VERSION DESCRIPTION

Version 01

Overview

ABSTRACT

The Gambia's first Labour Force Survey was conducted in 1992. This was a localized study covering areas just around the capital Banjul. Other related issues were also covered as modules in some surveys and the country's Population and Housing Censuses. The Gambia Labour Force Survey 2012 (GLFS 2012), is the first nationally representative Labour Force Survey. This is relatively more comprehensive in coverage and also follows ILO guidelines. The main objective of the Rural Labour Force Survey was to provide primary data to inform stakeholders on the Impact of Macroeconomic and Social Policies on Employment and Poverty Reduction in The Gambia. The principal objective of the country's medium-term development agenda (Program for Accelerated Growth and Employment (PAGE)) also articulates the need to improve human resource potential of the country by: improving Employment levels; Per Capita Income; Human Development and Gender Equity. It is hoped that progress in these issues would also improve the Country's Competitiveness and development prospects. Due to the scanty labour market information, coupled with the forthcoming establishment of the Labour Market Information System, this study was commissioned to address the increasing demand for labour

statistics both locally and internationally. Findings from this study would enable policymakers to plan, measure, monitor and evaluate labour market, PAGE, Vision 2020 and international targets such as the MDGs.

NB: This version of the study includes ILO standardized variables. The ILO Department of STATISTICS has developed a comprehensive framework for processing labour force survey microdatasets. Up to 34 standardized derived variables are generated from existing labour force survey microdatasets to allow for the production of internationally comparable labour market indicators.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

- Households

- Individuals

Scope

NOTES

The scope of this study is including:

- Education
- Finance
- Trade
- Agriculture
- Employment

- Unemployment

- Gender

KEYWORDS

Dissemination, Internal migrants

Coverage

GEOGRAPHIC COVERAGE

National

UNIVERSE

The Labour Force Survey used the 2003 Population and Housing Census list of Enumeration Areas (EAs) as its sampling frame. EA maps prepared by the GIS/Cartography Section of GBoS guided the interviewers in tracing the EA boundaries.

Sampling

Sampling Procedure

The population of interest, indicators and sample size were determined. A two-stage stratified random sampling design was used to arrive at the required sample size. In the first stage the EAs were selected by probability proportional to size. Systematic sampling was used in the second stage, where 20 households were selected by circular systematic sampling procedure in each EA. For the whole country, including all LGAs, Urban and Rural areas, out of 225 EAs, 4500 households were selected which translated to an estimated 40,026 individuals who were covered.

Deviations from Sample Design

The sample design shows that 6 of the 8 LGAs were over sampled. This implies that the design was not self weighting. This could have been caused by sampling and non-sample errors or structural changes in the population. Therefore in presenting the results of the survey there was the need to compensate for sampling errors by applying sampling weights to the results.

Response Rate

Out of 4500 households sampled 4,372 households were completely interviewed accounting for 97.2 percent response rate. The overall household response rate was 98.7 percent. One major source of non-sampling error is non-response. Non-response is caused by the absence of household members in the sample households, total refusal to answer any of the questions and sometimes when the interviewee is incapable to answer etc.

Weighting

Tables or data can be weighted by multiplying the sample data with a normalized sample weight to compensate for the oversampling. Two types of sample weights are used in this report: the normalized sample weight for household (named HHWEIGHT in the household data set) and the normalized sample weight for eligible persons 5 years and over (named ELIGIBLES in the household listing data set).

Questionnaires

Overview

Following the adaption of the questionnaire, survey field personnel were recruited and trained for three days. The questionnaire design took more time than anticipated due to the need to ensure that variables required for the computation of indicators were incorporated in the questionnaire.

Data Collection

Data Collection Dates

Start	End	Cycle
2012	2012	N/A

Time Periods

2012-04-21	2012-05-20	N/A

Data Collection Mode

Face-to-face [f2f]

Questionnaires

Following the adaption of the questionnaire, survey field personnel were recruited and trained for three days. The questionnaire design took more time than anticipated due to the need to ensure that variables required for the computation of indicators were incorporated in the questionnaire.

Data Processing

Data Editing

The Supervisors of the fieldwork were responsible for the day to day operations of the teams which include identifying EAs and overseeing enumeration as well as field editing. The survey coordinators were responsible for recruitment of survey personnel, supervised the fieldwork and made frequent visits to all teams during the fieldwork.

Other Processing

The data processing was carried out mainly in two stages:

- The first stage of the data processing dealt with the cleaning and editing of data files. This basically involves the following activities: main data entry, verification, structural checks, editing, etc. Imputations were minimal.

- The other phase of data processing was to produce analysis data files and to create the tables. Secondary data processing involved the following steps: merging data files create SPSS data sets, generation of tables, computation of sampling weights and wealth indices, etc.

****Labour Force Survey Microdata Pre-processing:

The process of deriving ILO standardized variables has been applied to the National Labour Force Surveys downloaded from the Microdata Repository. If the microdata set provides all the information required, it can be created up to 34 key variables. To know that these variables have been processed and that they are now in a standardized format that is comparable across microdata, they are called "ilo_XXX". Each key variable has a different name (XXX). All these variables are added at the end of the original microdataset (version 1: 3-dgt ISO_Survey_Year_v01_M_v01_A_ILOVAR_ILO).

Recode note: International classifications based on ISCED, ISIC and ISCO are using, (at certain levels of disaggregation) letters instead of numbers. These letters have been replaced by numbers to keep numerical characters as values. Nevertheless, labels and categories' boundaries are following international standard classifications.

****Important notes on the dataset

Multiple job holders (ilo_mjh)

For technical reasons, all individuals that are considered as employed by variable "ilo_lfs" and had a missing value for C1 were forced into the category "one job only".

Time-related underemployment (ilo_joball_tru)

Given that there is no question on availability, the question asking how many additional hours the person could have worked is taken as a proxy, by considering a person as being available if the value of the latter is not a missing value.

Education (ilo_edu)

The important share of individuals falling into the category "UNK - Level not stated" is explained by the fact that the original question is only being asked to individuals aged 5+

Occupation (ilo_job1_ocu)

According to national report, ISCO-08 being used, but given that some additional categories seem to be considered by the LFS, on the two-digit level, not all values will have a value label.

Institutional sector of economic activities (ilo_ins_sector)

Question on institutional sector not being asked to self-employed, and therefore variable can't be defined.

Disability status (ilo_dsb_details)

Questionnaire asks whether the person has any of the following disabilities: blindness, partial sightedness, deafness and dumbness, deafness, hearing difficulties, dumbness, mental illness, intellectual disability, is mute, speech impairment, physical disability, mental retardation, autism

Data Appraisal

Other forms of Data Appraisal

It is useful to have an idea of the quality of the survey data. Demographic analysis mostly in the form of graphical analysis of age-sex distribution and sex ratio analysis was used in the assessment of the LFS-2012 data. These methods are particularly useful in evaluating coverage errors through the use of data on age cohorts. Comparisons were also made with The Gambia's MICS IV conducted in 2010 and The Gambia's 2003 Population and Housing Census raw age-sex data. Raw data was used in this assessment in order to avoid distortions that could result from weighted data.

V70	A1D	A1D APPRENTICE	discrete	numeric	
V71	A1DA	A1DA APPRENTICE ACTIVITIES	discrete	numeric	
V72	A1DB	A1DB APPRENTICE ACTIVITIES	discrete	numeric	
V73	A1DC	A1DC APPRENTICE ACTIVITIES	discrete	numeric	
V74	A2	A2 In the last week, did you work on your household's farm	discrete	numeric	
V75	A3	A3 Was this work done on your land or that of another househ	discrete	numeric	
V76	A4	A4 Use of product	discrete	numeric	
V77	CHKA1	CHKA1 MAIN JOB	discrete	numeric	
V78	A5	A5 Did you have a job to which you will definitely return	discrete	numeric	
V79	A6	A6 Reason for being absent from work	discrete	numeric	
V80	B1_GBOS	B1 Kind of main job/activity usually done last week - GBOS	contin	numeric	
V81	B1_ILO	B1 Kind of main job/activity usually done last week - ILO	contin	numeric	
V82	B2	B2 What are your main task or duties	contin	numeric	
V83	B3	B3 Industry	contin	numeric	
V84	B4A	B4A Goods or services produced	contin	numeric	
V85	B5	B5 In this job/activity were you	discrete	numeric	
V86	B6	B6 Was your employment agreement	discrete	numeric	
V87	B7	B7 Duration of contract/agreement	discrete	numeric	
V88	B8	B8 Was your position	discrete	numeric	
V89	B9M	B9M Duration of contract (Month)	contin	numeric	
V90	B9Y	B9Y Duration of contract (Year)	contin	numeric	
V91	B10	B10 Does your employer pay contributions to social security	discrete	numeric	
V92	B11	B11 Do you get paid annual leave or payment for leave not ta	discrete	numeric	
V93	B12A	B12A Would you get paid sick leave in case of illness or in	discrete	numeric	
V94	B12B	B12B Would you get maternity or paternity leave	discrete	numeric	
V95	B13	B13 do you get medical benefits from your employer	discrete	numeric	
V96	B14	B14 Does your employer deduct income tax from your salary or	discrete	numeric	
V97	B16	B16 Do you work in a	discrete	numeric	
V98	CHKB1	CHKB1	discrete	numeric	
V99	B17	B17 Type of ownership	discrete	numeric	
V100	B18A	B18A Is business registered for VAT	discrete	numeric	
V101	B18B	B18B Is Business registered for Income tax	discrete	numeric	
V102	B19	B19 Does business keep complete records (assets and accounts	discrete	numeric	
V103	B19B	B19B On this job are you a member of a trade union or employ	discrete	numeric	
V104	B19BB	B19BB - Trade union	discrete	numeric	
V105	B19CC	B19CC- Employers organisation	discrete	numeric	

ID	Name	Label	Type	Format	Question
V106	B20	B20 How many person, including your self work at your place	contin	numeric	
V107	B22	B22 Where is your usual place of work located	discrete	numeric

Sample weight (ilo_wgt)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Continuous
 Format: numeric
 Width: 9
 Decimals: 0
 Range: 0.461758583784103-619.534790039062

Valid cases: 0
 Invalid: 0

Description

The variable "ilo_wgt" is used to give a certain weight to each observation in the sample in order for the sample to represent the overall population covered. It should stay at the unit level.

Time (Gregorian Calendar) (ilo_time)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 9	
Decimals: 0	
Range: 1-1	

Description

The variable "ilo_time" corresponds to the Gregorian calendar. It can take 3 forms: annual (2016); quarterly (2016Q1) or monthly (2016M1).

Geographical coverage (ilo_geo)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 9	
Decimals: 0	
Range: 1-2	

Description

We follow the national definition of geographical areas and therefore the national boundary between urban and rural areas.

Sex (ilo_sex)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 10	
Decimals: 0	
Range: 1-2	

Description

We follow directly what is in the microdata. However, to make sure that it is following the same standard across countries, we might have to recode 1 for male and 2 for female (some countries are using the opposite classification). This is why a specific ILO variable is created for sex.

Age (5-year age bands) (ilo_age_5yrbands)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 9	
Decimals: 0	
Range: 1-14	

Description

This variable is divided in 3 sub-categories depending on the level of aggregates we are looking for. "ilo_age_5yrbands" divides the population into 5 years age-band until 64 and then a category includes everyone above 65. "ilo_age_10yrbands" divides the population into 10 years age-band until 64 and then a category includes everyone above 65. "ilo_age_aggregate" only takes 5 categories: children (<15); youth (15-24); adults (25-54) and 2 categories for the older population: 55-64 and 65+.

Age (10-year age bands) (ilo_age_10yrbands)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete
 Format: numeric
 Width: 9

Education (ISCED 97) (ilo_edu_isced97)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete
 Format: numeric
 Width: 98
 Decimals: 0
 Range: 1-9

Valid cases: 0
 Invalid: 0

Description

We map the highest level of education of the respondent with ISCED 11. However some microdatasets are still using a link to ISCED 97 (second best option). If a mapping with ISCED is not possible but we can create aggregated groups, we will then create "ilo_edu_aggregate" (third best option). Finally a separate variable is created regarding attendance to education of the respondent.

Disability status (Aggregate) (ilo_dsb_aggregate)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete
Format: numeric
Width: 26
Decimals: 0
Range: 1-2

Valid cases: 0
Invalid: 0

Description

Following the Washington group recommendation, at least 4 core questions (difficulties in seeing, hearing, walking and remembering) are asked to all the respondents with details as defined: "No - no difficulty", "Yes - some difficulty", "Yes - a lot of difficulty" or "Cannot do at all". A person will be considered disabled if he/she is answering at least once to the 3rd (Yes - a lot of difficulty) or the 4th (Cannot do at all) category.

Working age population (ilo_wap)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete
Format: numeric
Width: 22
Decimals: 0
Range: 0-1

Valid cases: 0
Invalid: 0

Description

The first 8 standardized ILO variables are covering the entire population in the sample. As from ilo_wap, we are only covering the International Working-Age Population, i.e. persons aged 15 and above.

Labour Force Status (ilo_lfs)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete
 Format: numeric
 Width: 20
 Decimals: 0
 Range: 1-3

Valid cases: 0
 Invalid: 0

Description

We follow the "Resolution concerning "Resolution concerning statistics of work, employment and labour underutilization" adopted by the 19th International Conference of Labour Statisticians (October 2013).

Persons may be classified in a short reference period (seven days/one week), according to their labour force status as being:

(a) In employment: Persons in employment are defined as all those of working age who, during a short reference period, were engaged in any activity to produce goods or provide services for pay or profit. They comprise: (a) employed persons "at work", i.e. who worked in a job for at least one hour; (b) employed persons "not at work" due to temporary absence from a job, or to working-time arrangements (such as shift work, flexitime and compensatory leave for overtime).

(b) In unemployment: Persons in unemployment are defined as all those of working age who were not in employment, carried out activities to seek employment during a specified recent period and were currently available to take up employment given a job opportunity, where: (a) "not in employment" is assessed with respect to the short reference period for the measurement of employment; (b) to "seek employment" refers to any activity when carried out, during a specified recent period comprising the last four weeks or one month, for the purpose of finding a job or setting up a business or agricultural undertaking. This includes also part-time, informal, temporary, seasonal or casual employment, within the national territory or abroad; (c) the point when the enterprise starts to exist should be used to distinguish between search activities aimed at setting up a business and the work activity itself, as evidenced by the enterprise's registration to operate or by when financial resources become available, the necessary infrastructure or materials are in place or the first client or order is received, depending on the context; (d) "currently available" serves as a test of readiness to start a job in the present, assessed with respect to a short reference period comprising that used to measure employment. Depending on national circumstances, the reference period may be extended to include a short subsequent period not exceeding two weeks in total, so as to ensure adequate coverage of unemployment situations among different population groups.

(c) Outside the labour force. Priority is given to employment over the other two categories, and to unemployment over outside the labour force. The three categories of labour force status are, thus, mutually exclusive and exhaustive. The sum of persons in employment and in unemployment equals the labour force. Persons outside the labour force are those of working age who were neither in employment nor in unemployment in the short reference period.

Multiple job holders (ilo_mjh)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete
 Format: numeric
 Width: 21
 Decimals: 0
 Range: 1-2

Valid cases: 0
 Invalid: 0

Description

We refer directly to the answer of the respondent and whether he/she assessed to have only one job or more than one. If the person has only one job, variables concerning all jobs will be equal to variable concerning main jobs.

Status in employment (ICSE 93) (ilo_job1_ste_icse93)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Status in employment (ICSE 93) (ilo_job1_ste_icse93)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Type: Discrete
 Format: numeric
 Width: 38
 Decimals: 0
 Range: 1-6

Valid cases: 0
 Invalid: 0

Description

We map the status in employment with the International Classification of Status in Employment (ICSE) 93. If this is not possible we are using only the aggregated categories (second best option).

The ICSE-93 consists of the following groups:

1. Employees; among whom countries may need and be able to distinguish "employees with stable contracts" (including "regular employees"). Employees are all those workers who hold the type of job defined as "paid employment jobs". Employees with stable contracts are those "employees" who have had, and continue to have, an explicit (written or oral) or implicit contract of employment, or a succession of such contracts, with the same employer on a continuous basis. "On a continuous basis" implies a period of employment which is longer than a specified minimum determined according to national circumstances. (If interruptions are allowed in this minimum period, their maximum duration should also be determined according to national circumstances.) Regular employees are those "employees with stable contracts" for whom the employing organization is responsible for payment of relevant taxes and social security contributions and/or where the contractual relationship is subject to national labour legislation.
2. Employers are those workers who, working on their own account or with one or a few partners, hold the type of job defined as a "self-employment job", and, in this capacity, on a continuous basis (including the reference period) have engaged one or more persons to work for them in their business as "employee(s)". The meaning of "engage on a continuous basis" is to be determined by national circumstances, in a way which is consistent with the definition of "employees with stable contracts". (The partners may or may not be members of the same family or household.)
3. Own-account workers are those workers who, working on their own account or with one or more partners, hold the type of job defined as "a self-employment job", and have not engaged on a continuous basis any "employees" to work for them during the reference period. It should be noted that during the reference period the members of this group may have engaged "employees", provided that this is on a non-continuous basis. (The partners may or may not be members of the same family or household.)
4. Members of producers' cooperatives are workers who hold a "self-employment" job in a cooperative producing goods and services, in which each member takes part on an equal footing with other members in determining the organization of production, sales and/or other work of the establishment, the investments and the distribution of the proceeds of the establishment amongst their members. (It should be noted that "employees" of producers' cooperatives are not to be classified to this group.)
5. Contributing family workers are those workers who hold a "self-employment" job in a market-oriented establishment operated by a related person living in the same household, who cannot be regarded as a partner, because their degree of commitment to the operation of the establishment, in terms of working time or other factors to be determined by national circumstances, is not at a level comparable to that of the head of the establishment. (Where it is customary for young persons, in particular, to work without pay in an economic enterprise operated by a related person who does not live in the same household, the requirement of "living in the same household" may be eliminated.)
6. Workers not classifiable by status include those for whom insufficient relevant information is available, and/or who cannot be included in any of the preceding categories.

Description

Status in employment (Aggregate) (ilo_job1_ste_aggregate)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

We map the status in employment with the International Classification of Status in Employment (ICSE) 93. If this is not possible we are using only the aggregated categories (second best option).

The ICSE-93 consists of the following groups:

1. Employees; among whom countries may need and be able to distinguish "employees with stable contracts" (including "regular employees"). Employees are all those workers who hold the type of job defined as "paid employment jobs". Employees with stable contracts are those "employees" who have had, and continue to have, an explicit (written or oral) or implicit contract of employment, or a succession of such contracts, with the same employer on a continuous basis. "On a continuous basis" implies a period of employment which is longer than a specified minimum determined according to national circumstances. (If interruptions are allowed in this minimum period, their maximum duration should also be determined according to national circumstances.) Regular employees are those "employees with stable contracts" for whom the employing organization is responsible for payment of relevant taxes and social security contributions and/or where the contractual relationship is subject to national labour legislation.
2. Employers are those workers who, working on their own account or with one or a few partners, hold the type of job defined as a "self-employment job", and, in this capacity, on a continuous basis (including the reference period) have engaged one or more persons to work for them in their business as "employee(s)". The meaning of "engage on a continuous basis" is to be determined by national circumstances, in a way which is consistent with the definition of "employees with stable contracts". (The partners may or may not be members of the same family or household.)
3. Own-account workers are those workers who, working on their own account or with one or more partners, hold the type of job defined as "a self-employment job", and have not engaged on a continuous basis any "employees" to work for them during the reference period. It should be noted that during the reference period the members of this group may have engaged "employees", provided that this is on a non-continuous basis. (The partners may or may not be members of the same family or household.)
4. Members of producers' cooperatives are workers who hold a "self-employment" job in a cooperative producing goods and services, in which each member takes part on an equal footing with other members in determining the organization of production, sales and/or other work of the establishment, the investments and the distribution of the proceeds of the establishment amongst their members. (It should be noted that "employees" of producers' cooperatives are not to be classified to this group.)
5. Contributing family workers are those workers who hold a "self-employment" job in a market-oriented establishment operated by a related person living in the same household, who cannot be regarded as a partner, because their degree of commitment to the operation of the establishment, in terms of working time or other factors to be determined by national circumstances, is not at a level comparable to that of the head of the establishment. (Where it is customary for young persons, in particular, to work without pay in an economic enterprise operated by a related person who does not live in the same household, the requirement of "living in the same household" may be eliminated.)
6. Workers not classifiable by status include those for whom insufficient relevant information is available, and/or who cannot be included in any of the preceding categories.

Economic activity (ISIC Rev. 4), 2 digit level (ilo_job1_eco_isic4_2digits)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete
Format: numeric
Width: 132
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

Ideally, we want to map the economic activity of the respondent with ISIC Revision 4 at second digit level. However, some microdatasets don't provide this level of details and then it should be mapped only at the first digit (second best option). If a country is still classifying based on ISIC Revision 3.1, it should be mapped at second digit or first digit if it's not possible (third and fourth best options). Finally, if it can't be mapped neither with ISIC Rev 4 nor Rev 3.1, then the variable should be created with just the aggregated level of classification (fifth best option).

Informal / Formal Economy (Unit of production) (ilo_job1_ife_prod)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete
 Format: numeric
 Width: 28
 Decimals: 0
 Range: 1-4

Valid cases: 0
 Invalid: 0

Description

We map persons in informal or formal sector based on the 15th ICLS, the 17th ICLS and the Manual on measuring informality published in 2013. We define whether the person works in Formal Sector (all workers in incorporated enterprises), Informal Sector (all workers in unincorporated enterprises that produce at least partly for the market and are not registered; It excludes households that produce exclusively for own final use; subsistence agriculture, construction of own dwellings, manufacture of own wearing apparel, own furniture, water and fuel collection for own use, etc.) or in an Household (all workers in unincorporated enterprises that produce goods and services exclusively for own-final use. It includes paid domestic employees, subsistence agriculture, construction of own dwellings, manufacture of own wearing apparel, own furniture, water and fuel collection for own use, etc. Persons classified in ISIC 97 (Revision 4) and ISCO 63 (ISCO-08) are included here). The key questions from a labour force survey used here are: institutional sector; destination of production; bookkeeping; registration of the unit; location of workplace; size and social security coverage.

Informal / Formal Economy (Nature of job) (ilo_job1_ife_nature)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Description

We map persons in informal or formal sector based on the 15th ICLS, the 17th ICLS and the Manual on measuring informality published in 2013. We define whether the person's main job is formal or informal. If the person is an employee, this is defined based on the attachment to a national labour legislation or the entitlement to certain employment benefits (paid vacation, paid sick leave and contribution to pension funds). If the person is self-employed, it depends on the unit of production as defined in "ilo_job1_ife_prod". Finally, all the contributing family workers are holding informal jobs.

Weekly hours actually worked in main job (ilo_job1_how_actual)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Continuous
Format: numeric
Width: 9
Decimals: 0
Range: 0-168

Valid cases: 0
Invalid: 0

Description

We follow the "Resolution concerning the measurement of working time Adopted by the Eighteenth International Conference of Labour Statisticians (November-December 2008)".

Weekly hours actually worked in main job include direct hours or the time spent carrying out the tasks and duties of a job; related hours, or the time spent maintaining, facilitating or enhancing productive activities; down time, or time when a person in a job cannot work due to machinery or process breakdown, accident, lack of supplies or power or Internet access; resting time, or time spent in short periods of rest, relief or refreshment, including tea, coffee or prayer breaks, generally practised by custom or contract according to established norms and/or national circumstances. It excludes, for paid employment (even when paid by the employer), time not worked during activities such as annual leave, public holidays, sick leave, parental leave or maternity/ paternity leave, other leave for personal or family reasons or civic duty; commuting time between work and home when no productive activity for the job is performed; for paid employment, even when paid by the employer; time spent in certain educational activities; for paid employment, even when authorized, paid or provided by the employer; longer breaks distinguished from short resting time when no productive activity is performed (such as meal breaks or natural repose during long trips).

Weekly hours usually worked in main job is the typical value of hours actually worked in a job for a short reference period such as one week, over a long observation period of a month, quarter, season or year that comprises the short reference measurement period used. Hours usually worked applies to all jobs. The short reference period for measuring hours usually worked should be the same as the reference period used to measure employment or household service and volunteer work.

Monthly earnings of employees in main job (ilo_job1_lri_ees)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Continuous
Format: numeric
Width: 9
Decimals: 0
Range: 0-1186250

Valid cases: 0
Invalid: 0

Description

We follow the "Resolution concerning the measurement of employment-related income adopted by the Sixteenth International Conference of Labour Statisticians (October 1998)". The earnings of employees relate to the gross remuneration in cash and in kind paid to employees, as a rule at regular intervals, for time worked or work done together with remuneration for time not worked, such as annual vacation, other type of paid leave or holidays. Earnings exclude employers' contributions in respect to their employees paid to social security and pension schemes and also the benefits received by employees under these schemes. Earnings also exclude severance and termination pay. Statistics of earnings relate to the gross remuneration of employees, i.e. the total before any deductions are made by the employer.

Description

Monthly labour related income of self-employed in main job (ilo_job1_lri_slf)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

We follow the "Resolution concerning the measurement of employment-related income adopted by the Sixteenth International Conference of Labour Statisticians (October 1998)". Income related to self-employment is defined as the income which is received, over a given reference period, by individuals, for themselves or in respect of their family members, as a result of their current or former involvement in self-employment jobs. Statistics of employment-related income should relate to the gross remuneration of self-employed workers. This concept includes: the profit (or the share of profit) which is generated by the self-employment activity; where relevant, the remuneration received by owner-managers of corporations and quasi-corporations; and the amount of employment-related social security benefits received by self-employed persons through schemes recognizing the status in employment as a specific condition for membership. The value of gross output may be defined as the value of all goods and services produced for the market as well as for own final use. It excludes income derived from other sources such as property, social assistance, transfers, etc., not related to employment.

Time-related underemployment (ilo_joball_tru)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 28	
Decimals: 0	
Range: 1-1	

Description

We follow the "Resolution concerning statistics of work, employment and labour underutilization adopted by the Nineteenth International Conference of Labour Statisticians (October 2013)". Persons in time-related underemployment comprise all persons in employment, who satisfy the following three criteria during the reference period: want to work additional hours and currently available to work additional hours i.e., are ready, within a specified subsequent period, to work additional hours, given opportunities for additional work and worked less than a threshold relating to working time i.e., persons whose hours usually worked in all jobs during the reference period were below a threshold. The hour threshold has to be chosen according to national circumstances. In the absence of nationally defined threshold, the most widely used practice of 35 hours per week is applied.

we collect information on the duration of the search for employment. It starts when the unemployed person began carrying out activities to "seek employment" or at the end of the last job. In case both are defined, we consider the shortest of the two time periods.

Previous occupation (ISCO-08) (ilo_prevocu_isco08)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete
 Format: numeric
 Width: 54
 Decimals: 0
 Range: 1-11

Valid cases: 0
 Invalid: 0

Description

Ideally, we want to map the occupation of the respondent with ISCO-08 at second digit level. However, some microdatasets don't provide this level of details and then it should be mapped only at the first digit (second best option). If a country is still classifying based on ISCO-88, it should be mapped at second digit or first digit if it's not possible (third and fourth best options). Finally, if it can't be mapped neither with ISCO-08 nor ISCO-88, then the variable should be created with just the aggregated level of classification (fifth best option).

Previous occupation (Aggregate) (ilo_prevocu_aggregate)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete
 Format: numeric
 Width: 47
 Decimals: 0
 Range: 1-7

Valid cases: 0
 Invalid: 0

Description

Previous economic activity (ISIC Rev. 4) (ilo_preveco_isic4)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete
 Format: numeric
 Width: 126
 Decimals: 0
 Range: 1-22

Valid cases: 0
 Invalid: 0

Description

Ideally, we want to map the previous economic activity of the respondent with ISIC Revision 4 at one digit level. If a country is still classifying based on ISIC Revision 3.1, it should be mapped at first digit. Finally, if it can't be mapped neither with ISIC Rev 4 nor Rev 3.1, then the variable should be created with just the aggregated level of classification.

Previous economic activity (Aggregate) (ilo_preveco_aggregate)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete
 Format: numeric
 Width: 109
 Decimals: 0
 Range: 1-7

Valid cases: 0

Finally, if it can't be mapped neither with ISIC Rev 4 nor Rev 3.1, then the variable should be created with just the aggregated level of classification.

Labour market attachment (Degree of) (ilo_olf_dlma)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete
Format: numeric
Width: 64
Decimals: 0
Range: 1-5

Valid cases: 0
Invalid: 0

Description

We follow the "Resolution concerning statistics of work, employment and labour underutilization adopted by the Nineteenth International Conference of Labour Statisticians (October 2013)". The degrees of labour market attachment are classified as follow: seeking, not available (Unavailable jobseekers); not seeking, available (Available potential jobseekers); not seeking, not available, willing (Willing non-jobseekers); not seeking, not available, not willing and not elsewhere classified. Potential labour force is defined as all persons of working age who, during the short reference period, were neither in employment nor in unemployment and: carried out activities to "seek employment", were not "currently available" but would become available within a short subsequent period established in light of national circumstances (i.e. unavailable jobseekers); or did not carry out activities to "seek employment", but wanted employment and were "currently available" (i.e. available potential job seekers).

Labour market attachment (Reasons for not seeking a job) (ilo_olf_reason)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete
Format: numeric
Width: 30
Decimals: 0
Range: 1-4

Valid cases: 0
Invalid: 0

Description

We follow the "Resolution concerning statistics of work, employment and labour underutilization Adopted by the Nineteenth International Conference of Labour Statisticians (October 2013)". The following categories are defined: labour market (past failure to find a suitable job, lack of experience, qualifications or jobs matching the person's skills, lack of jobs in the area, considered too young or too old by prospective employers, does not know how/where to find a job, waiting for an answer after an application, seasonal break, bad weather); personal / family-related (own illness, disability, studies, social exclusion, pregnancy, presence of small children, refusal by family); does not need/want to work (retired, other sources of income: pensions, rents); and not elsewhere classified (other, lack of infrastructure).

Discouraged job-seekers (ilo_dis)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete
Format: numeric
Width: 23
Decimals: 0
Range: 1-1

Valid cases: 0
Invalid: 0

Description

Discouraged job-seekers (ilo_dis)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

We follow the "Resolution concerning statistics of work, employment and labour underutilization Adopted by the Nineteenth International Conference of Labour Statisticians (October 2013)". Discouraged job-seekers refer to all persons of working age who, during the short reference period, were: neither in employment nor in unemployment; and currently available; and did not seek employment in the recent past period for labour market related reasons (as listed under labour market reasons defined in "ilo_olf_reason").

Youth not in education, employment or training (ilo_neet)

File: GMB_2012_LFS_v01_M_v01_A_ILOVAR_Stata

Overview

Type: Discrete
 Format: numeric
 Width: 46
 Decimals: 0
 Range: 1-1

Valid cases: 0
 Invalid: 0

Description

Youth (defined as persons aged 15 - 24 years) who were, during a specified reference period (e.g., one week): not employed; and not enrolled in school and not enrolled in a formal training program (e.g. vocational training).
