Overview

ABSTRACT

Objectives: As there are almost no available statistics It is difficult to understand the situation of persons with disabilities in Uzbekistan, as there are almost no available statistics and research. Although there is some data showing a disability rate of 1.33% of the total population, there is little data on the types and causes of disabilities. Moreover, if the disability rate is really the 10% as estimated figure supported by WHO, then the current data collection methods may not be most suitable and quality of the estimates questionable for the figure mentioned above are suspect. A priority for Uzbekistan is to collect and, analyze and disseminate person with disabilities data currently scattered in the Ministry of Labour and Social Security, Ministry of Public Education, Ministry of Health and the National Rehabilitation Center. , and then publish this data as national statistics.
