Overview

ABSTRACT

Objectives: To undertake a review of existing disability policy and practice in the country.

To assess the extent to which each country's policy and practice was in the alignment with the principles of the UN Convention on the Rights of Persons with Disabilities.

To assess to what extent disability policy had been mainstreamed in each of the four designated countries.

To provide an assessment of to what extent disabled people's organisations have been effective and been engaged in the policy-making process with regard to disability issues.

Term used to denote 'disability': "Disabled person"

Definition of this term: Disability is an umbrella term, covering impairments, activity limitations, and participation restrictions. An impairment impacts on body function or structure; an activity limitation is a difficulty encountered by an individual in executing a task or action; while a participation restriction is a problem experienced by an individual in involvement in life situations. Thus, disability is a complex phenomenon, reflecting an interaction between features of a person's body and features of the society in which s/he lives.

Source of this definition: WHO, ICF

Questions used to identify persons with disabilities: "Do you suffer from any of the following type of impairment: blind, deaf, impaired speech, impairment of hands, impairment of legs, mental disability, other, not stated?"

Questions related to employment and unemployment of disabled people were included in the questionnaires.
