COVID-19 TRANSMISSION RISK ASSESSMENT

Protect your business and workers by preventing COVID-19 transmission at your workplace
The COVID-19 transmission risk assessment is an important step toward preventing the spread of the virus at your workplace. Assessment results help you take necessary actions to address identified COVID-19 infection risks.

Sign up for the free risk assessment service and receive professional advice from occupational health doctor so you can implement effective COVID-19 prevention measures at your workplace.

**Risk Assessment – What is it?**

Risks assessment uses 2 tools: **self-assessment** and **employee survey**. Occupational Safety and Health (OSH) doctor will advise you based on the risk assessment results.

- **Self-assessment** is a checklist to verify the preparedness of the workplace vis-à-vis COVID-19. You should complete the self-assessment.

- **Employee survey** assess the understanding and behaviors of workers in the light of COVID-19 protocols.

The OSH doctor will explain the identified risks based on the assessment result. You will discuss **action plans** with OSH doctor to prevent COVID-19 at the workplace.

**Advantages and Benefits**

- Enhance protection for business and workers from COVID-19 based on advice from the OSH doctor.
- Systemically assess the COVID-19 transmission risks based on the national guidelines and ILO’s global knowledge.
- Allow company to resume, maintain and expand business operations safely.
- Enable workers to work in a safe and healthy working environment where COVID-19 infection risks are assessed and mitigated.
- Free of charge, up to 1,500 workplaces.
1. Sign up and register up to 5 workplaces to be assessed. Verify your e-mail address and log in within 2 days after signing up.
2. Complete self-assessment online within 2 weeks.
3. Share the employee survey link with all workers, including outsourced employees, vendors, and non-permanent staff. The employee survey should be submitted within 2 weeks.
4. After the OSH doctor analyze the self-assessment and survey results, the company will generate actions plans to enhance COVID-19 preventive measures at the workplaces based on the recommendations.
5. The company implements the actions plan, and the OSH doctor will follow up.

Risk Assessment Service Provider

“Enhancing COVID-19 Prevention at and through Workplaces” project provides the risks assessment services based on the national guideline “Prevention and Measures Against COVID-19 at Workplaces”.
Workplaces Eligible for the Service

1. Workplaces of legally established companies in Indonesia. Workplaces outside the country are not covered by this service.
2. The company is committed to prevent the spread of COVID-19 and willing to take actions as recommended by OSH doctor.
3. The workplace has at least 10 workers.

About the Project

The majority of workers and their family members rely on income from work for their livelihoods and welfare. Reducing infection risks at workplaces to the best we can is of crucial importance. With the funding support of the Government of Japan, the project aims to enhance COVID-19 prevention measures and occupational safety and health at and through workplaces.

The project will assess COVID-19 transmission risks at 1,500 workplaces and provide advice to mitigate the risks. It also strengthens the capacities of stakeholders to respond to today’s COVID-19 pandemic and future public health crises and to address other OSH challenges.

This project is implemented in the framework of the ILO’s flagship Safety + Health for All Programme that focuses on 4 strategic areas: building knowledge, strengthening national capacities, creating conducive national frameworks, and promoting demand for safe and healthy workplaces.
