

Documentation MICS For Mongolia

Size Households: [6000]
 Household members: [29948]
 Women: [8256]
 Children: [6184]

Household identification : Hid
Household members identification : Hhmid

Type of weights : Self-weighted
Variable weight : Household and household members = Hhweight
Vaiable weight : Women = Wmweight
Variable weight : Children = chweight.

Notes on Data File

1. Definition of household is “group of one or more sharing common housekeeping arrangements”
2. The school system changed from 6+2+2 to 4+4+2 of primary, lower secondary, upper secondary education in 1990, hence mother’s education level is not similar to grade levels of children.
3. Only 4 percent of the measurements are missing, however, an additional 160 cases are not included in the processing because of a 'flag' (missing or implausible height or weight for age, sex and age)
4. Children aged <6m have about half the rate of receiving increased fluids and continued eating; this could be the result of unclear understanding about 'eating' or 'drinking' when applied to a lactating infant.
