Import research and development projects into campus

Import research and development projects into campus

Characteristics:

1. the college import research and development projects from small and medium-sized enterprises which fit the needs of teaching and learning.
2. students not only complete their theoretical study, but also develop comprehensive vocational competency and relevant work experience in this progress.
3. the college can make full use of available resources, expand professional field, and train high quality graduates. In the cooperation, potential of specialized teachers are stimulated and they obtain great research achievements.
4. from the cooperation, staff cost is reduced; developing cycle is shortened;
economic benefit is obtained and market competitiveness is enhanced.

Conclusion

Conclusion

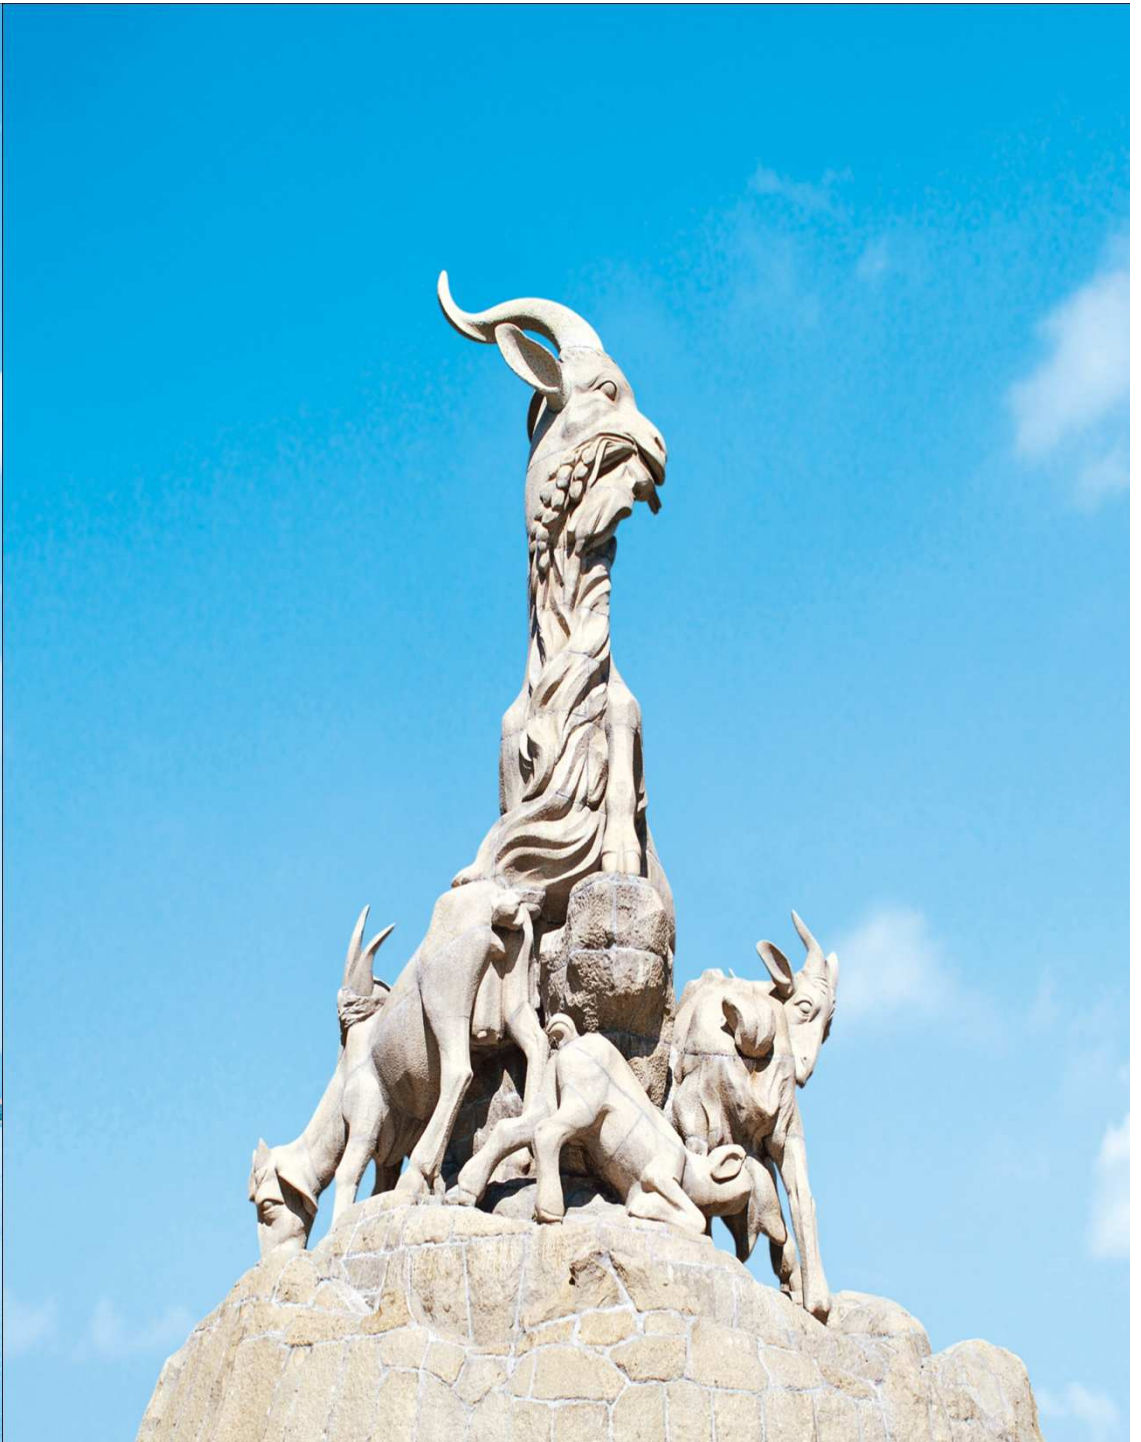

Ladies and gentlemen, at this moment, China government lacks of relevant laws and regulations in enterprise obligations in school and enterprise cooperation, our college carried out an authentic work environment and explored a new solid cooperation relationship.

In my opinion, the college-enterprise cooperation can make teaching and learning process keep up with producing process.

Welcome to Guangzhou !

Thank you for your attention!
