Overview

ABSTRACT

The Labour Force Survey (LFS) is a study of the employment circumstances of the UK population. It is the largest household study in the UK and provides the official measures of employment and unemployment. The first Labour Force Survey (LFS) in the United Kingdom was conducted in 1973, under the terms of a Regulation derived from the Treaty of Rome.

The provision of information for the Statistical Office of the European Communities (SOEC) continued to be one of the reasons for carrying out the survey on an annual basis. SOEC co-ordinated information from labour force surveys in the member states in order to assist the EC in such matters as the allocation of the Social Fund. The survey was carried out biennially from 1973 to 1983 and was increasingly used by UK government departments to obtain information which would assist in the framing of social and economic policy. By 1983 it was being used by the Employment Department (now the Department for Work and Pensions) to obtain information which was not available from other sources or was only available for Census years. From 1984 the survey was carried out annually, and since that time the LFS has consisted of two elements:

- a quarterly survey conducted in Great Britain throughout the year, in which each sampled address was called on five times at quarterly intervals, and which yielded about 15,000 responding households in every quarter;

- a 'boost' survey in the spring quarter (March-May), which produced interviews at over 44,000 households in Great Britain and over 4,000 households in Northern Ireland.

Users should note that only the data from the spring quarter and the 'boost' survey were included in the annual datasets for public release, and that only data from 1975-1991 are available from the UK Data Archive. The depositor recommends only considered use of data for 1975 and 1977 (SNs 1757 and 1758), as the concepts behind the definitions of economic activity changed and are not comparable with later years. Also the survey methodology was being developed at the time and so the estimates may not be reliable enough to use.

During 1991 the survey was developed, so that from spring 1992 the data were made available quarterly, with a quarterly sample size approximately equivalent to that of the previous annual data. The Quarterly Labour Force Survey series therefore superseded the annual LFS series, and is held at the Data Archive under GN 33246.

The study is being conducted by the Office for National Statistics (ONS), the government's largest producer of statistics. They compile independent information about the UK's society and economy which provides evidence for policy and decision making, and for directing resources to where they are needed most. The ten-yearly census, measures of inflation, the National Accounts, and population and migration statistics are some of our highest-profile outputs.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

- Individuals

- Families/households

Scope

NOTES

The basic set of LFS questions sought information about household composition: i.e. for each usually resident individual member of the household, the relationship to the head of the household, sex, age, marital condition and nationality. For persons above the statutory school-leaving age information was sought about the main economic activity, any secondary economic activity, and economic activity one year previously. For unemployed persons questions were asked about the type of employment sought, duration of unemployment and method of seeking employment, previous employment status and industry and whether or not registered as unemployed at an official employment office.

The European Community's supplementary set of questions in 1975 asked about vocational training in progress, travel-to-work and working conditions. At the request of UK departments in 1975, questions were asked about length of time in the present occupation and on the previous occupation of persons who had changed their occupation during the previous year, as well as extra questions about vocational training.

Sampling

Sampling Procedure

Stratified multi-stage sample; for further details see annual reports. Until 1983 two sampling frames were used; in England, Northern Ireland and Wales, the Valuation Roll provided the basis for a sample which, in England and Wales, included all 69 metropolitan districts, and a two-stage selection from among the remaining non-metropolitan districts.

In Northern Ireland wards were the primary sampling units. In Scotland, the Address File (i.e. post codes) was used as the basis for a stratified sample. From 1983 the Postoffice Address File has been used instead of the Valuation Roll in England and Wales.

In 1984 sample rotation was introduced along with a panel element, the quarterly survey, which uses a two-stage clustered sample design.

The sample comprises about 90,000 addresses drawn at random from the rating lists in 190 different areas of England and Wales. With such a large sample, it will happen by chance that a small number of addresses which were selected at random for the 1979 survey will come up again. In addition, 2,000 addresses in 8 of the areas selected in 1979 have been deliberately re-selected again this time (the interviewers who get these addresses in their work will receive a special letter to take with them.)

Deviations from Sample Design

One of the limitations of the LFS is that the sample design provides no guarantee of adequate coverage of any industry, as the survey is not industrially stratified. The LFS coverage also omits communal establishments, except NHS housing, students in halls of residence and at boarding schools. Members of the armed forces are only included if they live in private accommodation. Also, workers under 16 are not covered.

Response Rate

Method of calculating response rates

The response rate indicates how many interviews were achieved as a proportion of those eligible for the survey. The formula used is as follows:

$$RR = (FR + PR) / (FR + PR + OR + CR + RHQ + NC + RRI^*)$$

where RR = response rate, FR = full response, PR = partial response, OR = outright refusal, CR = circumstantial refusal, RHQ = refusal to HQ, NC = non contact, RRI = refusal to re-interview, *applies to waves two to five only.

Weighting

The LFS uses calibration weighting. The weights are formed using a population weighting procedure which involves weighting data to sub-regional population estimates and then adjusting for the estimated age and sex composition by region (income weighted separately). Household datasets have household weights.

The household weight variable on the LFS always starts with PHHWT followed by two numbers that indicate the year this weight was created. For the APS the household weight starts with PHHWT but then has an 'A' before the last two numbers. The LFS and APS reflect only a sample of the total population. All cases are therefore weighted on the basis of sub-national population totals by age and sex to give estimates for the entire UK household population. This weight shows how many people in the population they are representing on that dataset. When carrying out analysis, you should always apply the weight.

A "calibration" weighting method is used. This is an iterative algorithm designed to produce individuals' weights that are consistent with three sets of population totals, or "partitions". These partitions are:

- Local authority totals for people aged 16+, by gender;
- Great Britain and Northern Ireland totals by gender and by single year of age for 16-24s and totals for 0-15 and 25+; and
- Regional totals by quinary age bands and by gender.

Questionnaires

Overview

All questions in the specification are laid out using the same format. Some questions (for instance USUWRKM) have a main group routed to them, but subsets of this group are asked variations of the question. In such cases the main routing is at the foot of the question as usual, and the subsets are listed separately above it, with the individual aspect of the routing indented slightly from the left of the page.

Data Collection

Data Collection Dates

Start	End	Cycle
1981	1981	N/A

Time Periods

Start	End	Cycle
1981	1981	N/A

Data Collection Mode

Face-to-face [f2f]

Data Collection Notes

Face-to-face interview; Telephone interview; the first interview is conducted face-to-face, and subsequent interviews by telephone where possible.

Questionnaires

All questions in the specification are laid out using the same format. Some questions (for instance USUWRKM) have a main group routed to them, but subsets of this group are asked variations of the question. In such cases the main routing is at the foot of the question as usual, and the subsets are listed separately above it, with the individual aspect of the routing indented slightly from the left of the page.

Supervision

A person is considered to have supervisory responsibilities when they supervise the work of at least one (other) person. He/she takes charge of the work of other employees, directs their work and sees that is satisfactorily carried out. Supervisory responsibility includes formal responsibility for directing other employees (other than apprentices), whom they supervise directly, sometimes doing some of the work they supervise and excludes quality control (check output of services but not the work produced by other persons) and consultancy. It should be considered the usual situation and not the situation only during the reference week. Sometimes job titles can be misleading. For example, a 'playground supervisor' supervises children not employees and so should be coded 2. Similarly, a 'store manager' may be a storekeeper and not a supervisor of employees.

Data Processing

Other Processing

The data were processed to the UK Data Archive's A* standard. This is the Archive's highest standard, and means that an extremely rigorous and comprehensive series of checks was carried out to ensure the quality of the data and documentation. Firstly, checks were made that the number of cases and variables matched the depositor's records. Secondly, checks were made that all variables had comprehensible variable labels and all nominal (categorical) variables had comprehensible value labels. Where possible, either with reference to the documentation and/or in communication with the depositor, labels were accordingly edited or created. Thirdly, logical checks were performed to ensure that nominal (categorical) variables had values within the range defined (either by value labels or in the depositor's documentation). Lastly, any data or documentation that breached confidentiality rules were altered or suppressed to preserve anonymity. All notable and/or outstanding problems discovered are detailed under the 'Data and documentation problems' heading below.

Data Appraisal

Estimates of Sampling Error

As with any sample survey, the results of the Labour Force Survey are subject to sampling errors. In addition, the results of any sample survey are affected by non-sampling errors, i.e. the whole variety of errors other than those due to sampling.

Number of rooms other than bedrooms or k (NOOTHRM)

File: GBR_1981_LFS_v01_M_STATA

Overview

Type: Continuous	Valid cases: 257877
Format: numeric	Invalid: 0
Width: 8	Minimum: 0
Decimals: 0	Maximum: 101
Range: 0-101	Mean: 6.7
	Standard deviation: 22.4

Number of other household shared with (NOHHSH)

File: GBR_1981_LFS_v01_M_STATA

Overview

Type: Continuous	Valid cases: 257877
Format: numeric	Invalid: 0
Width: 8	Minimum: 0
Decimals: 0	Maximum: 101
Range: 0-101	Mean: 91.4
	Standard deviation: 29.6

Age of youngest dependent child (AGYOUCH)

File: GBR_1981_LFS_v01_M_STATA

Overview

Type: Discrete	Valid cases: 257877
Format: numeric	Invalid: 0
Width: 8	
Decimals: 0	
Range: 0-17	

Number of economically active (earners) (EARNERS)

File: GBR_1981_LFS_v01_M_STATA

Overview

Type: Discrete	Valid cases: 257877
Format: numeric	Invalid: 0
Width: 8	
Decimals: 0	
Range: 0-4	

Address number (ADDNUMB)

File: GBR_1981_LFS_v01_M_STATA

Overview

Type: Continuous	Valid cases: 257877
Format: numeric	Invalid: 0
Width: 8	Minimum: 0
Decimals: 0	Maximum: 62
Range: 0-62	Mean: 21.6
	Standard deviation: 13.6

Household number (HONUMB)

File: GBR_1981_LFS_v01_M_STATA

Overview

Type: Continuous	Valid cases: 257877
Format: numeric	Invalid: 0
Width: 8	Minimum: 0
Decimals: 0	Maximum: 91
Range: 0-91	Mean: 0.9
	Standard deviation: 0.8

Number of households sampled at address (HHSAA)

File: GBR_1981_LFS_v01_M_STATA

Overview

Type: Continuous	Valid cases: 257877
Format: numeric	Invalid: 0
Width: 8	Minimum: 0
Decimals: 0	Maximum: 92
Range: 0-92	Mean: 0.3
	Standard deviation: 1.5

Number of households at sampled address (HOATADD)

File: GBR_1981_LFS_v01_M_STATA

Overview

Type: Continuous	Valid cases: 257877
Format: numeric	Invalid: 0
Width: 8	Minimum: 0
Decimals: 0	Maximum: 50
Range: 0-50	Mean: 1.2
	Standard deviation: 1.3

Stint number / interviewer's district nu (STINTNO)

File: GBR_1981_LFS_v01_M_STATA

Overview

Type: Continuous	Valid cases: 257877
Format: numeric	Invalid: 0
Width: 8	Minimum: 0
Decimals: 0	Maximum: 84
Range: 0-84	Mean: 8.9
	Standard deviation: 10.6

Family unit (FAMUNIT)

File: GBR_1981_LFS_v01_M_STATA

Overview

Type: Discrete	Valid cases: 257877
Format: numeric	Invalid: 0
Width: 8	
Decimals: 0	
Range: 0-0	

hhser (HHSER)

File: GBR_1981_LFS_v01_M_STATA

Overview

Type: Discrete	Valid cases: 257877
Format: numeric	Invalid: 0
Width: 8	
Decimals: 0	
Range: 0-0	

Number of people in family unit (FAMSIZE)

File: GBR_1981_LFS_v01_M_STATA

Overview

Type: Discrete	Valid cases: 257877
Format: numeric	Invalid: 0
Width: 8	
Decimals: 0	
Range: 0-0	

(v_WEIGHT0)

File: GBR_1981_LFS_v01_M_STATA

Overview

Type: Continuous	Valid cases: 257877
Format: numeric	Invalid: 0
Width: 10	Minimum: 0
Decimals: 0	Maximum: 438
Range: 0-438	Mean: 215.2
	Standard deviation: 73.6

Description
 he Palestinian Central Bureau of Statistics started conducting a continuous labour force household survey since October 1995.
 The main objective of collecting data on the labour force and its components, including employment, unemployment and underemployment, is to provide basic information on the size and structure of the Palestinian labour force. Data collected at different points in time provide a basis for monitoring current trends and changes in the labour market and in the employment situation. These data, supported with information on other aspects of the economy, provide a basis for the evaluation and analysis of macro-economic policie
