

WORK AND FAMILY

The ILO's objective is to deliver high-quality, sex-disaggregated research and information, identifying recent trends and effective policies to guide the content of national policies.

High-profile publications

Over the last decade, the ILO has released several high-profile publications on work and family. These high-profile publications include:

- Workplace solutions for childcare
- Reconciling work and family responsibilities. Practical ideas from global experience

Working papers and other informational leaflets

Over the years, the ILO has published [information sheets](#) and a series of national reports examining patterns and trends in issues, policies, and practices regarding reconciliation between paid work and unpaid family responsibilities in countries such as:

- Brazil,
- China,
- Japan,
- Republic of Korea,
- Thailand, and
- Trinidad and Tobago.

Other recent research efforts have focused on [unpaid care work issues](#) and the contribution of [childcare](#) to women's employment opportunities, with focus on parents working in the informal economy. These publications contain comparative studies, implementation practices and give a detailed picture of the realities concerning work and family reconciliation around the world.
