Trade and decent work: Handbook of assessment methodologies

The handbook examines the strengths and weaknesses of these approaches, taking into consideration their underlying assumptions, data requirements and the

scope that they provide for analysing broader labour market outcomes, including those that can be measured using decent work indicators.

Publishers: ILO and European Commission

WHO/ILO joint estimates of the work-related burden of disease and injury, 2000– 2016

The publication was produced within the framework of the global Comparative Risk Assessment, in which exposure to a specific occupational risk factor is linked to the specific attributable burden of one specific health outcome (that is, a defined disease or injury).

Publishers: ILO and World Health Organization

ILO's response to the impact of COVID-19 on the world of work: Evaluative lessons on how to build a better future of work after the pandemic

Since the crisis began, the ILO has had to rapidly adapt its programme tools, intervention models, development cooperation projects and evaluations methods to ensure they remain relevant and effective.

Publisher: ILO-Evaluation Office

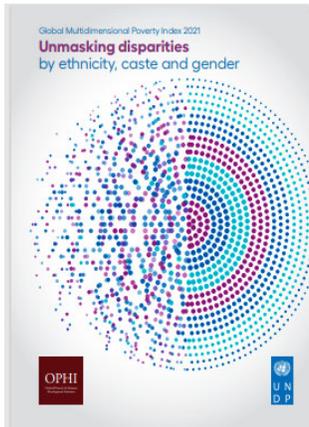

Trade and decent work: Indicator guide

The purpose of this Guide is to provide analytical tools, which can support further research on trade and decent work. It offers a broad set of labour market indicators for trade policy assessment that can be used in studies on the nexus between trade and employment, labour relations and working terms and conditions.
