Consideration for Tools in the Pipeline

Social Protection Health

Shock Responsive SP

1.2 Progress on Tool Application

	ID		Payments
	SPPOT		CODI
	FSN		PWP

ISPA tools are public and free to use. There is no systematic mechanism to follow up on applications

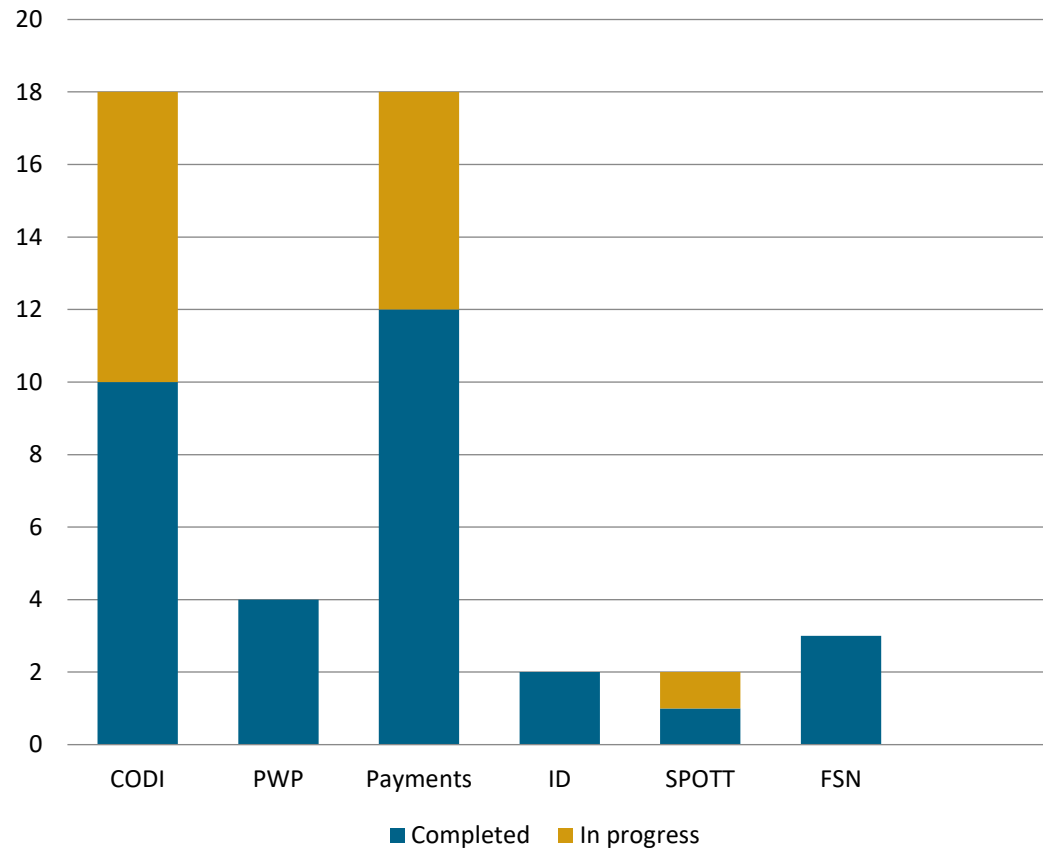

In Progress

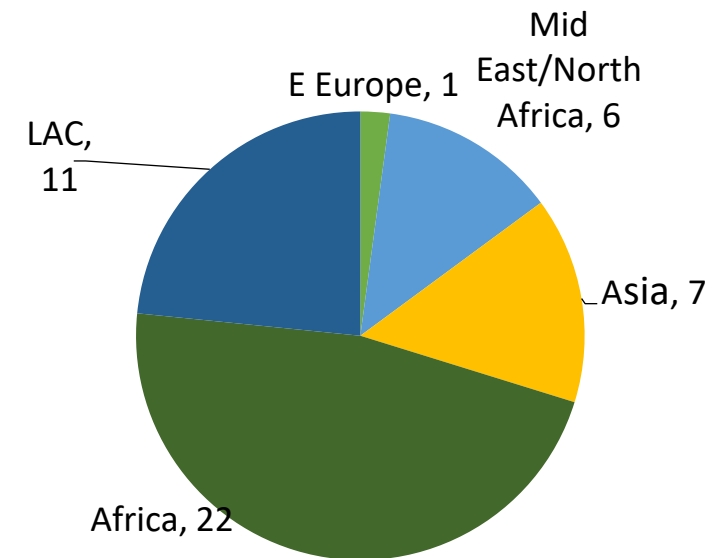

Completed

Frequency of Tool Application (n=47)

Regional Distribution of ISPA Applications

(ICT data, as of October 2019)

Other Uses

Reference material for

- Trainings
- Sector analytical work
- Development of other tools
- Desk reviews

1.4 ISPA Review and related discussion

- Great appreciation of technical quality and analytical depth
 - Very useful to facilitate policy dialogue processes and improve coordination
- Need to increase (inter-agency) usage, and accessibility of results

Tool revision and tool development

Make tools more user-friendly without losing the analytical depth:

- Provide better **guidance** on how tools can be used flexibly and adapted to needs and capacity
- **Re-organize the content** in layers/modules to avoid information-overload
- Using **technology**/automation to facilitate data collection and improve user experience

Shift focus from tool development to dissemination and application of tools. Add certain elements (gender, shock-responsiveness) into existing tools rather than developing new tools.

Tool curation (follow-up, application)

- Improve **communication** around the tools, emphasize their flexibility, the nature of the tools is often misunderstood
- Better **track, how tools are being used** and results that are being achieved
- To the extent possible, **make available information** generated by tool applications and improve the dissemination of this information

Improve take-up of tools

- Increasing user-friendliness will also increase take-up
- Step-up efforts to disseminate tools within each agency (agency-specific strategies are needed)
- Mobilize necessary resources to carry out agreed actions and support country applications
- Current explosion of interest in social protection and push for more Joint programmes offer good opportunities: UN Joint SDG Fund, UN COVID-19 Fund

1.5 ISPA Work Plan & Budget

Workplan 2020

1. Tool Development	2. Knowledge and Learning	3. Quality Assurance	4. Communication
• Complete SPPOT tool (ILO) • Carry out pilots for SAIS ON-GOING • Continue technical work on SACT tool (WBG) ON-GOING • Continue technical work on Financing tool and initiate piloting (ILO) ON-GOING • Initiate technical work on Gender and Disability mainstreaming (DFID/UNICEF/ILO) ON-GOING	<u>E-learning</u> • Develop e-learning content ON HOLD • Continue dissemination through socialprotection.org ON-GOING • Webinars series in socialprotection.org (need of active contribution from partner agencies) • Suggestion for an ISPA South South learning event (funding needed) <u>Face to face:</u> • Promote active dissemination within partner agencies.	<u>ISPA review</u> COMPLETED <u>Compliance with QA protocols</u> <u>HELP DESK SESSIONS</u> -Individual one-to-one sessions with country teams to provide guidance on tools application ON-GOING <u>Enhancement of CODI?</u>	• Draw more people to the site via collaboration with socialprotection.org ON-GOING • Systematic dissemination on social media • Newsletter

2. Any Other Business

Any other business

1. Collaborate with USP2030 and socialprotection.org for tool dissemination and take-up
2. Announcement regarding changes in the ISPA EG
3. Resource mobilization

Thank you!
