Ottoman Empire. With its treasury and exotic buildings overlooking the Golden Horn, your visit to Topkapi promises to be a truly fascinating experience. (Closed on Tuesdays)

**Topkapi Palace:**

The Istanbul Museum of the History of Science and Technology in Islam is unique in the world with its exceptional collection of objects comprising exact replicas of the scientific and technical achievements from the ninth through the seventeenth centuries in astronomy, geography, nautical, time measurement, geometry, optics, medicine, chemistry, mineralogy, physics, techniques, architecture and military techniques. The Istanbul Museum of the History of Science and Technology in Islam is especially attractive because of its aesthetics, the didactics of its scientific expositions, and the synergy between the visual experience and the learning process on the part of the visitor.

**The Istanbul Museum of the History of Science and Technology in Islam:**

**GALLIPOLI AND TROY TOUR**

Troy, scene of Homer’s *Iliad*, the story of the Trojan War and the first great work of Western literature. Here Achilles, Hector and Agamemnon performed their heroic exploits in their attempts to recapture Helen, whose beauty launched 1,000 ships.

Today, Troy was the theme of a major Hollywood production, starring Brad Pitt and Orlando Bloom. The site dates back to the very early Bronze Age (2500 BC) and was discovered by the German archeologist Heinrich Schliemann in late 19th century. The city was destroyed and rebuilt many times, with the result that the site consists of many layers, one city atop the other. To the layman, perhaps the most impressive feature is the massive ramparts.

Gallipoli peninsula. This was the scene of the world’s first modern amphibious landing, planned by Winston Churchill, and one of Turkey’s greatest military victories of modern times, but it was won at the cost of enormous losses on both sides, particularly among the heroic Anzac troops.

**Day 1**
Pick up from your hotel. Departure from İstanbul to Canakkale and drive straight to Eceabat and there follows a lunch break en-route. We will cross the Dardanelles by ferry (from Eceabat to Canakkale city center). Drive to Troy. Visit the legendary Troy city, the museum and the famous wooden horse. Dinner at hotel. Overnight in Canakkale.

**Day 2**
Deperate for Gallipoli after breakfast, crossing the Dardanelles by ferry. Visit Gallipoli National Park including the Gallipoli Battlefields, Kabatepe War Museum, Anzac Cove, original tunnels and trenches at Johnston Jolly, the Nek Cemetery, Chunuk Bair New Zealander Memorial, Lonepine Australian Memorial and Brighton Beach. With your guide you may visit rarely seen areas which are not included on the standard regular tour. Drive back to İstanbul, arrive Istanbul by 19:00 the earliest. Transfer to your hotel in Istanbul. End of tour.

Turkish Lira is available in the following denominations:

Banknotes: 5, 10, 20, 50, 100 TL & 200 TL
Coins: 5, 10, 25 & 50 Kuruş and 1 TL

You can obtain currency before travelling to Turkey or upon arrival. Exchange rates are usually slightly better in Turkey and all international airports have exchange facilities. Usually, cash can be exchanged without charging commission in exchange offices, banks or hotels. Please note that Scottish notes are not accepted in Turkey. Travellers' cheques can be exchanged in banks only. Cash point machines (ATM) are available in most areas, which accept major UK credit and debit cards and give instructions in English. It may be a good idea to inform your bank in advance that you are travelling to Turkey as some will automatically put a stop on cards after the first usage in an attempt to combat fraud. Exchange rates are published daily in Turkish newspapers. If you are planning to exchange currency back from TL before leaving the country, or are making a major purchase, which may need to be declared to customs, you will need to keep your transaction receipts in order to show that the currency has been legally exchanged.

The Ministry of Labour and Social Security was established in 1946. With its departments and subsidiaries, it aims at ensuring the realization of the social affluence and justice, as well as improving the living standards of workers and quality of the workforce. For this purpose, the Ministry takes preventive measures for the arrangement of working life and ensures facilitation of the relationship between the employer and employee for the protection of the working peace through professional training, inspection, and law enforcement.

One of the most important tasks of the Ministry is to facilitate a safe and healthy work environment for the workers as well as occupational rehabilitation of the disabled person. This task is carried out by the Directorate General of Occupational Health and Safety. For this purpose, the Ministry utilizes tools such as training and implementation of social insurance services against various physical, economic, and social risks. The Ministry of Labour and Social Security also collects and publishes labor statistics on a yearly basis.
