

## Labour force survey (LFS14)

September 2006

This document sets out the information that is needed to access labour force survey (LFS14) data.

The files essential for accessing the data are provided in text format. This format was chosen to make the data usable with as many software packages as possible, and thus accessible to a wide range of people. Other files with relevant information are provided in Word 2000 format. If you do not have software appropriate for this format, please contact Stats SA and hard copies will be forwarded to you.

Other important information can be found in the:

Questionnaire  
Additional code lists (occupation, industry, district council, etc.)  
Relevant statistical release  
Record layouts  
Stats SA's website: [www.statssa.gov.za](http://www.statssa.gov.za)

### The data files

The files and the corresponding sections of the questionnaire are as follows:

**Person:** Data from flap and Section 1

**Worker:** Data from sections 2, 3, 4, 5 and 6

**Each section contains the following information for each variable:**

#### *Description of variables.*

**Descriptive name:** This is a short description of the variable with the variable name in brackets.

**Position of the variable:** The position of a variable within a record is recorded in the format (@xxx y). “@xxx” indicates that the variable starts at position (i.e. column) xxx, and “y” indicates the length of the field. All variables are numeric and right justified except for District Council (DC), which is character and thus left justified.

**Final code list:** The range of valid values for variables. For continuous variables it only reflects the upper and lower limits.

**Not applicable:** The code for not applicable is provided for each variable.

**Missing value:** The code for “missing”/“unspecified” values is given for each variable.

**Note to users:** Additional information for further clarity on questions.

### **Merging files:**

Each record contains a unique number (UqNr), which is a household identifier. For the individuals in a household, a further two digits that constitute the person number (PersonNr) exists which can be used together with the unique household identifier (UqNr) to merge the PERSON and the WORKER files.

## **METHODOLOGY**

### **1. Official and expanded unemployment rates**

Statistics South Africa (Stats SA) uses the following definition of unemployment as its *official* definition. The *unemployed* are those people within the *economically active population* who: (a) did not work during the seven days prior to the interview, (b) want to work and are available to start work within two weeks of the interview, and (c) have taken active steps to look for work or to start some form of self-employment in the four weeks prior to the interview. The *expanded definition of unemployment* excludes criterion (c).

The expanded definition therefore includes persons who said they were unemployed but had not taken active steps to find work in the four weeks prior to the interview (i.e. discouraged work-seekers).

### **2. Sample design**

Enumeration Areas (EAs) that had a household count of less than twenty-five were omitted from the census frame that was used to draw the sample of Primary Sample Units (PSUs) for the Master Sample. Other omissions from the Master Sample frame included all institution EAs except workers' hostels, convents and monasteries. EAs in the census database that were found to have less than sixty dwelling units during listing were pooled together.

The Master Sample is a multi-stage stratified sample. The overall sample size of PSUs was 3000. The explicit strata were the 53 (DCs). The 3 000 PSUs were allocated to these using the power allocation method. The PSUs were then sampled using probability proportional to size principles. The measure of size used was the number of households in a PSU based on census 2001.

The sampled PSUs were listed with the dwelling unit as the listing unit. From these listings systematic samples of dwelling units per PSU were drawn. These samples of dwelling units form clusters. The size of the clusters differs depending on the specific survey requirements. The LFS uses one of the clusters that contain ten (10) dwelling units.

### **3. Rotating panel methodology**

Statistics South Africa uses a rotating panel methodology for the labour force survey, to ultimately obtain a better picture of movements into and out of the labour market over time. The rotating panel methodology involves visiting the same dwelling units on a number of occasions (in this instance, five at most). After the panel is established, a proportion of the dwelling units is replaced each round (in this instance, 20%). New dwelling units are added to the sample to replace those that are taken out. The advantage of this type of design is that it provides the basis for monitoring changes in the work situation of members of the same households over time, while retaining the larger picture of the overall employment situation in the country. It also allows for both longitudinal and cross-sectional analysis.

### **4. Coverage**

The target population is all households, as well as residents in workers' hostels and convents/monasteries. The survey does not cover institutions such as old age homes, hospitals, prisons and military barracks.

### **5. Weighting the LFS of September 2006**

A two-stage weighting procedure was applied to the LFS

The PSU inclusion probability is given by

$$P_{PSU} = \frac{n_{PSU}}{N_{PSU}} . n_s ,$$

where  $n_{PSU}$  is the number of households constituting the selected PSU during census fieldwork,  $n_s$  is the number of PSUs per stratum, in this case the District Council (DC) and  $N_{PSU}$  is the number of households constituting the selected stratum during census fieldwork.

The household inclusion probability per PSU is given by

$$P_{HH} = \frac{n_{HH}}{H_{HH}},$$

where  $n_{HH}$  is the number of selected dwelling units per PSU,  $H_{HH}$  is the number of dwelling units in the PSU in question at a particular time different from the census time.

The non-response adjustment factor is given by  $\frac{1}{r_{HH}}$ , where  $r_{HH}$  is the response rate and is given by  $r_{HH} = \frac{n_{RESP}}{n_T}$  where  $n_{RESP}$  is the number of responding households and  $n_T$  is the total number of visited households (in the sampled dwelling units) per PSU. The design weights adjusted for non-response are now given by

$$W_{HH} = \frac{1}{P_{PSU} \cdot P_{HH} \cdot r_{HH}}$$

A SAS macro called CALMAR was used to benchmark  $W_{HH}$  to the population estimates. The mid-year population estimates were adjusted to give population estimates for September 2006 (when survey fieldwork took place).

## 6. Symbols used in the tables that follow

When a dash (-) is shown there were no respondents in the category.

When a single asterisk (\*) is shown in the table, the sample size was too small to give reliable estimates.

## 7. Estimation and use of standard error

Most surveys are designed so that the key statistics can precisely be estimated from the sample and the sampling error from those estimates can be computed from the survey itself. This implies that the sample surveys are large enough that the estimates satisfy the requirements of large-sample statistical theory developed for sample surveys. As described in section 5, *Weighting of the LFS*, a complex multi-stage sampling methodology is used to conduct the LFS. Sampling error is generally reported internationally by estimating the standard error (SE), which is a method which measures the extent to which an estimate might have varied by chance as a result of a sample being used instead of the using the whole population. The estimation of standard errors for all variables and indicators are very time consuming, thus the latter is generally compiled and reported only for certain key indicators at a national level. As a result please note that small subgroups with small sample sizes may show larger variance, therefore small subgroups should not be compared over time as it would not provide reliable estimates.

## 8. Questionnaire

Details about the questions included in the LFS questionnaire administered by field-staff are presented below. As indicated in Table A, the LFS questionnaire has six sections (excluding the Flap), each of which focuses on a particular area of relevance to labour market issues and associated concerns. In total, the questionnaire contains 98 questions.

**Table A: Contents of the LFS 14 questionnaire**

<b>Section</b>	<b>Number of questions</b>	<b>Details of each section</b>
<b>Cover page</b>		Household information, response details, field staff information, result codes, etc.
<b>Flap</b>	7	Demographic information (name, age, sex, population group.)/ particulars of each person in the household
<b>Section 1</b>	19	Biographical information (marital status, language, migration, education, training, literacy, etc.
<b>Section 2</b>	7	Activities related to work in the past seven days
<b>Section 3</b>	17	Unemployment and non-economic activities
<b>Section 4</b>	35	Main work activities in the past seven days
<b>Section 5</b>	8	Job creation and expanded public works programme activities in the past six months
<b>Section 6</b>	5	Agricultural activities, uncompensated activities in the past 12 months
<b>All sections</b>	<b>98</b>	Comprehensive coverage of all aspects of the labour market

## DATA FILE: PERSON

*Unique number (UqNr)* (@ 1 14.)

Unique household identifier

Users should be aware that Stats SA has introduced a new numbering system in the LFS13 (March 2006) dataset. This was deemed necessary since, if analysed in a particular way, the old numbering system did not preserve the confidentiality of individual records to the satisfaction of Stats SA.

As a result of the changes made, there is no link with some of the previous datasets.

**Note:** This is the unique household identifier, which can be used to link data from this file with data for the same household from other files.

*Person number (PersonNr)* (@15 2.)

Person (respondent) number within Household

Valid range: 01 – 27

**Note:** The two fields above (unique number and person number) can be used to link data from this file with data for the same individuals from other files.

*Primary sampling unit (PSU)* (@17 3.)

Valid range: 001 - 089

(See also Unique household identifier)

*Province (Prov)* (@20 1.)

South African provinces

Derived variable: Derived from the first digit of the Unique Number.

### Final code list

1 = Western Cape

2 = Eastern Cape

3 = Northern Cape

4 = Free State

5 = KwaZulu-Natal

6 = North West

7 = Gauteng

8 = Mpumalanga

9 = Limpopo

*District council/metro (DC)* (@21 14.)

In South Africa there are 53 district councils (DCs) which consist of forty-seven (47) non-metropolitan areas and six (6) metropolitan areas. Of the forty-seven (47) non-metropolitan areas, forty-two (42) of the DCs are confined to a single province (DC 11 and DC41 do not exist). In addition, there are five DCs, which are cross provincial boundaries (CBDC) and are coded CBDC1, CBDC2, CBDC3, CBDC4 and CBDC8. Although DC9 is not classified as CBDC it also crosses provincial boundaries.

Cross-boundary DCs and provinces affected:

Code	DC	Province
CBDC1	Kgalagadi	Northern Cape and North West
CBDC2	Metsweding	Gauteng and Mpumalanga
CBDC3	Sekhukhune cross-boundary	Limpopo and Mpumalanga
CDBC4	Eastern cross-boundary	Limpopo and Mpumalanga
CDBC8	West Rand cross-boundary	Gauteng and North West
DC9	Francis Baard	Northern Cape and North West

Metropolitan Areas (Metro):

Metropolitan areas are conurbations featuring high population density; intense movement of people, goods and services; extensive development; and multiple business districts and industrial areas. There are six metros and are as follows:

- Cape Town - City of Cape Town
- Durban – Ethekewini municipality
- East Rand – Ekurhuleni Metropolitan municipality
- Johannesburg - City of Johannesburg Metropolitan municipality
- Port Elizabeth - Nelson Mandela
- Pretoria – City of Tshwane Metropolitan municipality

Cross-boundary Metro and provinces affected:

Code	DC	Province
Pretoria	City of Tshwane Metropolitan Municipality	Gauteng and North West

Spatial data for these district councils/metro boundaries are available on request.

## FLAP

*Stayed nights (B\_4Night)*

(@35 1.)

<b>B.1</b>	<p><b>Has ..... stayed here for at least four nights on average per week during the last four weeks?</b></p> <p>1 = Yes</p> <p>2 = No</p> <p style="text-align: right;"><b>→ End of questions for this person</b></p>
------------	---

### Note to users

This question is asked for each person found in the selected dwelling. Those who are not household members (those who haven't spent at least four nights per week) would be eliminated on the second category (2 = No). The instruction in this question is to end the interview for those who have answered "No" to this question. It is through this question where household members are identified within the selected dwelling.

### Universe

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

### Final code list

1 = Yes

*Stayed in March (B\_Mar06)*

(@36 1.)

<b>B.2</b>	<p><b>Was ... part of this household in March 2006?</b></p> <p>1 = Yes</p> <p>2 = No</p>
------------	--

### Note to users

This question is asked for each person found in the selected dwelling. It seeks to find out if the household members who are present in the household during the survey (September 2006) were also present during the survey conducted in March 2006. It is through this question that permanent household members are identified within the selected dwelling.

### Universe

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

### Final code list

1 = Yes

2 = No

9 = Unspecified

*Gender (Gender)*

(@37 1.)

<b>C</b>	<b>Is ..... a male or a female?</b> 1 = Male 2 = Female
----------	---

### Note to users

This question is asked for all household members, to determine their gender. The enumerators are instructed not to assume the gender of households members by just looking at people's names or physical appearances. In this instance they have to ask the respondent the gender of each member of the household without any assumptions.

### Universe

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

### Final code list

1 = Male

2 = Female

9 = Unspecified

*Age (Age)*

(@38 3.)

<b>D</b>	<b>How old is .....? (In completed years - In figures only)</b> Less than 1 year = 00.
----------	---

### Note to users

This question is asked to find out the age of the household members. This is asked for each member of the household. The instruction is to write the age in completed years to the nearest whole numbers and not in words. Thus if a person is two years and six months, the instruction is to write the two completed years. For children aged less than a year, the instruction is to write 00.

Mid-year population estimates are produced by five-year age groups. These estimates are applied during the benchmark process. Skewness in estimates might result when estimating age in 1-year groups as a result of the latter reason.

### Universe

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

**Final code list**

Less than 1 year = 0  
Valid range: 000 – 129  
Unspecified: 999

*Age group (Agegrp)*

(@41 2.)

**Derived from Age**

**Final code list**

- 01 = 00 - 04 years
- 02 = 05 - 09 years
- 03 = 10 - 14 years
- 04 = 15 - 19 years
- 05 = 20 - 24 years
- 06 = 25 - 29 years
- 07 = 30 - 34 years
- 08 = 35 - 39 years
- 09 = 40 - 44 years
- 10 = 45 - 49 years
- 11 = 50 - 54 years
- 12 = 55 - 59 years
- 13 = 60 - 64 years
- 14 = 65 - 69 years
- 15 = 70 - 74 years
- 16 = 75 - 79 years
- 17 = 80 - 84 years
- 18 = 85 +
- 99 = Unspecified

*Population group (Popgrp)*

(@43 1.)

E	What population group does ..... belong to?
	1 = African/Black
	2 = Coloured
	3 = Indian/Asian
	4 = White
	5 = Other

**Note to users**

This question is asked to determine the population group of persons from the selected dwelling. The respondent must answer for each member and the enumerator shouldn't make any assumptions. The enumerator is also instructed not to make any conclusions, which may be influenced by his observation or using people's names during the interview. This question may seem very sensitive to some respondents especially in this post apartheid era, but it is important to find out the composition of the South African population.

**Universe**

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

**Final code list**

- 1 = African/Black
- 2 = Coloured
- 3 = Indian/Asian
- 4 = White
- 9 = Other and unspecified

**SECTION 1**

*Marital status (Q11aMari)*

(@44 1.)

<b>1.1.a</b>	<p><b>What is .....’s present marital status?</b></p> <ul style="list-style-type: none"> <li>1 = Married</li> <li>2 = Living together like husband and wife</li> <li>3 = Widow/Widower</li> <li>4 = Divorced or Separated</li> <li>5 = Never married</li> </ul>
--------------	---

} → *Go to Q 1.2*

**Note to users**

This question is about the marital status of the members of the household. There are different kinds of marriages in South Africa, even if a couple is living together as husband and wife they are regarded to be married. Both modern and traditional marriages are considered in this question.

If the response is widow/widower, divorced or separated and never married the enumerator is instructed to go to (Q 1.2), which is on language most often spoken at home.

**Universe**

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

**Final code list**

- 1 = Married
- 2 = Living together like husband and wife
- 3 = Widow/Widower
- 4 = Divorce or Separated
- 5 = Never married
- 9 = Unspecified

*Spouse/partner (Q11bSpou)*

(@45 1.)

<b>1.1.b</b>	<p><b>Does .....’s spouse/partner live in this household?</b></p> <ul style="list-style-type: none"> <li>1 = Yes</li> <li>2 = No</li> </ul>
--------------	---

→ *Go to Q 1.2*

**Note to users**

This question is only applicable for those people who answered “Yes” in (Q 1.1.a), thus “Married” or “Living together as husband and wife”. It is through this question that it will be seen on average, in how many households partners live together.

**Universe**

Only those people who are married or living together as husband and wife.

**Final code list**

- 1 = Yes
- 2 = No
- 8 = Not applicable
- 9 = Unspecified

*Spouse number (Q11cPsnN)*

(@46 2.)

<b>1.1.c</b>	If 1.1.b = 1 <b>Which person is the spouse/partner of .....?</b> Give person number
--------------	---

**Note to users**

This question is only applicable for those people who answered “Yes” in (Q 1.1.a), thus “Married” or “Living together as husband and wife” and “Yes” in (Q1.1.b). It confirms the information on the previous question, which seeks to determine whether couples within the visited household live together or not.

**Universe**

Only applicable to those live-in partners within the selected dwelling unit.

**Final code list**

- Valid range: 01 – 10
- Not applicable: 88
- Unspecified: 99

*Language (Q12HLang)*

(@48 2.)

<b>1.2</b>	<b>Which language does ..... speak most often at home?</b> 01 = Afrikaans 02 = English 03 = Isindebele/ South Ndebele/ North Ndebele 04 = Isixhosa/ Xhosa 05 = Isizulu/ Zulu 06 = Sepedi/ Northern Sotho 07 = Sesotho/ Southern Sotho/ Sotho 08 = Setswana/ Tswana 09 = Siswati/ Swazi 10 = Tshivenda/ Venda 11 = Xitsonga/ Tsonga 12 = Other, specify
------------	--

**Note to users**

This question seeks to determine which language members of the household speak most often at home. South Africa has eleven official languages.

**Universe**

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

**Final code list**

- 01 = Afrikaans

- 02 = English
- 03 = Isindebele / South Ndebele / North Ndebele
- 04 = Isixhosa / Xhosa
- 05 = Isizulu / Zulu
- 06 = Sepedi / Northern Sotho

--------------	---

**Note to users**

This question is applicable to all household members. The enumerators are instructed that it is only those qualifications already obtained which must be entered. That means the current level, that a person is still busy with is not applicable. It is very important to complete each record even if the person has not attended school. The enumerators are instructed to record diploma and certificates that are of at least six months duration.

**Universe**

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

**Final code list**

--------------	---

**Note for users**

This question applies to the people who have diploma, certificate, degree or postgraduate qualifications (Codes 17 – 24 in (Q1.3.a)). The interest in this question is in establishing the field of study in which the qualifications have been obtained.

**Universe**

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview with diploma, certificate, degree or post-graduate degree/diploma to the interview.

**Final code list**

------------	---

**Note for users**

This question seeks to establish how many people have vocational training because of the increased recognition of the importance of this sort of training. Vocational training can help people earn a living either by getting a (better) paying job or by starting their own businesses. The instruction to the interviewer is to go to (Q1.7.a) if the answer to this question is “No” or “Don’t know”.

Unique household identifier

Users should be aware that Stats SA has introduced a new numbering system in the LFS13 (March 2006) dataset. This was deemed necessary since, if analysed in a particular way, the old numbering system did not preserve the confidentiality of individual records to the satisfaction of Stats SA.

As a result of the changes made, there is no link with some of the previous datasets.

**Note:**

This is the unique household identifier, which can be used to link data from this file with data on the same households from other files.

*Person number (PersonNr)* (@15 2.)  
 Person (respondent) number  
 Valid range: 01 – 22

**Note:** The two fields above (unique number and person number) can be used to link data from this file with data for the same individuals from other files.

*District council/metro (DC)* (@21 14.)

In South Africa there are 53 district councils (DCs) which consist of forty-seven (47) non-metropolitan areas and six (6) metropolitan areas. Of the forty-seven (47) non-metropolitan areas, forty-two (42) of the DCs are confined to a single province (DC 11 and DC41 do not exist). In addition, there are five DCs, which are cross provincial boundaries (CBDC) and are coded CBDC1, CBDC2, CBDC3, CBDC4 and CBDC8. Although DC9 is not classified as CBDC it also crosses provincial boundaries.

Cross-boundary DCs and provinces affected:

Code	DC	Province
CBDC1	Kgalagadi	Northern Cape and North West
CBDC2	Metsweding	Gauteng and Mpumalanga
CBDC3	Sekhukhune cross-boundary	Limpopo and Mpumalanga
CBDC4	Eastern cross-boundary	Limpopo and Mpumalanga
CBDC8	West Rand cross-boundary	Gauteng and North West
DC9	Francis Baard	Northern Cape and North West

## Metropolitan Areas (Metro):

Metropolitan areas are conurbations featuring high population density; intense movement of people, goods and services; extensive development; and multiple business districts and industrial areas. There are six metros, as follows:

- Cape Town - City of Cape Town
- Durban – Ethekewini municipality
- East Rand – Ekurhuleni Metropolitan municipality
- Johannesburg - City of Johannesburg Metropolitan municipality
- Port Elizabeth - Nelson Mandela
- Pretoria – City of Tshwane Metropolitan municipality

## Cross-boundary Metro and provinces affected:

Code	DC	Province
Pretoria	City of Tshwane Metropolitan Municipality	Gauteng and North West

Spatial data for these district councils/metro boundaries are available on request.

## Gender (Gender)

(@35 1.)

C	Is ..... a male or a female?
	1 = Male
	2 = Female

## Note to users

This question is asked for all household members, to determine their gender. The enumerators are instructed not to assume the gender of the members of the households by just looking at people's names or physical appearances. In this instance they have to ask the respondent the gender of each member of the household without any assumptions.

D	How old is.....? (In completed years - In figures only)
---	---

## Note to users

This question is asked to find out the age of the household members. This is asked for each member of the household. The instruction is to write the years in whole numbers and not in words.

Mid-year population estimates are produced by five-year age groups. These estimates are applied during the benchmark process. Skewness in estimates might result when estimating age in 1-year groups as a result of the latter reason.

**Note to users**

This question is asked to determine the population group of persons from the selected dwelling. The respondent must answer for each member without any assumptions. In this instance the enumerator is also instructed not to make any conclusions, which may be influenced by his observation or using people’s names during the interview. This question may seem very sensitive to some respondents especially in this post apartheid era, but it is really important to find out the composition of the South African population.

## Note to users

This question is applicable to all household members aged 15 years and above, regarding their involvement in the economic activities in the seven days prior to the interview. This is part of the questionnaire where there would be a differentiation between economically active population and those who are not economically active. The instruction to the enumerators is that they should consider those activities that lasted for an hour within the seven days. In order to be certain that the categories have been answered there should either be “Yes” or “No” in all of them. Most importantly, is that if there is “Yes” to any part of this question there should be skip to Section 4. If all the categories are “No” there should be a continuation to the next question.

<b>2.2</b>	If "NO" to all parts of Question 2.1 <b>Even though ..... did not do any of these activities in the last seven days, does he/she have a job, business, or other economic or farming activity that he/she will definitely return to?</b> <i>For agricultural activities, the off-season in agriculture is not a temporary absence.</i> 1 = Yes 2 = NO <p style="text-align: right;">→ <b>Go to Section 3</b></p>
------------	--

#### Note to users

This is only applicable to household members who answered "No" to all the categories in (Q 2.1). The main intention of this question is to qualify whether people have not done anything in the last seven days as it has been reflected in the previous question. The enumerators are instructed that for agricultural activities, any off-season in that field, people are considered to be active in their current jobs, and therefore economically active. For "No" response there should be a skip to Section 3.

#### Universe

All members of the households in selected dwelling units aged 15 years and older who were not involved in economic activities in the seven days prior to the interview.

------------	--

**Note to users**

This is applicable to all person’s unemployed or not economically active regardless of whether a person has worked before or not. The interest in this question is to find out how people support themselves even though they are not working. The enumerator is instructed to ask all the given categories. There should either be a “Yes” or a “No” for each category. For any other reason that is not categorised the enumerator has to complete the information in the provided space. If the answer is code “1 = Did odd jobs during the past seven days” where a person “did odd jobs during the seven days prior to the interview” the instruction is to go back to (Q2.1).

(@97 3.)

4.2.a	<p><b>What is the name of ..... 's place of work?</b></p> <p><i>For government or large organisations, give the name of the establishment and branch or division: e.g. Education Dept – Rapele Primary School; ABC Gold Mining, Maintenance Div.</i></p> <p><i>Write 'Own house' or 'No fixed location', if relevant.</i></p>
4.2.b	<p><b>What are the main goods and services produced at ..... 's place of work? What are its main functions?</b></p> <p><i>Examples: Repairing cars, Selling commercial real estate, Sell food wholesale to restaurants, Retail-clothing shop, Manufacture electrical appliances, Bar/ restaurant, Primary Education, Delivering newspapers to homes.</i></p>

### Note to users

This question is applicable to household members who have been performing certain economic activities in the seven days prior to the interview. It is important that the service or main goods are in English as the industry codes are only in this language. Although a person may have certain roles and responsibilities within the company she/he is working with, the enumerator is instructed to record the main goods or services produced by the company.

Questions (4.2.a) and (4.2.b) were written-in. The responses to these two questions were used to determine the industry. The industry was coded to three digits on the basis of the International Standard Industrial Classification of all Economic Activities (ISIC) 1993 (see elsewhere in documentation for codes).

### Universe

All members of the households in selected dwelling units aged 15 years and above who were economically active in the seven days prior to the interview.

*Official unemployment definition (Status1)*

(@225 1.)

Derived variable:

Derived from a logical series of questions:

- Work activities (Question 2.1)
- Temporary absence (Question 2.2)
- Reasons for not working (Question 3.1)
- Acceptance of job (Question 3.5)
- How soon to start work (Question 3.6)
- Work seeking action (Question 3.7)

**Note to users**

According to the official unemployment definition, a person must satisfy the following three conditions:  
The person did not work during the seven days prior to the survey interview, and does not have any job attachment;  
Wants to work and is available to start work within 2 weeks;  
Has taken active steps to look for work or to start own business in the 4 weeks prior to the interview.
