Organic Dust and Respiratory Hazards

Risks:

01

Hay, grain, mold,
feathers, feed →
dust in lungs

Poor
ventilation
in silos/barns

02

03

Handling moldy
residues in crops
or storage

Health Effects:

- Cough, wheeze, chest tightness
- Asthma or chronic breathing problems

Stay Safe:

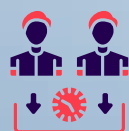

Wear a dust mask &
long sleeve

Wash hands & face
after dusty tasks

Don't shake hay/
feathers indoors

Rotate workers to
reduce exposure

Keep storage areas dry & well-
ventilated (Use ventilation, open
windows and drying systems)

Use tractors/loaders with
enclosed cabs + filters

If you have fever, cough,
or chest pain, see a doctor
immediately.
