### Overview

---

**ABSTRACT**

Introduction

The Annual Survey of Industries (ASI) is the principal source of industrial statistics in India. It provides statistical information to assess and evaluate, objectively and realistically, the changes in the growth, composition and structure of organized manufacturing sector comprising activities related to manufacturing processes, repair

services, gas and water supply and cold storage. The survey has so far been conducted annually under the statutory provisions of the Collection of Statistics (COS) Act, 1953 and the rules framed there-under in 1959 except in the State of Jammu & Kashmir where it is conducted under the J&K Collection of Statistics Act, 1961 and rules framed there under in 1964. From ASI 2010-11 onwards, the survey is to be conducted annually under the statutory provisions of the Collection of Statistics (COS) Act, 2008 and the rules framed there-under in 2011 except in the State of Jammu & Kashmir where it is to be conducted under the J&K Collection of Statistics Act, 1961 and rules framed there under in 1964.

**KIND OF DATA**

Census/enumeration data [cen]

**UNITS OF ANALYSIS**

The primary unit of enumeration in the survey is a factory in the case of manufacturing industries, a workshop in the case of repair services, an undertaking or a licensee in the case of electricity, gas & water supply undertakings and an establishment in the case of bidi & cigar industries. The owner of two or more establishments located in the same State and pertaining to the same industry group and belonging to same scheme (census or sample) is, however, permitted to furnish a single consolidated return. Such consolidated returns are common feature in the case of bidi and cigar establishments, electricity and certain public sector undertakings.

### Scope

---

**NOTES**

ASI schedule is the basic tool to collect required data for the factories registered under Sections 2(m)(i) and 2(m)(ii) of the Factories Act, 1948. The schedule for ASI, at present, has two parts. Part-I of ASI schedule, processed at the CSO (IS Wing), Kolkata, aims to collect data on assets and liabilities, employment and labour cost, receipts, expenses, input items: indigenous and imported, products and by-products, distributive expenses, etc. Part-II of ASI schedule is processed by the Labour Bureau. It aims to collect data on different aspects of labour statistics, namely, working days, mandays worked, absenteeism, labour turnover, man-hours worked etc.

**TOPICS**

Topic	Vocabulary	URI
Macroeconomics & Growth	World Bank	<a href="http://www.surveynetwork.org/toolkit">http://www.surveynetwork.org/toolkit</a>

Topic	Vocabulary	URI

**KEYWORDS**

FIXED CAPITAL, WORKING CAPITAL, EMPLOYEES, WAGES AND SALARIES, TOTAL EMOLUMENTS, FUELS CONSUMED, DEPRECIATION, NET VALUE ADDED, TOTAL INPUT, TOTAL OUTPUT, BLOCK-A (IDENTIFICATION BLOCK FOR OFFICIAL USE), BLOCK-B (TO BE FILLED BY OWNERS), BLOCK-C (FIXED ASSETS), BLOCK-D (WORKING CAPITAL AND LOANS), BLOCK-E (EMPLOYMENT AND LABOUR COST), BLOCK-F (OTHER EXPENSES), BLOCK-G (OTHER OUTPUT/RECEIPTS), BLOCK-H (INPUT ITEMS - Indigenous items consumed), BLOCK-I (INPUT ITEMS - Directly imported items only (consumed)), BLOCK-J (PRODUCTS AND BY-PRODUCTS (Manufactured by the unit))

**Coverage****GEOGRAPHIC COVERAGE**

The ASI extends its coverage to the entire country. It covers all factories registered under Sections 2(m)(i) and 2(m)(ii) of the Factories Act, 1948, where the manufacturing process is defined under Section 2(k) of the said Act. The survey also covers bidi and cigar manufacturing establishments registered under the Bidi and Cigar Workers (Conditions of Employment) Act 1966. All electricity undertakings engaged in generation, transmission and distribution of electricity registered with the Central Electricity Authority (CEA) were also covered under ASI irrespective of their employment size till ASI 1997-98. Defence establishments, oil storage and distribution depots etc. are excluded from the purview of the survey.

**UNIVERSE**

The survey cover factories registered under the Factory Act 1948.

# Sampling

## Sampling Procedure

---

The sampling design adopted in ASI has undergone considerable changes from time to time, taking into account the technical and other requirements. The present sampling design has been adopted from ASI 2007-08. All the factories in the updated frame are divided into two sectors, viz., Census and Sample.

For ASI 2007-2008, the Census Sector has been defined as follows:

a) All industrial units belonging to the five less industrially developed states/ UT's viz. Manipur, Meghalaya, Nagaland, Tripura and Andaman & Nicobar Islands.

b) For the rest of the twenty-six states/ UT's., (i) units having 100 or more workers, and (ii) all factories covered under Joint Returns.

c) After excluding the Census Sector units as defined above, all units belonging to the strata (State by 4-digit of NIC-08) having less than or equal to 4 units are also considered as Census Sector units.

Sample Sector: From the remaining units excluding those of Census Sector, called the sample sector, samples are drawn circular systematically considering sampling fraction of 20% within each stratum (State X Sector X 4-digit NIC) for all the states. An even number of units with a minimum of 4 are selected and evenly distributed in two sub-samples. The sectors considered here are Biri, Manufacturing and Electricity.

Selection of State Samples: After selecting the central sample in the way mentioned above, the remaining units in the sample sector are treated as residual frame for selection of sample units for the States/UTs. Note that for the purpose of selecting samples from the residual frame for the State/UTs, stratification is done afresh by grouping units belonging to District X 3- digit NIC for each state to form strata. The sample units are then drawn circular systematically from each stratum. The basic purpose of introducing the residual sample was to increase the sample size for the sample sector of the states so as to get more reliable estimates at district level.

Validated state-wise unit-level data of the central sample are also sent to the states for pooling this data with their surveyed data to get a combined estimate at the sub-state level.

## Deviations from Sample Design

---

The sampling design adopted in ASI has undergone considerable changes from time to time, taking into account the technical and other requirements. The present sampling design has been adopted from ASI 2007-08. All the factories in the updated frame are divided into two sectors, viz., Census and Sample.

## Weighting

---

WGT (Multiplier Factor) is the weighing variable from Block A : Identification Block.

For Census data WGT has been given weight as 1.

# Questionnaires

## Overview

---

Annual Survey of Industries Questionnaire is divided into different blocks:

**BLOCK A: IDENTIFICATION BLOCK** - This block has been designed to collect the descriptive identification of the sample enterprise. The items are mostly self-explanatory.

**BLOCK B: TO BE FILLED BY OWNER OF THE FACTORY** - This block has been designed to collect the particulars of the sample enterprise. This point onwards, all the facts and figures in this return are to be filled in by owner of the factory.

**BLOCK C: FIXED ASSETS** - Fixed assets are of a permanent nature having a productive life of more than one year, which is meant for earning revenue directly or indirectly and not for the purpose of sale in ordinary course of business. They include assets used for production, transportation, living or recreational facilities, hospital, school, etc. Intangible fixed assets like goodwill, preliminary expenses including drawing and design etc are excluded for the purpose of ASI. The fixed assets have, at the start of their functions, a definite value, which decreases with wear and tear. The original cost less depreciation indicates that part of value of fixed assets, which has not yet been transferred to the output. This value is called the residual value. The value of a fixed asset, which has completed its theoretical working life should always be recorded as Re.1/-. The revalued value is considered now. But depreciation will be taken on original cost and not on revalued cost.

**BLOCK D: WORKING CAPITAL & LOANS** - Working capital represents the excess of total current assets over total current liabilities.

**BLOCK E : EMPLOYMENT AND LABOUR COST** - Particulars in this block should relate to all persons who work in and for the establishment including working proprietors and active business partners and unpaid family workers. However, Directors of incorporated enterprises who are paid solely for their attendance at meeting of the Board of Directors are to be excluded.

**BLOCK F : OTHER EXPENSES** - This block includes the cost of other inputs as both the industrial and nonindustrial service rendered by others, which are paid by the factory and most of which are reflected in the ex-factory value of its production during the accounting year.

**BLOCK G : OTHER INCOMES** - In this block, information on other output/receipts is to be reported.

**BLOCK H: INPUT ITEMS (indigenous items consumed)** - This block covers all those goods (raw materials, components, chemicals, packing material, etc.), which entered into the production process of the factory during the accounting year. Any material used in the production of fixed assets (including construction work) for the factory's own use should also be included. All intermediate products consumed during the year are to be excluded. Intermediate products are those, which are produced by the factory but are, subjected to further manufacture. For example, in a cotton textile mill, yarn is produced from raw cotton and the same yarn is again used for manufacture of cloth. An intermediate product may also be a final product in the same factory. For example, if the yarn produced by the factory is sold as yarn, it becomes a final product and not an intermediate product. If however, a part of the yarn produced by a factory is consumed by it for manufacture of cloth, that part of the yarn so used will be an intermediate product.

**BLOCK I: INPUT ITEMS - directly imported items only (consumed)** - Information in this block is to be reported for all imported items consumed. The items are to be imported by the factory directly or otherwise. The instructions for filling up of this block are same as those for Block H. All imported goods irrespective of whether they are imported directly by the unit or not, should be recorded in Block I. Moreover, any imported item, irrespective of whether it is a basic item for manufacturing or not, should be recorded in Block I. Hence 'consumable stores' or 'packing items', if imported, should be recorded in Block I and not in Block H.

**BLOCK J: PRODUCTS AND BY-PRODUCTS (manufactured by the unit)** - In this block information like quantity manufactured, quantity sold, gross sale value, excise duty, sales tax paid and other distributive expenses, per unit net sale value and ex-factory value of output will be furnished by the factory item by item. If the distributive expenses are not available product-wise, the details may be given on the basis of reasonable estimation.

## Data Collection

### Data Collection Dates

Start	End	Cycle
2011-09-01	2012-03-31	N/A

### Data Collection Mode

Statutory return submitted by factories as well as Face to Face

### Data Collection Notes

ASI Schedule has two parts: Part-I and Part-II. Part-I of ASI schedule aims to collect data on assets and liabilities, employment and labour cost, receipts, expenses, input items - indigenous and imported, products and byproducts, distributive expenses etc. Part-II of ASI schedule aims to collect data on different aspects of labour statistics, namely, working days, mandays worked, absenteeism, labour turnover, man-hours worked, earning and social security benefits.

The major additions and deletions of items in ASI 2010-11 schedules in comparison to ASI 2009-10 schedules are given below.

- (a) Information on 'How many total number of units the company has' collected in Block B of ASI 2009-10 has been dropped.
- (b) Information on 'Original value of investment in plant and machinery (range code)' collected in Block B of ASI 2009-10 has been dropped. Information on 'Subsidy' will be additionally collected in Block-G.
- (c) Item codes in Blocks H, I and J are now to be reported as per NPCMS, 2011 instead of ASICC.

The Joint Return should only be compiled in the following cases:

- (i) The units must be having the same State code;
- (ii) The units should have the same management;
- (iii) Separate unit-wise accounts are not available and only combined accounts are available;
- (iv) Resources that go into the manufacturing activity in the units are not separately identifiable;
- (v) The units may not have the same industry group at 4 digit NIC level, but satisfy the aforementioned conditions. However, all the units included in Joint Return must be engaged in manufacturing and if the combined accounts include other activities, those should be excluded.

In no case a unit belonging of Census Sector will be the joint unit with a unit of Sample Sector. If such a situation arises due to augmentation of frame in respect of the units pertaining to the supplementary frame, information pertaining to the Sample Sector unit(s) needs to be suitably apportioned and separate return should be filled in for each of them. Please note that in case of sample sector the number of units will be always 1.

Block A, item 12: status of units: This item will be recorded in codes. The number of „status of unit? codes used in ASI - being too many - has been rationalised and are given below:

- Open ..... 1,
- Closed (for less than or equal to 3 years)..... 2,
- NOP (for less than or equal to 3 years)..... 3,
- Deleted ..... 4,
- Existing but non-response due to closure and owner / occupier is not traceable..... 5
- Non-response due to non-existence and owner not traceable (incl. the case of non-existent for more than 3 years) ..... 6
- Non-response due to production not yet started or accounting year not closed during the year ..... 7
- Non-response due to other reasons [incl. relevant records are with Court / Income tax or recalcitrant/refuse to submit the return, or factory under prosecution in respect of earlier ASI].... 8
- Deleted due to any other reason (incl. de-registration; out of coverage i.e. defence, oil storage, technical training Institute etc. and hotel , etc; and other reason) ..... 9

The following may be noted:

A unit is considered to be closed if the unit is maintaining staff but not having production. Such units will be assigned code 2 only if the information in respect of assets, employee etc. are available. On the other hand, if the unit is existing but no information is available due to closure and owner/occupier is not traceable, the

unit will be assigned the code 5.

A unit is considered to be Non Operating (NOP) if the unit remained closed for 3 consecutive years or it has no production and not maintaining the staff. A NOP unit will be assigned code 3 only if the information in respect of assets, etc. are available. Else it will be assigned code 5.

A unit is considered for deletion and code 4 will be assigned if the unit is having continuous status of NOP for three years or more, and proposed by FOD for deletion from the frame.

Code 7 will be assigned in the cases where a new unit has not started its production or did not close the account during the accounting year.

No code other than the codes 1-9 can be given here. In no case this item will be left blank.

## Questionnaires

---

Annual Survey of Industries Questionnaire is divided into different blocks:

**BLOCK A. IDENTIFICATION BLOCK** - This block has been designed to collect the descriptive identification of the sample enterprise. The items are mostly self-explanatory.

**BLOCK B. TO BE FILLED BY OWNER OF THE FACTORY** - This block has been designed to collect the particulars of the sample enterprise. This point onwards, all the facts and figures in this return are to be filled in by owner of the factory.

**BLOCK C: FIXED ASSETS** - Fixed assets are of a permanent nature having a productive life of more than one year, which is meant for earning revenue directly or indirectly and not for the purpose of sale in ordinary course of business. They include assets used for production, transportation, living or recreational facilities, hospital, school, etc. Intangible fixed assets like goodwill, preliminary expenses including drawing and design etc are excluded for the purpose of ASI. The fixed assets have, at the start of their functions, a definite value, which decreases with wear and tear. The original cost less depreciation indicates that part of value of fixed assets, which has not yet been transferred to the output. This value is called the residual value. The value of a fixed asset, which has completed its theoretical working life should always be recorded as Re.1/-. The revalued value is considered now. But depreciation will be taken on original cost and not on revalued cost.

**BLOCK D: WORKING CAPITAL & LOANS** - Working capital represents the excess of total current assets over total current liabilities.

**BLOCK E : EMPLOYMENT AND LABOUR COST** - Particulars in this block should relate to all persons who work in and for the establishment including working proprietors and active business partners and unpaid family workers. However, Directors of incorporated enterprises who are paid solely for their attendance at meeting of the Board of Directors are to be excluded.

**BLOCK F : OTHER EXPENSES** - This block includes the cost of other inputs as both the industrial and nonindustrial service rendered by others, which are paid by the factory and most of which are reflected in the ex-factory value of its production during the accounting year.

**BLOCK G : OTHER INCOMES** - In this block, information on other output/receipts is to be reported.

**BLOCK H: INPUT ITEMS (indigenous items consumed)** - This block covers all those goods (raw materials, components, chemicals, packing material, etc.), which entered into the production process of the factory during the accounting year. Any material used in the production of fixed assets (including construction work) for the factory's own use should also be included. All intermediate products consumed during the year are to be excluded. Intermediate products are those, which are produced by the factory but are, subjected to further manufacture. For example, in a cotton textile mill, yarn is produced from raw cotton and the same yarn is again used for manufacture of cloth. An intermediate product may also be a final product in the same factory. For example, if the yarn produced by the factory is sold as yarn, it becomes a final product and not an intermediate product. If however, a part of the yarn produced by a factory is consumed by it for manufacture of cloth, that part of the yarn so used will be an intermediate product.

**BLOCK I: INPUT ITEMS – directly imported items only (consumed)** - Information in this block is to be reported for all imported items consumed. The items are to be imported by the factory directly or otherwise. The instructions for filling up of this block are same as those for Block H. All imported goods irrespective of whether they are imported directly by the unit or not, should be recorded in Block I. Moreover, any imported item, irrespective of whether it is a basic item for manufacturing or not, should be recorded in Block I. Hence 'consumable stores' or 'packing items', if imported, should be recorded in Block I

and not in Block H.

**BLOCK J: PRODUCTS AND BY-PRODUCTS (manufactured by the unit)** - In this block information like quantity manufactured, quantity sold, gross sale value, excise duty, sales tax paid and other distributive expenses, per unit net sale value and ex-factory value of output will be furnished by the factory item by item. If the distributive expenses are not available product-wise, the details may be given on the basis of reasonable estimation.

## Data Collectors

<b>Name</b>	<b>Abbreviation</b>	<b>Affiliation</b>
Field Operation Division, NSSO	NSSO( FOD)	Ministry of Statistics and Programme Implementation

## Supervision

NSSO under the the Ministry of Statistics and PI, Government of India is responsible for supervision of data collection.

The collection of statistics act and rules framed there under has been revised. As per revised rules 2011 under the Collection of Statistical Act 2008, the consultation of Nodal Officer of Central Government is mandatory for conducting any Survey (Section 5[2]). The Nodal Officer is a designated Officer, not below the rank of Joint Secretary, Government of India of nodal department dealing with Statistical matters, for exercising powers and performing duties under these rules (Section 3[1]). Now under the revised rules (Rule 7), a Statistics Officer for a specified period and specified territory is required to be appointed (Section 4 of the revised Act 2008) to conduct the Survey. The statistics Officer is empowered by the Act (Sub-section 4 or 6 of Section 4 of the Act) to collect or authorize officials to collect information from any industrial and commercial concern.

## Data Processing

### Data Editing

---

Data submitted by the factories undergo manual scrutiny at different stages.

- 1) They are verified by field staff of NSSO from factory records.
- 2) Verified returns are manually scrutinized by senior level staff before sending to data processing centre.
- 3) At the data processing centre these are scrutinized before data entry.
- 4) The entered data are subjected to computer editing and corrections.
- 5) Tabulated data are checked for anomalies and consistency with previous results.

### Other Processing

---

1) Scrutiny of the filled-in-returns is another important measure for maintaining quality of ASI data. It also facilitates taking immediate steps to apprise the concerned field worker about the mistakes committed by him. Therefore, the scrutiny work is to be taken up immediately after the Supdt. / Sr.Supdts has submitted the schedules to the concerned Supdt. / Sr. Supdt. He/She should scrutinise thoroughly all the returns submitted by each Superintendents/ Sr.Supdts in accordance with the scrutiny instructions issued by the headquarters from time to time. Superintendents/ Sr.Supdts is required to note down the scrutiny points including arithmetical check, identification details/discrepancies noticed with the help of the attached Investigator on the prescribed scrutiny sheet. The Superintendents/ Sr.Supdts are required to furnish the clarifications on the scrutiny points promptly. On receipt of the clarifications, the concerned officers should examine and incorporate corrections, if any, in the returns and attach the clarification with the office copy.

2) All the errors or mistakes observed during the course of scrutiny in a month should be discussed in the monthly meeting for the benefit of all the field staff. All Group A officers are also required to super scrutinise atleast the prescribed number of returns pertaining to their region in an ASI. The errors and mistakes observed during the course of scrutiny/inspection may be analyzed and documented by the Superintendents/ Sr.Supdts of SRO / NSRO and a monthly feed-back be sent to Zonal Office by the Regional Office who will arrange to issue consolidated feed-back reports based on scrutiny, inspection etc.

3) All Regional Heads have to ensure that all schedules are thoroughly scrutinized before dispatch to Tabulating Agencies. In order to improve the effectiveness of scrutiny in the context of ensuring better reliability and accuracy of data, the active involvement of Headquarters and Zonal Offices have been actively involved in the super scrutiny of ASI returns.

4) All the Regional Offices are required to send for super scrutiny top ten returns (in terms of workers) to the Headquarters Office, New Delhi. The next top 50 returns (in terms of workers) of each Regional Office will be scrutinized at the concerned Zonal Office. The Regional Office will send copies (not originals) of the returns, balance sheet, P&L Account, Schedules and working sheets to the concerned offices accordingly. For expeditious completion of the process of scrutiny and updation the concerned offices shall correspond with each other through e-mail / fax/ speed post. It may be ensured that the returns to be scrutinized by Headquarters / ZO, are completed and scrutinized on priority and forwarded to Headquarters / ZO immediately. The original returns after the completion of the scrutiny process and updation, where necessary will have to be dispatched by the concerned ROs to the TAs. 4.5.5 In addition to the above, the Zonal Offices may take steps to scrutinize top 2 returns (in terms of employment) of each charge at the NSROs/SROs under their jurisdiction not covered through (i) above.

## **Data Appraisal**

### **Estimates of Sampling Error**

Relative Standard Error (RSE) is calculated in terms of worker, wages to worker and GVA using the formula (Please refer to Estimation Procedure document in external resources).

### **Other forms of Data Appraisal**

To check for consistency and reliability of data the same are compared with the NIC-2digit level growth rate at all India Index of Production (IIP) and the growth rates obtained from the National Accounts Statistics at current and constant prices for the registered manufacturing sector.

# File Description

# Variable List

**blka201011**

Content	Block - A- Identification Particulars : The file contains the Identification variables of Factory. It also contains the weighting coefficient or Multiplier - WGT. Variables under this blocks are: YR, DSL common in all the blocks and may be used for relation. Other Identification variables are Scheme, State, NIC 5 digit, District and Sector. Variables representing Number of Factories A_Itm_11, Status of factory A_Itm_12, Bonus E_Itm_10, PF, Welfare expenses, Number of various working days and Total cost of production posted from Block E. Also one variable is Share (%) of products J_Itm_13 from Block K. Variable names are as per Record Layout where Letter represents Block followed by Itm<No> like A_Itm1, A_Itm2 etc . In the record layout these are defined as A1, A2...and so on.
Cases	52243
Variable(s)	22

**blkc201011**

Content	Block - C - fixed assets : The file contains Fixed Assets details. Fixed assets are those, which have generally normal productive life of more than one year; it covers all type of assets, new or used or own constructed, deployed for productions, transportation, living or recreational facilities, hospitals, schools, etc. for factory personnel; it would include land, building, plant and machinery, transport equipment, etc.; it includes the fixed assets of the head office allocable to the factory and also the full value of assets taken on hire-purchase basis (whether fully paid or not) excluding interest element; it excludes intangible assets and assets solely used for post-manufacturing activities such as, sale, storage, distribution, etc. Fields in this blocks are: YR, DSL, Item number of the type of assets, Gross value : Opening as on, due to revaluation, actual addition, deduction & adjustment during the year and Closing as on. Depreciation: upto year beginning, provided during the year, adjustments during the year and upto year end, Net Value: opening as on, closing as on. Variable names are as per Record Layout where Letter represents Block followed by ltm<No> like C_ltm1, C_ltm2 etc . In the record layout these are defined as C_I1,C_I2..and so on.

**blkd201011**

Content	Working capital represents the excess of total current assets over total current liabilities. Working capital and loans: This is defined to include all physical inventories owned, held or controlled by the factory as on the closing day of the accounting year such as the materials, fuels and lubricants, stores, etc. that enter into products manufactured by the factory itself or supplied by the factory to others for processing. Physical working capital also includes the value of stock of materials, fuels and stores, etc. purchased expressly for re-sale, semi-finished goods and goods-in-process on account of others and goods made by the factory which are ready for sale at the end of the accounting year. However, it does not include the stock of the materials, fuels, stores, etc. supplied by others to the factory for processing. Finished goods processed by others from raw materials supplied by the factory and held by them are included and finished goods processed by the factory from raw materials supplied by others, are excluded. Outstanding loans represent all loans, whether short-term or long-term, whether interest bearing or not, outstanding according to the books of the factory as on the closing day of accounting year. Fields in this block are : YR, DSL, Item serial no., Working capital : opening (Rs.) , Closing (Rs.), Variable names are as per Record Layout where Letter represents Block followed by ltm<No> like D_ltm1, D_ltm2 etc . In the record layout these are defined as D_I1, D_I2...and so on

Content	Block E - Employment and Labour cost : Information collected in this block is regarding employment and labour cost. In this block emoluments of the employees to be collected. Emoluments are defined as wages paid to all employees plus imputed value of benefits in kind, i.e., the net cost to the employers on those goods and services provided to employees free of charge or at markedly reduced cost which are clearly and primarily of benefit to the employees as consumers. It includes profit sharing, festival and other bonuses and ex-gratia payments paid at less frequent intervals (i.e. other than bonus paid more or less regularly for each period). Benefits in kind include supplies or services rendered such as housing, medical, education and recreation facilities. Personal insurance, income tax, house rent allowance, conveyance, etc. for payment by the factory also is included in the emoluments. The variables are : YR, DSL, Item No. representing category of staff- male workers, female workes, workers employed through contractors, supervisory staff, unpaid family members, Mandays (Manufacturing), Mandays (non-manufacturing), Average number of persons worked, No. of mandays paid for, Wages/salaries Variable names are as per Record Layout where Letter represents Block followed by ltm<No> like E_ltm1, E_ltm2 etc . In the record layout these are defined as E_i1, E_i2...and so on

Content	Block - F Other Expenses : (All the items are Expenditure incurred in Rs.) This block includes the cost of other inputs as both the industrial and nonindustrial service rendered by others, which are paid by the factory and most of which are reflected in the ex-factory value of its production during the accounting year. Variables in this block are: YR, DSL, work done by others, repair & maintenance of building, Repair & maintenance of fixed assets, operating expenses, non-operating expenses, Insurance charges, Rent paid for plant & machinery and other fixed assets, Total expenses, Rent paid for buildings, Rent/Royalties, Interest paid and Purchase value of goods sold in the same condition as purchased. Variable names are as per Record Layout where Letter represents Block followed by Itm<No> like F_Itm1, F_Itm2 etc . In the record layout these are defined as F1, F2...and so on.

**blkh201011**

Content	Block H: indigenous input items consumed: This block covers all the goods (raw materials, components, chemicals, packing material, etc.) which entered into the production process of the factory during the accounting year. Any material used in the production of fixed assets (including construction work) for the factory's own use should also be included. All intermediate products consumed during the year are to be excluded. Intermediate products are those, which are produced by the factory but are, subjected to further manufacture. For example, in a cotton textile mill, yarn is produced from raw cotton and the same yarn is again used for manufacture of cloth. An intermediate product may also be a final product in the same factory. For example, if the yarn produced by the factory is sold as yarn, it becomes a final product and not an intermediate product. If however, a part of the yarn produced by a factory is consumed by it for manufacture of cloth, that part of the yarn so used will be an intermediate product.

**blkI201011**

Content	Block I: imported input items consumed Information in this block is to be reported for all imported items consumed. The items are to be imported by the factory directly or otherwise. All imported goods irrespective of whether they are imported directly by the unit or not, should be recorded in Block I. Moreover, any imported item, irrespective of whether it is a basic item for manufacturing or not, should be recorded in Block I. Hence "consumable stores" or "packing items", if imported, should be recorded in Block I and not in Block H.

Range: 10001-85959	Mean: 50078.1
	Standard deviation: 24059.2

**Description**

Despatch Serial number (DSL) numbers are unique across the region for a particular year of survey. However, the same factory may have different DSL numbers in different years of survey.

**Pre question**

Despatch Serial number (DSL)

**PSL (PSL)**

File: blka201011

**Overview**

Type: Discrete	Valid cases: 52243
Format: character	Invalid: 0
Width: 5	

**Description**

The Permanent Serial Number (PSL) is unique in State X NIC X Sector. Permanent Serial Number has been provided for all the selected factories both under Census Sector and the Sample Sector and the same is to be reported by the field staff of FOD.

**PSL (PSL)**

File: blka201011

**Pre question**

Permanent Serial Number (PSL)

**Scheme Code (Scheme)**

File: blka201011

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 1-2

Valid cases: 52243  
 Invalid: 0

**Description**

This is the code usually given for census and sample units as per sampling design. The census unit is given code 1 and sample unit is given code 2.

**Pre question**

Scheme Code (Census -1, Sample -2)

**NIC 4 digit (NIC4digit)**

File: blka201011

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 4  
 Decimals: 0  
 Range: 9999-9999

Valid cases: 52243  
 Invalid: 0

**Description**

Industry code as per frame: This number is provided by FOD offices while collecting the list from CIF as per detail given during registration. This code is given as per NIC 2008.

**Pre question**

Ind. Code (4-digit level of NIC-2008). Not provided as such coded 9999.

**NIC 5 digit (NIC5digit)**

File: blka201011

**Overview**

Type: Continuous  
 Format: numeric  
 Width: 5  
 Decimals: 0  
 Range: 1631-96010

Valid cases: 52243  
 Invalid: 0  
 Minimum: 1631  
 Maximum: 96010  
 Mean: 20911  
 Standard deviation: 9530.4

**Description**

Industry code as per return: This code is given as per maximum ex-factory value of output of major activities of the multiple products and byproducts manufactured by the units. A valid NIC code needs to be given from NIC 2008.

**Pre question**

Industry code as per return: A valid NIC code needs to be given from NIC 2008.

**State Code (StateCode)**

File: blka201011

**Overview**

Type: Discrete	Valid cases: 52243
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 1-35	

**Description**

The code has been provided for all the selected factories both under Census Sector and the Sample Sector.

**Pre question**

State code for the states of India.

**District Code (District)**

File: blka201011

**Overview**

Type: Discrete	Valid cases: 52243
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 99-99	

**Description**

District code indicates district of the given State.

**Rural Urban Code (Rural\_Urban)**

File: blka201011

**Overview**

Type: Discrete	Valid cases: 52243
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 1-2	

**Description**

This code is to be given by FOD offices according to the location of the units. The codes for units located in the rural areas are 1 and for those in the urban areas are 2. No other code except 1 and 2 can be given here; nor should it be left blank.

**Pre question**

The codes for units located in the rural areas are 1 and for those in the urban areas are 2.

**RO SRO Code (RO\_SRO)**

File: blka201011

**Overview**

Type: Discrete	Valid cases: 52243
Format: numeric	Invalid: 0
Width: 5	
Decimals: 0	
Range: 99999-99999	

**Description**

The code has been provided for all the selected factories both under Census Sector and the Sample Sector and the same is to be reported by the field staff of FOD. This code is not provided as such it is recorded as 9999.

**Pre question**

**RO SRO Code (RO\_SRO)**

File: blka201011

This code is not provided as such it is recorded as 9999.

**No of Units (NoofUnits)**

File: blka201011

**Overview**

Type: Continuous	Valid cases: 52243
Format: numeric	Invalid: 0
Width: 2	Minimum: 1
Decimals: 0	Maximum: 60
Range: 1-60	Mean: 1.1
	Standard deviation: 0.6

**Description**

Number of units for which the schedule (return) is compiled will be recorded against this item. Here the number of units will be greater than 1 in the case of joint returns.

**Pre question**

Number of units for which the schedule (return) is compiled.

**Status of unit (Statusofunit)**

File: blka201011

**Overview**

Type: Discrete	Valid cases: 52243
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 1-9	

**Description**

The number of 'status of unit' codes used in ASI - being too many - has been rationalised and are given below:

- Open ..... 1,  
 Closed (for less than or equal to 3 years)..... 2,  
 NOP (for less than or equal to 3 years)..... 3,  
 Deleted ..... 4,  
 Existing but non-response due to closure and  
 owner / occupier is not traceable..... 5  
 Non-response due to non-existence and owner not traceable  
 (incl. the case of non-existent for more than 3 years) ..... 6  
 Non-response due to production not yet started or  
 accounting year not closed during the year ..... 7  
 Non-response due to other reasons [incl. relevant records are with  
 Court / Income tax or recalcitrant/refuse to submit the return,  
 or factory under prosecution in respect of earlier ASI].... 8  
 Deleted due to any other reason (incl. de-registration; out of coverage  
 i.e. defence, oil storage, technical training Institute etc.  
 and hotel , etc; and other reason) ..... 9

**Pre question**

Status of unit (code).

**Bonus (Bonus)**

File: blka201011

**Overview**

**Bonus (Bonus)**

### Pre question

Type of Organisation

## Type of Ownership (TypeofOwn)

File: blk201011

### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-6

Valid cases: 44624  
 Invalid: 0

### Description

Type of ownership

### Pre question

Type of ownership

## Whether unit has ISO Certification, 14000 Series (ISO)

File: blk201011

### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-2

Valid cases: 44624  
 Invalid: 0

### Description

Whether unit has ISO Certification, 14000 Series

If the units is having ISO Certificate of 14000 series, code 1 will be recorded, otherwise code 2 will be recorded. Note that the certification must be of 14000 series for recording „yes?. If for a factory, the ISO Certification 14000 series does not apply, it should be given the code 2.

### Pre question

Whether unit has ISO Certification, 14000 Series

## Year of Initial Production (YearofInProd)

File: blk201011

### Overview

## Year of Initial Production (YearofInProd)

File: blk201011

Type: Continuous	Valid cases: 44624
Format: numeric	Invalid: 0
Width: 4	Minimum: 0
Decimals: 0	Maximum: 2011
Range: 0-2011	Mean: 1963.1
	Standard deviation: 243.5

### Description

Year of initial production (in the format YYYY)

### Pre question

The year of initial production for the factory (and not the year of the completion of factory) is to be recorded here.

## Accounting Year From (AccYrFr)

File: blk201011

### Overview

Type: Continuous	Valid cases: 44624
Format: numeric	Invalid: 0
Width: 8	Minimum: -2010
Decimals: 0	Maximum: 20000000
Range: -2010-20000000	Mean: 11587.8
	Standard deviation: 134012.5

### Description

Accounting year (in the format YYYY to YYYY): The accounting year for which the return relates to, is to be reported here.

### Pre question

Accounting year (in the format YYYY to YYYY): The accounting year for which the return relates to, is to be reported here.

## Accounting Year To (AccYrTo)

File: blk201011

### Overview

Type: Continuous	Valid cases: 44624
Format: numeric	Invalid: 0
Width: 8	Minimum: 0
Decimals: 0	Maximum: 30000000
Range: 0-30000000	Mean: 278505.3
	Standard deviation: 2860864.2

### Description

Accounting year (in the format YYYY to YYYY): The accounting year for which the return relates to, is to be reported here.

### Pre question

Accounting year (in the format YYYY to YYYY): The accounting year for which the return relates to, is to be reported here.

## Number of months in operation (Opermnth)

File: blk201011

### Overview

Type: Continuous	Valid cases: 44624
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 0-12	

### Description

## Number of months in operation (Opermnth)

File: blk201011

Number of months of operation: This item is to record the total number of months in which the factory/industrial concern operated during the accounting year.

### Pre question

Number of months of operation: This item is to record the total number of months in which the factory/industrial concern operated during the accounting year.

## Does your unit have computerised A/C System? (CompAC)

File: blk201011

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-2

Valid cases: 44624  
Invalid: 0

### Description

Does your unit have computerised accounting system? The unit will be considered to have computerized accounting system if they are managing the accounting system using computerized software, and code 1 will be recorded in such cases. Otherwise, code 2 will be recorded.

### Pre question

Does your unit have computerised accounting system? The unit will be considered to have computerized accounting system if they are managing the accounting system using computerized software

## Can your unit supply ASI data in Computer Floppy (SupplyData)

File: blk201011

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-2

Valid cases: 44624  
Invalid: 0

### Description

Can your unit supply ASI data in computer media? If the unit is provided with the soft copy of the return and is able to supply data in soft mode as per the return through computer media, code 1 will be recorded in this item, else code 2.

### Pre question

Can your unit supply ASI data in computer media?

**Year (Year)**

File: blkc201011

**Overview**

Type: Discrete	Valid cases: 312863
Format: numeric	Invalid: 0
Width: 4	
Decimals: 0

## Work done by others (workdoneby)

File: blkf201011

work done by others on material supplied by the Industrial/ Undertaking: This covers payments made by the factory for contract and commission  
work done by others on materials supplied by the factory during the year. Payments to home workers and cost of similar work carried out by the factory?s sister concerns are to be included.

### Pre question

Work done by others

## Repair and Manintenance of Building & other construction (Rep\_Maint\_buldg)

File: blkf201011

### Overview

Type: Continuous	Valid cases: 44088
Format: numeric	Invalid: 0
Width: 9	Minimum: 0
Decimals: 0	Maximum: 479200000
Range: 0-479200000	Mean: 850063.2
	Standard deviation: 6423511.7

### Description

The cost of materials consumed by the factory for repair and maintenance of buildings, plant & machinery, pollution control equipment and other fixed assets and cost of repairs and maintenance carried out by others to the factory?s sister concerns is to be included but capitalized repairs are not included. It should be noted that materials consumed for repair and maintenance and those commodities that help to keep the fixed assets of a factory in shape and in a serviceable condition are distinguished from consumable stores, i.e., commodities which indirectly help in production, without having anything to do with the upkeep of fixed assets of the factory. Consumable stores will not be reported here.

Decimals: 0	Maximum: 31657705112
Range: 0-31657705112	Mean: 27789427.7
	Standard deviation: 286153511.7

**Description**

## Income from Services (Income\_serv)

File: blk201011

Income from services (industrial/non-industrial including work done for others on materials supplied by them): This item includes receipts for work done for others or for services of an industrial nature rendered to others, as for example contract or commission work done for other establishments on their materials or repair and maintenance on machinery and equipment, whether such services are rendered inside or outside the factory premises. The value reported should be the total amount charged to customers for the work or services performed. It also includes all receipts of the factory from others for services of non-industrial nature such as transportation, agency, consultancy, etc. Income due to exchange rate fluctuation should be included here.

### Literal question

Income from services (industrial/non-industrial including work done for others on materials supplied by them)

## variation in stock of semi-finished goods (Var\_st\_semi\_Fin)

File: blk201011

Range: 0-58347708000	Mean: 53315567.1
	Standard deviation: 565848174.5

### Description

Sale value of goods sold in the same condition as purchased: The sale value, ex-factory of all goods sold in the accounting year in the same condition as purchased is to be reported.

### Literal question

Sale value of goods sold in the same condition as purchased

## Total Subsidies (Tot\_Sub)

File: blk201011

### Overview

Type: Continuous	Valid cases: 39349
Format: numeric	Invalid: 0
Width: 11	Minimum: 0
Decimals: 0	Maximum: 22779868550
Range: 0-22779868550	Mean: 5893090.2
	Standard deviation: 240920690.1

### Description

A subsidy is a form of financial assistance paid to a business or economic sector. Most subsidies are made by the government to producers or distributors in an industry to prevent the decline of that industry (e.g., as a result of continuous unprofitable operations) or an increase in the prices of its products or simply to encourage it to hire more labour (as in the case of a wage subsidy). Examples are subsidies to encourage the sale of exports; subsidies on some foodstuffs to keep down the cost of living, especially in urban areas; and subsidies to encourage the expansion of farm production and achieve self-reliance in food production. Subsidies received for both input and output items should be taken in this item collectively.

## Qty Sold (QtySold)

File: blkJ201011

### Overview

Type: Continuous	Valid cases: 111768
Format: numeric	Invalid: 0
Width: 14	Minimum: 0
Decimals: 0	Maximum: 70333420000
Range: 0-70333420000	Mean: 4650277
	Standard deviation: 239119137.1

### Description

products and quantity sold

### Literal question

products and quantity sold

## Gross sale value (Grosssalval)

File: blkJ201011

### Overview

Type: Continuous	Valid cases: 111768
Format: numeric	Invalid: 0
Width: 16	Minimum: 0
Decimals: 0	Maximum: 2260420000000
Range: 0-2260420000000	Mean: 597603052.9
	Standard deviation: 9340401173.3

### Description

Gross sale value (including subsidy received): The gross sale value of the products as charged from the customers will be reported here. It includes excise duty paid or sales tax realized by the factory on behalf of the Government as also all distributive expenses incurred such as (i) discount or rebate, allowances for returnable cases or other packing and any other drawback allowed to customers, (ii) charges for carriage, outward, and (iii) commission to selling agents.

### Literal question

Gross sale value (including subsidy received)

## Excise Duty (ExciseDuty)

File: blkJ201011

### Overview

Type: Continuous	Valid cases: 111768
Format: numeric	Invalid: 0
Width: 14	Minimum: 0
Decimals: 0	Maximum: 82912069490
Range: 0-82912069490	Mean: 34198962.3
	Standard deviation: 664958059.1

### Description

Excise duty: The excise duty is the amount charged to final product of a factory and not charged to intermediate products or processes of production in the factory.

### Literal question

Excise duty

## Sales Tax/ VAT (SalesTax)

File: blkJ201011

### Overview

**Sales Tax/ VAT (SalesTax)**

File: blkJ201011

Type: Continuous  
 Format: numeric  
 Width: 13  
 Decimals: 0  
 Range: 0-6859804507

Valid cases: 111768  
 Invalid: 0  
 Minimum: 0  
 Maximum: 6859804507  
 Mean: 2643101.9  
 Standard deviation: 57818895.9

**Description**

Sales Tax : The sales tax realised by the factory on behalf of the Government in respect of products sold.

**Others (Others)**

File: blkJ201011

**Overview**

Type: Continuous  
 Format: numeric  
 Width: 14  
 Decimals: 0  
 Range: 0-39806863678

Valid cases: 111768  
 Invalid: 0  
 Minimum: 0  
 Maximum: 39806863678  
 Mean: 14233202.7  
 Standard deviation: 172398832.3

**Description**

Other : Other distributive expenses i.e. outward transport, rebate, commission, transit insurance of goods sold, packing fees etc are to be recorded here. Export Insurance charges, if paid, should be treated as a part of distributive expenses and be recorded in Block J, and not as insurance charge covered in Block F.

**Literal question**

Others

**Total (Total)**

File: blkJ201011

**Overview**

Type: Continuous  
 Format: numeric  
 Width: 15  
 Decimals: 0  
 Range: 0-122719000000

Valid cases: 111768  
 Invalid: 0  
 Minimum: 0  
 Maximum: 122719000000  
 Mean: 51075267.6  
 Standard deviation: 770607840.6

**Description**

Total = Excise Duty + Sales Tax/ VAT + Others

**Literal question**

Total

**Net Sale value (NetSaleval)**

File: blkJ201011

**Overview**

Type: Continuous  
 Format: numeric  
 Width: 13  
 Decimals: 0  
 Range: 0-3108256636

Valid cases: 111768  
 Invalid: 0  
 Minimum: 0  
 Maximum: 3108256636  
 Mean: 222706.4  
 Standard deviation: 15243902.4

**Description**

**Net Sale value (NetSaleval)**

File: blkJ201011

Per unit net sale value: To arrive at per unit net sale value, total distributive expenses (of col.v13) is to be deducted from gross sale value (Col.v9) and then divided by quantity sold (Col. v8).

**Ex-factory value of Qty manufactured including subsidy received (ExfactvalOutput)**

File: blkJ201011

**Overview**

Type: Continuous	Valid cases: 111768
Format: numeric	Invalid: 0
Width: 16	Minimum: 0
Decimals: 0	Maximum: 2157210000000
Range: 0-2157210000000	Mean: 556518624.1
	Standard deviation: 8752036858.9

**Description**

Ex-factory value of output

**Literal question**

Ex-factory value of output
