

# Occupied Palestinian Territory - Labour Force Survey 2001

Report generated on: September 21, 2017

Visit our data catalog at: <http://www.ilo.org/microdata/index.php>

# Overview

## Identification

---

### ID NUMBER

PSE\_2001\_LFS\_v01\_M\_ILO

## Version

---

### VERSION DESCRIPTION

Version 01

## Overview

---

### ABSTRACT

Focuses mainly on labour force key indicators, main characteristics of the employed, unemployed, underemployed and persons outside labour force, labour force according to level of education, distribution of the employed population by occupation, economic activity, place of work, employment status, hours and days worked and average daily wage in NIS for the employees.

### KIND OF DATA

Sample survey data [ssd]

### UNITS OF ANALYSIS

- Household

- Individual

## Scope

---

### NOTES

The lfs questionnaire consists of four main sections:

Identification Data:

The main objective for this part is to record the necessary information to identify the household, such as, cluster code, sector, type of locality, cell, housing number and the cell code.

Quality Control:

This part involves groups of controlling standards to monitor the field and office operation, to keep in order the sequence of questionnaire stages (data collection, field and office coding, data entry, editing after entry and store the data.

Household Roster:

This part involves demographic characteristics about the household, like number of persons in the household, date of birth, sex, educational level...etc.

Employment Part:

This part involves the major research indicators, where one questionnaire had been answered by every 10 years and over household member, to be able to explore their labour force status and recognize their major characteristics toward employment status, economic activity, occupation, place of work, and other employment indicators.

### TOPICS

Topic	Vocabulary	URI
-------	------------	-----

Topic	Vocabulary	URI
Economic Policy	ILO	
Education	ILO	
Environment	ILO	
Household Income	ILO	
Health	ILO	
Employment	ILO	
Unemployment	ILO	
Informal Work	ILO	
Other Work Activities	ILO	
Labour Force	ILO	
Poverty	ILO	
Gender	ILO	

**KEYWORDS**

Unemployed, Employed, Occupation, Economically active population (Labour Force)

## Coverage

---

**GEOGRAPHIC COVERAGE**

The Data are representative at region level (West Bank, Gaza Strip), locality type (urban, rural, camp) and governorates.

**UNIVERSE**

The survey covered all the Palestinian households who are a usual residence in Palestine.

## Producers and Sponsors

---

**PRIMARY INVESTIGATOR(S)**

Name	Affiliation
Palestinian Central Bureau of Statistics	Palestinian National Authority

**OTHER PRODUCER(S)**

Name	Affiliation	Role
Palestinian Central Bureau of Statistics	Palestinian National Authority	Product the survey

**FUNDING**

Name	Abbreviation	Role
The Palestinian National Authority	PNA	Financial assistance
The Core Funding Group	CFG	Financial assistance
Swiss Agency for Development and Cooperation	SDC	Financial assistance

**OTHER ACKNOWLEDGEMENTS**

Name	Affiliation	Role
The Core Funding Group represented by the representative office	CFG	responded to the survey instrument
Swiss Agency for Development and Cooperation	SDC	responded to the survey instrument

## Metadata Production

# Sampling

## Sampling Procedure

---

### Sampling Frame

The sampling frame consisted of a master sample of enumeration areas (EAs) selected from the population housing and establishment census 1997, the master sample consists of area units of relatively equal size (number of households), these units have been used as primary sampling units (PSUs).

### Sampling Frame and Target Population:

#### Target Population:

It consists of all individuals aged 10 years and older normally residing in their households in Palestine during 2000.

#### Sample Rotation:

Each round of the Labor Force Survey covers all of the 481 master sample enumeration areas. Basically, the areas remain fixed over time, but households in 50% of the EAs were replaced in each round. The same households remain in the sample for two consecutive rounds, left for the next two rounds, then selected for the sample for another two consecutive rounds before being dropped from the sample. An overlap of 50% is then achieved between both consecutive rounds and between consecutive years (making the sample efficient for monitoring purposes).

## Deviations from Sample Design

---

### Sample Design:

The sample is a two-stage stratified cluster random sample.

### Stratification:

Two levels of stratification were made:

Stratification by Governorates.

Stratification by type of locality which comprises:

(a) Urban (b) Rural (c) Refugee Camps

## Response Rate

---

The estimated sample size in each quarter in 2001 was 7,559 households, The total number of the households was about 30,376 households. 1,287 household could not be interviewed due to the Israeli comprehensive closure and aggression against the Palestinian people." The overall response rate for the survey was 84.2%

## Weighting

---

### Weights Calculation of households:

The weight of statistical units (sampling units) in the sample is defined as the mathematical inverse of the selection probability where the sample of the survey is a two-stage stratified cluster sample. Thus, in the first stage we calculate the weight of enumeration areas depending on the probability of each enumeration area (a systematic random sample). In the second stage we calculate the weight of households in each enumeration area. Initial household weights resulted from the product of the weight of the first stage and the weight of the second stage. Final household weights were obtained after adjustment of initial weights with the household estimates of the middle of each quarter of 2001 with regard to design strata (governorate, locality type).

For individuals over 10 years, we added the final household weight for each person, then adjusted the initial individual weight with the estimates of individuals of the middle of each quarter of 2001 according to region (West Bank, Gaza Strip), sex (male, female), five-year age groups (14 groups), then we obtained the final adjusted individual weight.

# Questionnaires

## Overview

---

The lfs questionnaire consists of four main sections:

- Identification Data:

The main objective for this part is to record the necessary information to identify the household, such as, cluster code, sector, type of locality, cell, housing number and the cell code.

- Quality Control:

This part involves groups of controlling standards to monitor the field and office operation, to keep in order the sequence of questionnaire stages (data collection, field and office coding, data entry, editing after entry and store the data.

- Household Roster:

This part involves demographic characteristics about the household, like number of persons in the household, date of birth, sex, educational level...etc.

- Employment Part:

This part involves the major research indicators, where one questionnaire had been answered by every 10 years and over household member, to be able to explore their labour force status and recognize their major characteristics toward employment status, economic activity, occupation, place of work, and other employment indicators.

## Data Collection

### Data Collection Dates

Start	End	Cycle
2001	2001	N/A

### Time Periods

Start	End	Cycle
2001-01-01		Q1
2001-04-01		Q2
2001-07-01		Q3
2001-10-01		Q4

### Data Collection Mode

Face-to-face [f2f]

### Data Collection Notes

The purpose of the training courses was to teach participants the main skills needed to conduct interviews. Two training courses were held, one in Ramallah for the West Bank trainees, and one in Gaza City for Gaza Strip trainees. Each course consisted of two parts: one on survey methodology including survey design, questionnaire design, interviewing techniques, and field operations; and one part on specifications of the labour force survey, including concepts and definitions, fieldwork procedures, data collection, editing, coding, tips for asking questions and recording answers, as well as field team organization and field supervision.

### Questionnaires

The lfs questionnaire consists of four main sections:

- Identification Data:

The main objective for this part is to record the necessary information to identify the household, such as, cluster code, sector, type of locality, cell, housing number and the cell code.

- Quality Control:

This part involves groups of controlling standards to monitor the field and office operation, to keep in order the sequence of questionnaire stages (data collection, field and office coding, data entry, editing after entry and store the data).

- Household Roster:

This part involves demographic characteristics about the household, like number of persons in the household, date of birth, sex, educational level...etc.

- Employment Part:

This part involves the major research indicators, where one questionnaire had been answered by every 10 years and over household member, to be able to explore their labour force status and recognize their major characteristics toward employment status, economic activity, occupation, place of work, and other employment indicators.

### Data Collectors

Name	Abbreviation	Affiliation
Palestinian Central Bureau of Statistics	PCBS	Palestinian National Authority

### Supervision

The purpose of the training courses was to teach participants the main skills needed to conduct interviews. Two training courses were held, one in Ramallah for the West Bank trainees, and one in Gaza City for Gaza Strip trainees. Each course consisted of two parts: one on survey methodology including survey design, questionnaire design, interviewing techniques,

and field operations; and one part on specifications of the labour force survey, including concepts and definitions, fieldwork procedures, data collection, editing, coding, tips for asking questions and recording answers, as well as field team organization and field supervision.

## Data Processing

### Data Editing

---

Data editing took place at a number of stages through the processing including:

1. office editing and coding
2. during data entry
3. structure checking and completeness
4. structural checking of SPSS data files

### Other Processing

---

Both data entry and tabulation were performed using the ACCESS and SPSS software programs. Data entry was organized in one files, corresponding to the main parts of the questionnaire. A data entry template was designed to reflect an exact image of the questionnaire, and included various electronic checks: logical check, range checks, consisting checks and cross-validation. Complete manual inspection of results after data entry was performed, and questionnaires containing field-related errors were sent back to the field for correction.

## **Data Appraisal**

### **Estimates of Sampling Error**

Since the data reported here are based on a sample survey and not on complete enumeration, they are subject to two main types of errors: sampling errors and nonsampling errors.

Sampling errors are random outcomes of the sample design, and are, therefore, easily measurable. A description of the estimated variances and the effects of the sample design on sampling errors are provided in the report and Table A. In general, the assessment is that the sample size and sample design provide reliable estimates of the main labour force indicators.

### **Other forms of Data Appraisal**

Detailed information on the data appraisal is available in the Survey Report.

File: PSE\_2001\_LFS\_v01\_M\_SPSS

**Overview**

Type: Discrete	Valid cases: 112725
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 1-6	

**OCCUPATION group (occupati)**

File: PSE\_2001\_LFS\_v01\_M\_SPSS

**Overview**

Type: Discrete	Valid cases: 112725
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 1-7	

**dwage (dwage)**

File: PSE\_2001\_LFS\_v01\_M\_SPSS

**Overview**

Type: Continuous	Valid cases: 14938
Format: numeric	Invalid: 97787
Width: 8	Minimum: 1.7
Decimals: 2	Maximum: 1110.2
Range: 1.65384615384615-1110.17307692308	Mean: 70.3
	Standard deviation: 40

**Relationship to the Head of Household (hr04)**

File: PSE\_2001\_LFS\_v01\_M\_SPSS

**Overview**

Type: Discrete	Valid cases: 112725
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 1-10	

**Refugee Status (hr05)**

File: PSE\_2001\_LFS\_v01\_M\_SPSS

**Overview**

Type: Discrete	Valid cases: 112725
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 1-3	

**Permit in Israel (pw18a)**

File: PSE\_2001\_LFS\_v01\_M\_SPSS

**Overview**

Type: Discrete	Valid cases: 5855
Format: numeric	Invalid: 106870
Width: 1	
Decimals: 0	
Range: 1-3	

**WEIGHT (wfinal)**

File: PSE\_2001\_LFS\_v01\_M\_SPSS

**Overview**

Type: Continuous	Valid cases: 112725
Format: numeric	Invalid: 0
Width: 8	Minimum: 4.1
Decimals: 2	Maximum: 66.4
Range: 4.1018209752963-66.408502461605	Mean: 18.9
	Standard deviation: 8.9

**MISSING(hr04) (FILTER) (filter\_\$)**

File: PSE\_2001\_LFS\_v01\_M\_SPSS

**Overview**

Type: Continuous	Valid cases: 112725
Format: numeric	Invalid: 0
Width: 1	Minimum: 0
Decimals: 0	Maximum: 1
Range: 0-1
