### HH3 How many rooms are there in this dwelling?

This provides information on the amount of space available to each household member, and is a key indicator in measuring quality of life.

A room is defined as a space in a dwelling unit enclosed by walls. The total number of rooms therefore includes bedrooms, dining rooms, living rooms, studies/den/office, habitable attics, servants' rooms, kitchens, and other separate spaces used or intended for dwelling purposes. Detached rooms which are a part of the dwelling such as an outdoor kitchen with four walls and a roof should be counted. If the kitchen, dining area and living area are not separated by walls, they should be counted as one room.

Passageways, verandas, lobbies, laundry rooms, bathrooms and toilet rooms **should not** be counted as rooms.
