# HOUSEHOLD ROSTER AND DEMOGRAPHICS (DEM)

## OBJECTIVES AND SCOPE
- To enable a household roster to be established
- Covers basic demographics on sex, age, relationship to head of household, marital status, education level, field of study and current educational attainment

## IMPLEMENTATION NOTES
- For national purposes other key demographic information could be included where known to be needed for analytical purposes
- Separate modules exist on migration and disability as background characteristics
- The module should be asked to a reference person in roster style. That is, the full set of information is to be provided for all respondents by one knowledgeable household member before moving onto the household level information and personal interviews for eligible members

## DEM_STR
Hello. My name is [INTERVIEWER]. I work for [AGENCY]. May I speak with an adult person living in this household that is able to provide information about the household and its members?

**INTERVIEWER CHECK: IS AN ADULT MEMBER AVAILABLE?**
1. YES
2. NO

*Note: For CAPI implementation, if DEM_STR=2 (NO), go to SCHEDULE APPOINTMENT MODULE*

## ASK IF (DEM_STR=1)

### DEM_CONF
[This household has been selected to participate in a government survey about the activities that people do to earn a living. The information that you will provide is confidential and will not be shared, but it will help better understand how people in this area live, the jobs they do. Your participation is [voluntary/required by law]. The survey will take approximately [SVY_TIME] minutes. Before I continue with the survey, I need some information about the members of this household]...

# INTERNATIONAL MIGRATION STATUS (MIG)

## OBJECTIVE AND SCOPE
- To capture international migration status (migrant/non-migrant) as background characteristic.
- Captures basic essential characteristics needed to identify the foreign-born and foreign populations in the country of destination. This includes: country of birth, date of last arrival to country of current residence, reason for move, and country of citizenship.
- It allows distinction between recent and long term international migrants.
- The module does not cover internal migration, emigration, return migration, identification of second-generation migrants, or of short-term migrant workers.

## IMPLEMENTATION NOTES
- To be included in the household roster for questionnaire administration purposes.
- Its suitability to support tabulations by international migration status will depend on the prevalence of in-migration to the country and the survey’s sample design and sample size.
- Surveys using de-facto enumeration may need to include an additional question on intended duration of stay asked to respondents to report arriving to the country in the preceding 12 months to the survey interview date.
- Aligned with the recommendations included in the Handbook on Measuring International Migration through Population Censuses (UN, 2017)

## DISABILITY STATUS (DIF)

### OBJECTIVE AND SCOPE
- To capture disability status as a background characteristic. Covers difficulties in six functional domains (walking, seeing, hearing, cognition, self-care and communication).

### IMPLEMENTATION NOTES
- To be included in the household roster for questionnaire administration purposes
- The introductory text should be included to provide a health-related context for respondents when answering the questions. The introductory text should not include the term “disability” in the wording or translation to reduce biases in reporting.

HOUSEHOLD SOURCES OF LIVELIHOOD (HLL)

OBJECTIVES AND SCOPE
- To obtain basic information on sources of household livelihood (HLL_SRC and HLL_SMN)
- It identifies all sources of household livelihood, as well as the main source as self-declared by the household head or reference person
- It distinguishes between income from employment and other sources of household income, including remittances, transfers and own-use production of foodstuff.

IMPLEMENTATION NOTES
- To be answered by a knowledgeable household member (reference person).
- Requires careful translation of the response categories to ensure proper understanding by different groups of the population
- It may be combined with the module on Household Agriculture for more detailed information on the farming and/or fishing activities at the household level

TO BE ASKED ONLY TO THE HEAD OR REFERENCE PERSON
