Overview

ABSTRACT

Developed as an important source of information on labour force, the survey offers, in a proper manner, essential data on all the population groups, with a lot of possibilities of correlation and structuring by diverse social-economic characteristics in an international comparability context.

The Survey is a continuous household survey. It is conducted by the National Bureau of Statistics since 1998. Based on data provided by the survey it is possible to divide the population in three mutually exclusive groups: employed, unemployed and economically inactive persons.

The Survey has several main objectives:

- Estimating the active population (employed, unemployed) and the inactive population
- Establishing the structure of active and inactive population
- Estimating trends
- Offering essential data on labour force

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS
