## Overview

### ABSTRACT

**Objectives:** The 2010 LFS aimed to collect information about various aspects of people's economic activity. It is now possible to compile national and county statistics relating to employment, unemployment and underemployment, and to many other aspects of people's working lives. These statistics will be especially useful to Government and its development partners as they attempt to identify the problems that Liberians face in the area of employment. With this information available, planners and policy makers will be better placed to develop policies and programmes to improve the welfare of the people.

**Reference Period:** 2010

**Periodicity of Data Collection:** First labour force survey since 1980.
