Overview

ABSTRACT

Objective of the Enterprise Survey: The main aim of the survey on unorganised Manufacture sector enterprises was to estimate size in terms of the total number enterprises, employment, fixed assets, operating expenses, receipts, value added, loans, gross value added per worker, etc. Information on other attributes like type of ownership, type of operation, number of months of operation, whether carrying out mixed/multiple activity, whether accounts maintained, etc. was also collected. The results pertaining to size, employment and economic indicators of the enterprises have been brought out in the first report*. This report, second in the series, presents the size and employment in brief, and the characteristics of the enterprises in terms of ownership, social group of owner, type of operation, months of operation, whether accounts maintained, nature of problems faced, etc.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Randomly selected unorganised service sector enterprises excluding trading and financial enterprises based on sampling procedure

Scope

NOTES

The manufacturing sector is an important segment of the Indian Economy. Unfortunately, statistics on regular basis, giving, by location, the number of

enterprises, employment, input, output, value added, etc., are not available for the unorganised part of this sector. AS per National Accounts Statistics released by C.S.O. in 1991, percentage share of manufacturing sector (organised & unorganised taken together) in the NDP at factor cost for 1988-89 is 19.6% of which 11.6% is accounted for by organised part and the rest (i.e., 8.0%) by unorganised part. As per provisional results of NSS 45th round survey (July 1989-June 1990), there were an estimated 157.3 lakh manufacturing and repairing enterprises (OAME's and NDME's) in the country, 120.2 lakhs being in the rural areas and 37.1 lakhs in the urban areas. As per the provisional results of the survey on DMEs conducted by CSO during October 1989 - September 1990, there were an estimated 6.2 lakh directory manufacturing establishments (DME's) in the country, 2.3 lakh being in the rural areas and 3.9 lakh in the urban areas. The fiftyfirst round of NSS will cover all OAME's, NDME's and DME's. These enterprises/establishments are those which are covered by the two-digit codes (called divisions) 20 to 39 and 97 under the revised National Industrial Classification of All Economic Activities 1987 (henceforth briefly referred to as NIC, 1987).

Coverage

GEOGRAPHIC COVERAGE

The survey covers the whole of the Indian Union excepting (i) Ladakh and Kargil districts of Jammu & Kashmir, (ii) 768 interior villages of Nagaland (out of a total

of 1232 villages) situated beyond five kilometers of the bus route and (iii) 195 villages in Andaman and Nicobar Islands (out of a total of 549 villages) which remain inaccessible throughout the year. However, in the case of Jammu & Kashmir, the districts Anantnag, Pulwama, Srinagar, Badgam, Baramulla and Kupwara in addition to Ladakh and Kargil districts are kept outside the geographical coverage of central sample.

UNIVERSE

Enterprises which are registered under Sections 2m (i) and 2m (ii) of the Factories Act, 1948 (i.e. enterprises employing 10 or more workers using power and those employing 20 or more workers without using power) and bidi and cigar manufacturing enterprises registered under bidi and cigar workers (condition of employment) Act, 1966 will not be covered in this survey. The enterprises mentioned above are supposed to be covered under Annual Survey of Industries (ASI).

In this round all the states and union-territories excepting Andaman & Nicobar Islands, Dadra & Nagar Haveli and Lakshadweep are expected to participate at least on an equal matching basis.

Sampling

Sampling Procedure

As usual, a stratified two-stage sampling design has been adopted. The first-stage units are the villages (Panchayat wards in case of Kerala) in the rural areas and urban blocks in the urban areas. The second-stage units are the enterprises for the survey of unorganised manufacture and households for the survey on household consumer expenditure.

Sample Size (FSU's) : The total sample size (i.e. total number of villages and blocks to be surveyed) at all-India level has been fixed as 14,072 for the central sample and 16,080 for the state sample.

Allocation of sample FSU's between rural and urban sectors : State/u.t. level total sample size (i.e. total number of villages and blocks to be surveyed) has been allocated between the rural and urban sectors in proportion to population as per 1991 census with double weightage to the urban sector. All these allocations are rounded off to multiples of 8 in order to facilitate further allocation among different sub-sample and sub-round combinations.

More details on sample design is in external resources.

Deviations from Sample Design

There was no deviation from the original sampling design

Weighting

WGT- Multiplier has been provided for sub-sample and combined. This should be used as multiplier factor for Sub sample and Combined sample.

Questionnaires

Overview

Block 1: Identification of sample enterprise/establishment

Block 2: Particulars of field operation

Block 3: details of operation and some background information

Block 4: Inventory of Fixed owned and hired during the reference year

Block 5: Inventory of stock/working capital for the reference year

Block 6: outstanding loan including interest

Block 7: employment and emoluments during the reference period

Block 8.1: raw materials and fuels consumed (including homegrown) during the reference period

Block 8.2 : Other inputs consumed during the reference period

Block 9: products and by-products manufactured (including products consumed at home) during the reference period.

Block 10: calculation of gross value added for the reference period

Note : In the data set these are identified by Level No.

Data Collection Notes

Period of survey and work programme: The survey period of this round was divided into four sub-rounds of three months duration.

The data has been collected as follows:

File name Record length No. of records Remarks

D146R TXT 146 38,90,644 Basic data with multiplier Rural
D146U TXT 146 24,46,353 Basic data with multiplier Urban

M235U TXT 235 5,411 Multiplier data Urban

NOTE:

1. As the data is large, data sets are kept separately for Rural and Urban sector. As such all the description and recorded for RURAL is also applicable to Urban data sets.
2. These two data sets are labeled as RLEVEL for RURAL ULEVEL for Urban followed by level no.

Data Processing

Data Editing

Data was collected as per the Questionnaire for NSS 51st Round schedule 2.2. There are 10 record blocks. Data editing, scrutiny and validation were carried out as per the scrutiny checks and corrected manually.

NOTE: The data set contains 6336997 records for Rural and Urban sector. Therefore for ease of processing, they are kept separately for Rural and Urban sector.

Other Processing

1. The data sets are identified by Level No. They are kept separately and processed independently as information common to all types of records derived from Block 1 & Block 2 ie Identification blocks have been posted in all the data sets along with the multiplier Factor- WGT-SS (Sub sample)and WGT_CS (Combined).
2. As the data is large, data sets are kept separately for Rural and Urban sector. As such all the description and recorded for RURAL is also applicable to Urban data sets.
3. These two data sets are labled as RLEVEL for RURAL and ULEVEL for Urban followed by level no.
4. As the survey is for unorganised Manugaturing sector, please see only Manufacturing code be selected for processing. There may be records with Service sector enterprise code.
5. In the schedule- Block 8.1 (Level 7) and Block 9 (Level 9), data for quantity and rate per unit is given as (0.0) and (0.00) respectively. But in the record layout these are all numeric only.

Data Appraisal

Other forms of Data Appraisal

Comparison of results with earlier survey for Unorganised service sector.

Description

Srl. no. of assets (SRL_ASSTS)

File: R-FIXED ASSETS-RC1

Fixed assets : Fixed assets are assets held for the purpose of producing or providing goods or services and they are not held for resale in the normal course of business. These cover all goods, new or used, that have a normal economic life of more than one year from the date of purchase. Thus fixed assets for our purpose include (1) assets used for production, transportation, living or other facilities (recreation etc.) (2) full value of assets taken on hire purchase/instalment (whether fully paid or not) excluding interest. Intangible assets like goodwill etc. are excluded. The assets under construction i.e., construction of building etc., installation of plant and machinery, preparation of bodies of truck etc. (transport equipment) may be reported under the relevant item, since no provision has been made for recording assets under construction in the schedule separately. Advance payment for fixed assets not yet received should not be considered. The information to be recorded here is by physical approach. Fixed assets owned but rented out are not to be accounted for. Additions to fixed assets (as distinct from repair work) during the reference year is to be included. Information should be given separately for land and building. If separate figures are not available, estimated figures may be recorded. For the manufacturing unit which has not started production as yet and is engaged in the process of installation, fixed assets will be duly considered.

Fixed assets received from other countries, even if used, put to use to the country for the first time will be classified as new.

Description

Assets are subject to diminution in working capacity or value with the passage of time. This gradual reduction in the value of an asset due to wear and tear as in the case of physical assets like building, machinery etc. is defined as depreciation.

Literal question

Depreciation

Interviewer instructions

The depreciation provided for the reference year is to be recorded in col.10. Where the enterprise was following a system of depreciation but provision has not been made for a number of years together, the estimate of the depreciation is to be made on the basis of the system followed. If no depreciation has ever been allowed for an item of fixed asset, annual rate of depreciation may be estimated as (a) - (b), where (a) and (b) are as follows :

(a) purchase price + installation cost (or cost of construction)

(b) estimated working life in years.
