Overview

ABSTRACT

The objectives of the Ghana Living Standards Survey- Round Five are to:

Provide insight into living standards in Ghana by providing data to facilitate in-depth analysis of the living conditions of households.

Provide information on patterns of household consumption and expenditure at a subregional level of disaggregation.

Provide data on total earnings, hours of work, etc., for in-depth study of differentials among branches of industry, sectors of employment, occupations at geographic areas, levels and between women and men.

Provide the basis for the construction of the consumer price index.

Up-date the National Accounts and

Provide databases for national and regional level planning and poverty monitoring.

Sampling

Sampling Procedure

The object of the sample design for the GLSS-5 was to cater for a variety of analyses for the various domains of interest, which were:

- (1) Ghana as a whole
- (2) Each of the ten Administrative regions, with a minimum sample size of 400 households
- (3) Urban and Rural localities of Residence (each as a separate domain), and other categorizations including, the three ecological zones, as well as Accra (GAMA)⁴, namely:

Coastal (urban and rural)

Forest (urban and rural)

Northern (urban and rural)

Accra (GAMA)

The number and allocation of sample EAs was based on an expected sample of at least 8000 households nationwide. At the first stage, a total sample of 550 EAs was selected with probabilities proportional to size (2000 Population Census count). However, to achieve reliable estimates, the number of EAs in Upper East and the Upper West were adjusted from 27 to 40 and from 17 to 34, respectively, bringing the total number of EAs to 580 and the number of households to 8,700.

Questionnaires

Overview

Questionnaire generally covers the following key areas:

- Demographic Characteristics
- Education and Skills Training
- Health and Fertility Behaviour
- Employment and Time Use
- Migration and Tourism
- Housing and Housing Conditions
- Agriculture
- Household Income, Consumption and Expenditure
- Credit, assets and savings

Each GLSS programme focuses on a special topic which is covered in a module. The GLSS-5 had a module on Non-farm Household Enterprises, the purpose of which was to collect information on income from production activities organized directly by households from their non-farm household enterprises. Another module was added to the GLSS-5, when at an early stage of the survey the World Bank requested the assistance of the Ghana Statistical Service to collect data on remittances. The Migrant and Remittances Module was incorporated into the survey to study:

- The characteristics of migrants
- The type and value of remittances migrants send home
- The uses put to these remittances by receiving households.
