VERSION DESCRIPTION

Version v1.0. - Edited data for internal use only

PRODUCTION DATE

2011-08

NOTES

BPS have just put out a press release on the labour market situation for Feb 2014. They have revised their estimations for 2011-2013 based on revised population weights that were applied in Feb 2014. Please therefore note that employment estimates in your datasets should be updated for 2011-2013.

The updated weights for SAKERNAS microdata for 2011-2013 will be available SOON! for download in related materials

Overview

ABSTRACT

Sakernas is a survey which is specifically designed for labor data collection. Sakernas is relatively different

compared with SP (Population Census) and Supas (Intercensal Population Census) which are more focused on demographic characteristics of the population. Other labor force data source is Susenas (National Social and Economic Survey) which collects data on many aspects of social and economic characteristics, such as: consumption, labor, health and household variables. The differences in the characteristics coverage of surveys/census mentioned above are contributed to the labor data quality, in which the Sakernas results are regarded better.

The target sample size of the 2011 August NLFS was 200 000 households consist of 50 000 households that were from quarterly sample package and 150 000 households were addition sample package in intention to provide estimation down to regency/municipality.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Households

Scope

NOTES

The National Labor Force Survey aims to meet three main objectives. These objectives are designed to obtain the characteristics of:

- i. Employment.
- ii. Unemployment and underemployment.
- iii. Working age population not in the labor force who are in schools, doing housekeeping, others, exclude personal activity.

TOPICS

Topic	Vocabulary	URI
Employment	ILO

Sampling

Sampling Procedure

The difference of sample size of Sakernas compared with other surveys mentioned above (SP, Supas and Susenas) will also lead to different levels of sampling error. The smaller sample size will cause the greater sampling error of a survey.

Response Rate

Total number of household samples were around 200 000 household that consist of 50 000 household from quarterly sample and 150 000 household were addition sample package, with a response rate 94,03 percent.

Questionnaires

Overview

Questionnaire applied in the data collection of the NLFS August 2011 for labor personal information is SAK11-AK, which is designed for asking information of the economically active and not economically active population.

Data Collection

Data Collection Dates

Start	End	Cycle
2011	2011	N/A

Data Collection Mode

Face-to-face [f2f]

Data Collection Notes

The main information collected in The National Labor Force Survey are data on individual household members covering persons aged 10 years and older. However tabulated data covers household members aged 15 years and older.

Data on individual household members consist of:

- 1) Member identification: name, relation to the head of household, sex, age, marital status and educational attainment. Activities during last week: working, (at least an hour for a week) temporarily not working, looking for work/established a new business/firm, attending school, doing housekeeping and others (retired, incapacitated, etc).
- 2) For those who were working: and temporarily absent from work but having jobs (such as: on leave) they are asked for main total working day, total number of hours of work, industry, occupation, employment status, and total wage/salary in month.
- 3) For those who were looking for job or established a new business/firm: they are asked for the main reason for looking a job/established a new business/firm, type of effort to find out a job/established a new business/firm, the duration of looking for job or established a new business/firm, and type of job (for full or part-time).

Questionnaires

Questionnaire applied in the data collection of the NLFS August 2011 for labor personal information is SAK11-AK, which is designed for asking information of the economically active and not economically active population.
