The International Labour Organization: 100 years of global social policy

This book is the first comprehensive account of the ILO's 100-year history. At its heart is the concept of global social policy, which encompasses not only social policy in its national and international dimensions, but also development policy, world trade, international migration and human rights.

It focuses on the ILO's roles as a key player in debates on poverty, social justice, wealth distribution and social mobility and as a global forum for addressing these issues.

What works: Promoting pathways to decent work

The report analyses how income support and active labour market policies (ALMPs) can come together to tackle a significant set of barriers limiting access to decent work in emerging and developing countries. It builds upon the

finding of a previous research project and specifically from the conclusion that, while ALMPs are indeed able to improve workers' labour market prospects, the success of such interventions hinges on their accessibility.

The driving force birth and evolution of tripartism: Role of the ILO workers' group

The book gives examples of the dynamics at work between the three groups of the ILO and explains how, over time, the force that has driven its agenda has been the Workers' Group. This is a story of a century of achievements, though not necessarily victories. The

grand achievement – the creation of the International Labour Organization in 1919 as a permanent body focused on labour issues – came with the victory of the First World War.

Workers' organizations engaging in skills development

This policy brief highlights ILO support for the engagement of workers organizations in skills development policies and systems. It also provides examples of engagement at the national sectoral and enterprise levels and proposes priority areas for workers organizations as they engage in skills development in the future. Skills development is an area which supports and fosters social dialogue at the global level

**JUST TRANSITION TOWARDS
ENVIRONMENTALLY SUSTAINABLE
ECONOMIES AND SOCIETIES FOR ALL**

ILO ACTRAV Policy Brief

ACTRAV
Centre
for Women
Workers

The transition to a carbon-neutral economy will affect every aspect of how we produce goods, provide services, move around and consume. The Paris Agreement (UNFCCC 2015) was a historical milestone, where nations committed themselves to transforming their development trajectories in order to limit global warming by 2100 to 1.5 to 2 degrees Celsius above pre-industrial levels. This policy brief will address the main challenges in fulfilling these goals, how just transition can work in practice and what trade unions and workers' organizations can do.

Just transition towards environmentally sustainable economies and societies for all

The transition to a carbon-neutral economy will affect every aspect of how we produce goods, provide services, move around and consume. The Paris Agreement (UNFCCC 2015) was a historical milestone, where nations committed themselves to transforming their development trajectories in order to limit

Small matters: Global evidence on the contribution to employment by the self-employed, micro-enterprises and SMEs

Drawing on a new ILO database, the report provides an up-to-date and realistic assessment of the global contribution of self-employment and micro- and small-enterprises to employment – both in the formal and the informal economy. A proper understanding of the contribution of small economic units is key to advancing the ILO Decent Work Agenda and the 2030 Agenda for Sustainable Development.
