ABSTRACT

The 2001 Bulgaria Integrated Household Survey (BIHS01) is the third such data collection effort by Gallup/World Bank in Bulgaria. As the main objective of the survey was to provide comparable poverty figures with the previous studies, the questionnaire used is virtually identical to the one used in the previous surveys and when changes were introduced - particular attention was paid to maintain consistency with the previous questionnaires. As the main objective of the survey was to provide comparable poverty figures with the previous studies, the questionnaire used is virtually identical to the one used in the previous surveys and -when changes were introduced - particular attention was paid to maintain consistency with the previous questionnaires.

Sampling

Sampling Procedure

The 2001 Bulgaria Integrated Household Survey (BIHS01) was conducted by BBSS Gallup Int'l. under the supervision of the World Bank. The BIHS01 is the third such data collection effort by Gallup/World Bank in Bulgaria since 1995. The first BIHS was conducted in 1995 on a sample of approximately 2,500 households. The second round was conducted in 1997 on the 1995 sample. A total of approximately 2,000 were re-interviewed in 1997. Because of the expected excessive level of attrition due to the large time lag from the last survey and the massive internal and external migration since 1997, for the purpose of this survey it was decided to draw a new cross-section of households. Using the same stratified two-stage cluster design adopted in 1995, a similar nationally-representative sample was drawn by the National Statistical Institute (NSI) from the pre-census listing of the 2001 Population Census. In 2001, six households per cluster were provided by NSI to Gallup and the sixth household was used to replace households in the original sample in cases of refusal or absence. Each field substitution had to be verified by the team leader and approved by the field supervisor. A total of 2,500 households were finally interviewed. In addition, 133 Roma households were oversampled to allow more significant statistical comparisons of the group in some of the analyses.

Questionnaires

Overview

The questionnaire is contains 11 sections such as:

- Household Roster
- Migration
- Housing
- Education
- Food expenditure and consumption
- Employment
- Agriculture
- Remittances
- Ethnicity of main respondent
- State old age pension
- Health status
