Overview

ABSTRACT

The Labour Force Survey (LFS) in Albania has been carrying out by INSTAT since 2007 with annual periodicity. The survey is household-based and the unit of observation are all household members aged 15 years and older. The main objective of LFS is to establish a sustainable labour market statistics system according to EUROSTAT recommendations and guidelines. Based on the data gathered through LFS it is possible to make a quantitative and dynamic assessment of labour market developments, to define the participation of all persons aged 15 years and over in labour market, the employment rate, the employment by economic activity, by sex and age-group, unemployment rate, women participation in labour market, etc. The Quarterly Labour Force Survey is a household based survey. Its main objective is to provide information on the labour market situation in Albania which serves policymakers to design labour market policies and to assess their effectiveness, and to meet user needs for updated information on the labour market dynamics.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

The Labour Force Survey (LFS) have the following units of analysis: individuals and households.

Scope

NOTES

The scope of The Labour Force Survey (LFS) includes:

- DEMOGRAPHIC CHARACTERISTICS: Age, sex, marital status, place/country of birth, nationality, ethnicity, place/country of the previous residence, educational attainment and relationship to household head.
- MAIN LABOUR RELATED CHARACTERISTICS: Employment, unemployment, hours of work, employment related benefits, social security coverage, training received, usual activity and absence from work.
- OTHER LABOUR RELATED CHARACTERISTICS: Industry, occupation, status in employment, institutional sector (public/private), size of establishment, full time/part time status, permanency of the job, working time arrangements, duration of employment, existence of more than one job, characteristics of the second job(s), duration of unemployment, previous working experience, characteristics of the last job, search for another job, reasons for seeking another job, methods of looking for work, registration as unemployed, receipt of unemployment benefits and reasons for not being in the labour force.

Sampling

Sampling Procedure

The sample is based on a two-stage sampling procedure. In the first stage are selected the geographical areas (PSU) with a proportional probability to the size of the enumeration area. In the second stage within each geographical area (once selected in the first stage) are selected a fix number of households by equal probability systematic sampling method. The sampling frame for LFS is based on the Population Census of 2001 and the updated household list.

The QLFS uses a rotational sampling design, whereby a household once initially selected for interview, is retained in the sample for a total of five consecutive quarters. The same household is scheduled to be interviewed, exactly after 13 weeks apart, so that the fifth interview takes place one year on after the first. According to the rotational sampling design, each quarter one fifth of the selected households are new and 80 percent of them are in common. So, in each quarter, in the selected sample, 1008 new households are added and the same number of households that has been interviewed for five consecutive quarters is dropped out from the sample. The sample size for QLFS is 5040 households for each calendar quarter.

Deviations from Sample Design

The QLFS uses a rotational sampling design, whereby a household once initially selected for interview, is retained in the sample for a total of five consecutive quarters. The same household is scheduled to be interviewed, exactly after 13 weeks apart, so that the fifth interview takes place one year on after the first. According to the rotational sampling design, each quarter one fifth of the selected households are new and 80 percent of them are in common. So, in each quarter, in the selected sample, 1008 new households are added and the same number of households that has been interviewed for five consecutive quarters is dropped out from the sample.

Response Rate

Annual non-response rates by survey mode (%)
 Period By survey Mode By Non-Response Categories

CAPI Refusals Non-contacts Other reasons

Annual average 2013 22.7 2.3 9.0 11.4

Weighting

The LFS methodology is in full accordance with the EUROSTAT standards and guidelines as regards to the representation of sample, coefficient of the variation of the main indicators, the drafting and the weighting of data. The sampling weights are calculated following several steps and take into account the sample design, adjustment for the household level no-responses, and the calibration with the demographic data.

Questionnaires

Overview

The Questionnaires for the LFS includes the following modules:

- HOUSEHOLD MEMBERS: List of demographic characteristics of household members.
- INDIVIDUAL QUESTIONNAIRE: For all persons aged 15 years old and over on last day of the reference week and usually present in the household. This module includes: Labour Status, Characteristics of Main Job, Working Time, Second Job, Work Patterns, Work Experience Abroad, Previous Work Experience of Persons Not in Employment, Search For Employment, Education and Training and Situation One Year Ago.

Data Collection

Data Collection Dates

Start	End	Cycle
2013	2013	N/A

Time Periods

Start	End	Cycle
2013-01	2013-03	N/A

Data Collection Mode

Computer Assisted Personal Interview [capi]

Data Collection Notes

Data collection in the fieldwork is spread during all months of the year 2012. In the selected households, were surveyed by face to face interview, all household members aged 15 years and above. The QLFS questionnaire was drafted with the technical assistance from EUROSTAT and in complete compliance with its recommendations and regulations. The methodological part fulfils all EUROSTAT standards linked with the representation of the sample, coefficient of the variation of the main indicators, the questionnaire design, and data weighting procedures.

- Data collection in the fieldwork is spread across all months of the year.
- The gathered data refers to a specific reference period named reference week. The reference week is the calendar week which starts on Monday and finishes on Sunday before the interview day.
- The main mode of data collection is face to face personal interview (paper and pencil)
- The number of Ultimate Sampling Units (USU) interviewed per interviewer per day are three units.
- The average duration of an interview per household member of working age is 25 minutes
- The field staff is mainly recruited for the Survey collection
- The duration of training on the survey for newly recruited interviewers is three days
- Respondents' participation in the survey is compulsory
- Ultimate sampling units that could not be identified are replaced
- Ultimate sampling units that could not be contacted or refuse to participate aren't replaced

Questionnaires

The Questionnaires for the LFS includes the following modules:

- HOUSEHOLD MEMBERS: List of demographic characteristics of household members.
- INDIVIDUAL QUESTIONNAIRE: For all persons aged 15 years old and over on last day of the reference week and usually present in the household. This module includes: Labour Status, Characteristics of Main Job, Working Time, Second Job, Work Patterns, Work Experience Abroad, Previous Work Experience of Persons Not in Employment, Search For Employment, Education and Training and Situation One Year Ago.

Data Processing

Other Processing

Some of the selected indicators tabulated from the survey are:

- Unemployment rate by sex, age, level of education, economic activity
- Employment to population ratio by sex, age, level of education
- Labour force participation rate by sex, age, level of education
- Hours of work (per worker) by sex, age, level of education, economic activity, occupation, status in employment
- Earnings (per worker) by sex, age, level of education, economic activity, occupation, status in employment
- Number of workers by hours band
- Number of workers by earnings class

Also, an adjustment for item non-response is made and the confidence level is 95 percent.

Data Appraisal

Estimates of Sampling Error

The calculation of the sampling errors for LFS estimates is based on the following principle: the variance contributed by the later stages of sampling is, under broad conditions, reflected in the observed variation among the sample results for the first-stage units. Thus, the sampling variance of a variety of statistics, such as totals, means, ratios, proportions, and their differences can be obtained on the basis of totals calculated for primary sampling units (PSUs).

Range: 1-88	

Looked for land, premises or equipment (Q115_9)

File: ALB_2013_LFS_Q1_v01_M_SPSS

Overview

Type: Discrete	Valid cases: 40415
Format: numeric	Invalid: 0
Width: 8	
Decimals: 0	
Range: 1-88	

Looked for permits, licences, financial resources (Q115_10)

File: ALB_2013_LFS_Q1_v01_M_SPSS

Overview

Type: Discrete	Valid cases: 40415
Format: numeric	Invalid: 0
Width: 8	
Decimals: 0	
Range: 1-88	

Awaiting the results of an application for a job (Q115_11)

File: ALB_2013_LFS_Q1_v01_M_SPSS

Overview

Type: Discrete	Valid cases: 40415
Format: numeric	Invalid: 0
Width: 8	
Decimals: 0	
Range: 1-88	

Waiting for a call from a public employment office (Q115_12)

File: ALB_2013_LFS_Q1_v01_M_SPSS

Overview

Type: Discrete	Valid cases: 40415
Format: numeric	Invalid: 0
Width: 8	
Decimals: 0	
Range: 1-88	

Awaiting the results of a competition for recruitment to the public sector (Q115_13)

File: ALB_2013_LFS_Q1_v01_M_SPSS

Overview

Type: Discrete	Valid cases: 40415
Format: numeric	Invalid: 0
Width: 8	
Decimals: 0	
Range: 1-88	

Other (Q115_14)

File: ALB_2013_LFS_Q1_v01_M_SPSS

Overview

Type: Discrete	Valid cases: 40415
Format: numeric	Invalid: 0
Width: 8	
Decimals: 0	
Range: 1-88	

Time since person last worked (LEAVTIME)

File: ALB_2013_LFS_Q1_v01_M_SPSS

Overview

Type: Continuous	Valid cases: 11968
Format: numeric	Invalid: 28447
Width: 8	Minimum: -3
Decimals: 0	Maximum: 732
Range: -3-732	Mean: 210.8
	Standard deviation: 92.7

Time since person last worked (classes) (LEAVCLAS)

File: ALB_2013_LFS_Q1_v01_M_SPSS

Overview

Type: Discrete	Valid cases: 11962
Format: numeric	Invalid: 28453
Width: 8	
Decimals: 0	
Range: 1-8	

(SEEKDUR)

File: ALB_2013_LFS_Q1_v01_M_SPSS

Overview

Type: Discrete	Valid cases: 5158
Format: numeric	Invalid: 35257
Width: 8	
Decimals: 0	
Range: 0-8	

Duration of unemployment (DURUNE)

File: ALB_2013_LFS_Q1_v01_M_SPSS

Overview

Type: Discrete	Valid cases: 3417
Format: numeric	Invalid: 36998
Width: 8	
Decimals: 0	
Range: 0-8	

Duration of unemployment aggregated in 3 groups (DurStTab)

File: ALB_2013_LFS_Q1_v01_M_SPSS

Overview

Type: Discrete	Valid cases: 3417
Format: numeric	Invalid: 36998
Width: 1	
Decimals: 0	
Range: 1-3	

Activity status (WSTATUT)

File: ALB_2013_LFS_Q1_v01_M_SPSS

Overview

Type: Discrete	Valid cases: 40415
Format: numeric	Invalid: 0
Width: 8	
Decimals: 0	
Range: 1-3	

NACE aggregated (ILO_NACE)

File: ALB_2013_LFS_Q1_v01_M_SPSS

Overview

Type: Discrete	Valid cases: 17790
Format: numeric	Invalid: 22625
Width: 8	
Decimals: 0	
Range: 1-99	

ISCO-08 groups (iscogr_08_ILO)

File: ALB_2013_LFS_Q1_v01_M_SPSS

Overview

Type: Discrete	Valid cases: 17699
Format: numeric	Invalid: 22716
Width: 8	
Decimals: 0	
Range: 1-7	

Labour status during the reference week (wstator)

File: ALB_2013_LFS_Q1_v01_M_SPSS

Labour status during the reference week (wstator)

File: ALB_2013_LFS_Q1_v01_M_SPSS

Overview

Type: Discrete	Valid cases: 17864
Format: numeric	Invalid: 22551
Width: 8	
Decimals: 0	
Range: 1-2	

Professional status (STAPRO)

File: ALB_2013_LFS_Q1_v01_M_SPSS

Overview

Type: Discrete	Valid cases: 18157
Format: numeric	Invalid: 22258
Width: 1	
Decimals: 0	
Range: 1-4	

Educational level (EDU3)

File: ALB_2013_LFS_Q1_v01_M_SPSS

Overview

Type: Discrete	Valid cases: 40415
Format: numeric	Invalid: 0
Width: 8	
Decimals: 0	
Range: 1-3
