submissions:

31 March 2021

Message from the Guest Editors

The objective of the Special Issue is—by analyzing the social, economic, and environmental outcomes and tradeoffs of policy choices in an integrated way—to break the sustainability deadlock, which is caused by the belief that economic growth and environmental sustainability are conflicting goals. By identifying potential winners and losers, policies need to be designed to maximize positive social, economic, and environmental outcomes while protecting and offering solutions to countries, industries, companies, workers, and communities which may be negatively impacted by the restructuring. It will thereby contribute to ensuring that the transition to a green economy is not only environmentally sound and economically viable, but also socially acceptable. We welcome qualitative and quantitative analysis that takes a holistic perspective covering all dimensions of sustainable development.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed by the [Science Citation Index Expanded](#) and [Social Sciences Citation Index](#) (Web of Science), as well as [Scopus](#) and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2019).
