Confined or Enclosed Space Hazards

Risks:

01

Suffocation
from low
oxygen or
toxic gases

Injuries from
narrow or
blocked exits

02

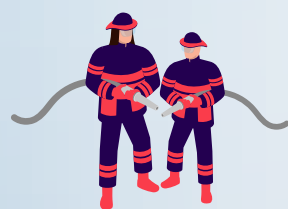

03

Dangerous for
children who
play nearby

How to Stay Safe:

Before Entry

Never enter alone, always
work with a trained partner

Get written permission showing
time, place, and names of workers

Test air quality with gas detectors
before and during work

Use ventilation tools (fans, air blowers)
to maintain fresh air flow

Wear protective gear
(masks, breathing support)

Train workers on risks and
emergency procedures

For Abandoned Areas

Seal or cover abandoned wells

Keep children and untrained
workers away

Put warning signs near all
dangerous or closed spaces
