

Social Protection Floor: Challenges and Opportunity in Indonesia

Dinna Wisnu, Ph.D

Co-founder & Director, Paramadina Graduate School of
Diplomacy

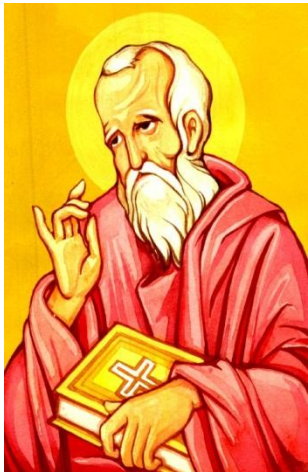

Workshop on SPF Launching at Bappenas, 6 December 2012

@dinnawisnu

To protect ALL aspects of human vulnerabilities,
with ALL kinds of empowering activities and
providing it to ALL people is...

A Change Of Mind & Heart & Behavior

From Being
saint

Acceding to
labor
demands

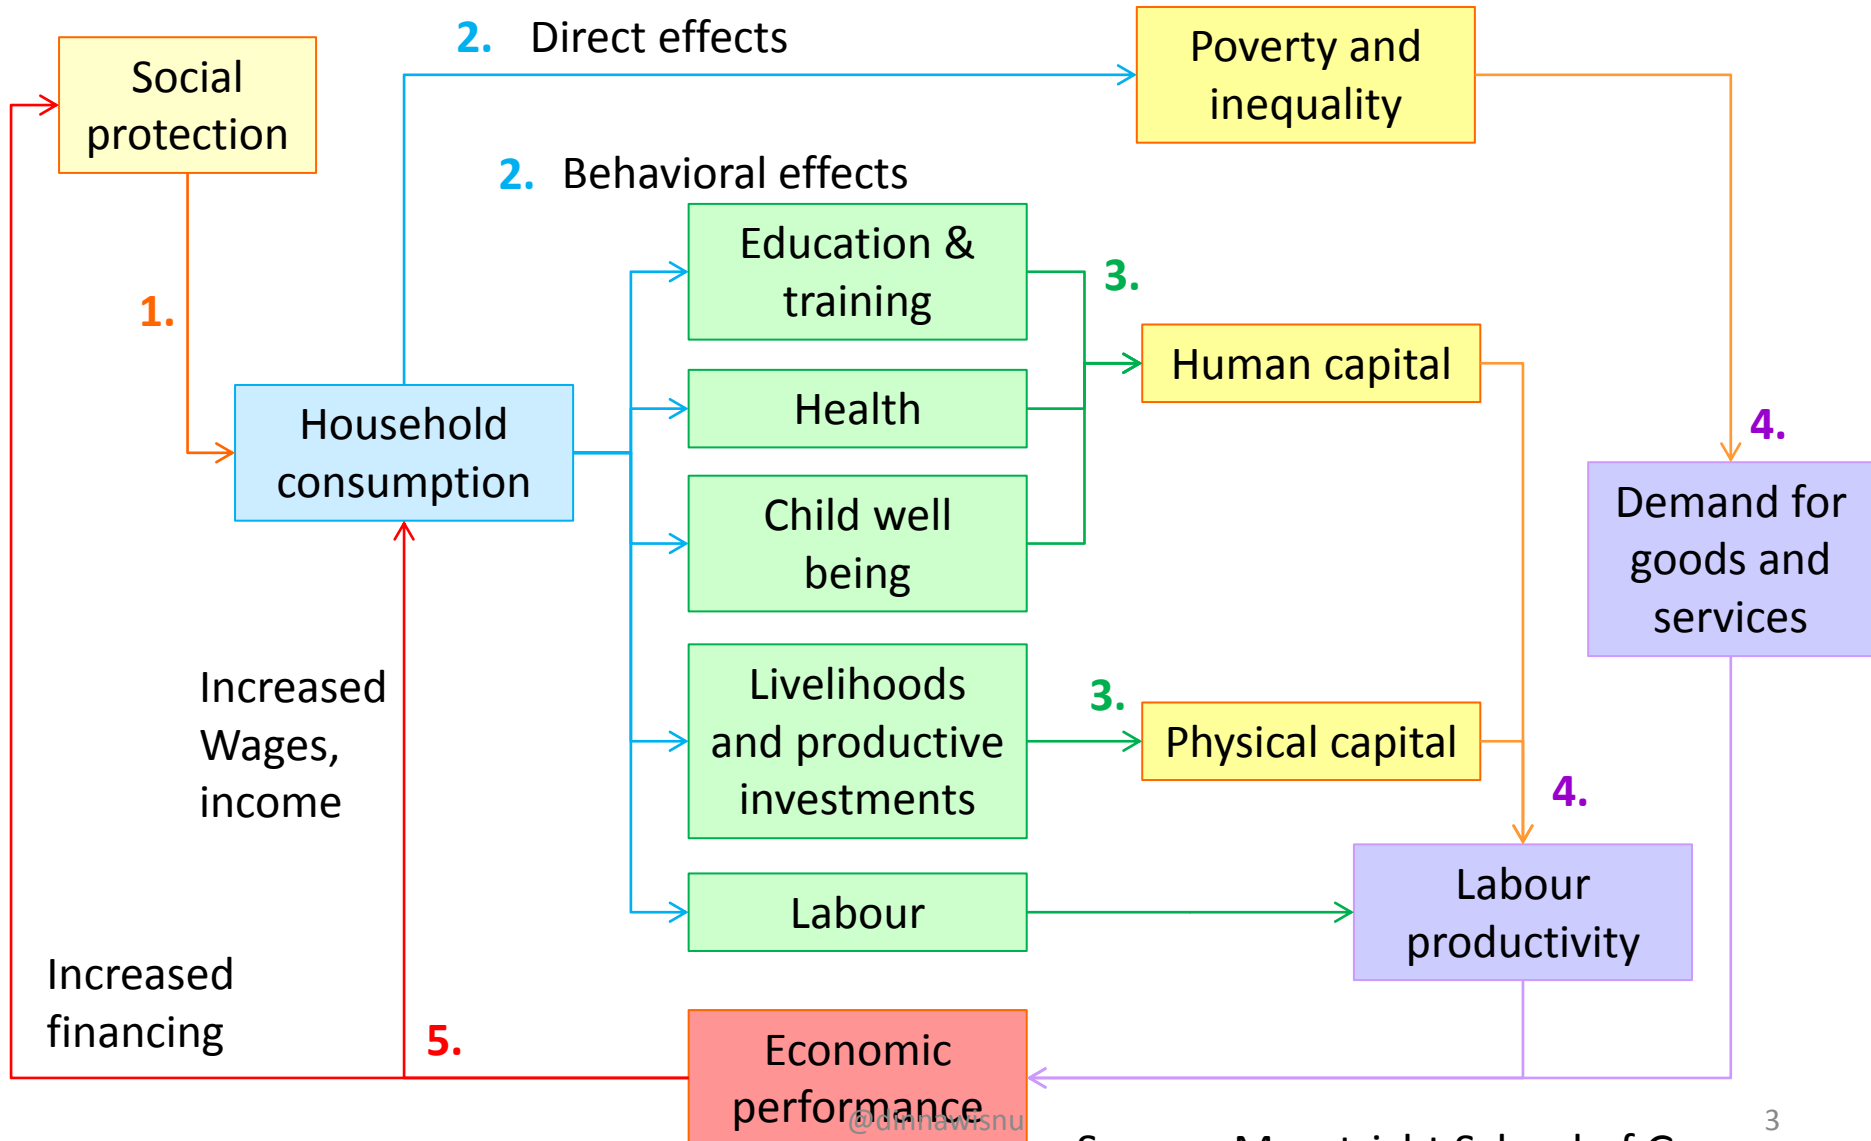

Solidarity with
Middle Class

Inclusive
Leadership
(with faces)

The SPF is an investment

- Let's Be Happy that the world have the Tools & platform for agreement on inclusive growth
- Let's Be Proud that Indonesia have Conducted the ABND
- Let's Be Grateful that Components of Integrative Approach for an Inclusive Social Protection & the calculations for the Floor are coming together

Dialogs, Meetings, Workshops (Retreat), Debates, Demonstrations
→ Everyone talks about it, aware of what's coming up

LET'S KEEP THE MOMENTUM

**for A Change Of Mind & Heart & Behavior...
Is “the” not-a-one-size-fits all, based on series of
dialogs in Indonesia....**

HARDWARE

- Facilities
- Who does what?
- Equipments
- Workable Institutions
- Policy
- Rules & Regulations
- Links between efforts
(hiring/recruitment
procedure, supervision,
mon-ev)
- Incentives
- Sanctions
- etc

SOFTWARE

- Awareness of needs
- Agreement on urgency &
TINA
- Quality People (education
relevant or experience
relevant)
- Numbers of quality people
- The “Culture” of People: habit,
mindset, bravery/leadership
- Sensitivity to needs
- Professionalism
- etc

Hence...most of the time it's **not about the numbers, nor fiscal space, or willingness to pay**

Those **numbers are simply tools to encourage change, to start dialogs & see the horizons**

There's the element of:

- Trust (for something far along the way)
- Being treated fairly
- Getting the necessary attention or acknowledgement
- Knowing that there'll be adjustments/evaluations

Managing trust despite policy gaps & implementation gaps

About the INFORMAL SECTOR

ILO definition:

- Private unincorporated enterprise (not separate identity or financial reporting with or from owners)
- Some goods/services produced, for sale, for barter
- Number of employment below certain (nationally-defined) threshold
- Not in agricultural activities (not second-degree either)

Where they are?

Their vulnerabilities?

Their willingness to pay?

Their ability to pay continuously; how if not?

→ They may need government support! It's now a public service, not state-owned enterprise
