## **1. Overview of TVET Institutions**

### **A. Introduction**

Technical Vocational Education and Training (TVET) Institutes have been working very hard to provide competency-based training that focuses on technical and practical skills in order to meet labor market demand. TVET institutes are providing students who completed, not completed or dropped out with knowledge, capacity, skill as the investment in their jobs or self-employment. Trainees and students who graduate from TVET will receive high job opportunities with reasonable salary and can create jobs on their own. Besides, TVET institutes also provide information on career, employment consultants, development partners, enterprises, industrial units, private companies for trainees, students, internships and job seekers.

The Ministry of Labour and Vocational Training is conducting a number of technical training annually with professional training and experience in internships in institutions and companies. On the other hand, TVET institutes have built sufficient physical infrastructure for trainees, students, lecturers, and instructors such as administrative buildings, school buildings, workshops, and dormitories. Currently, there are 104 institutions registered in the Ministry of Labour and Vocational Training, including 37 public institutes, 41 private institutes and 26 non-governmental organizations providing technical and vocational training in 25 capital-provinces.

### **B. Training Programs**

TVET has 38 public institutes which are under the supervision of the Ministry of Labour and Vocational Training located in the capital and provinces providing technical vocational training to trainees, students, youth and all targets, aimed to provide technical expertise as in high demand today and in the future. TVET institutes provide short and long course training for trainees, students, youth and public to ensure that everyone receives equitability and in all circumstance training.

The period of Short-course training programs for one week are Electrical Installation, Water Supply, Air Conditioning Repair, Machine Repair, Car Repair, Motorcycle Repair, Mobile Phone Repair, Computer, Food & Beverages services, Bakery, Tailor, salon, Cosmetics, Wedding embellishment, Animals Raising, Vegetables Growing, Fruits and Vegetables processed, and other skills, this short-course training is conducted both in school and in community.

Long-course training (one year and upper) including Architecture, Civil Construction, Electricity, Electronics, Mechanics, Air-Condition, Automotive, Entrepreneurship, Accounting,

Computer Science, Information Technology, Telecommunications, Business, Tourism and other skills.

TVET institutes have workshops also for trainees, students to practice, after, theoretical study and private partnerships provide locations for internships as well as for job opportunity. Moreover, the institutes provide accommodation (dormitories) for participants, students from remote areas, poor students, especially female students for free of charge.

## 2. National Technical Vocational Education and Training Policy 2017-2025

### A. Vision

The vision of National Technical Vocational Education and Training Policy is to improve the livelihood and dignity of people and to enhance Cambodia workforces or human resource with knowledge, competence, skills, working attitudes, professional ethics, high productivities and competitiveness for lifelong employability.

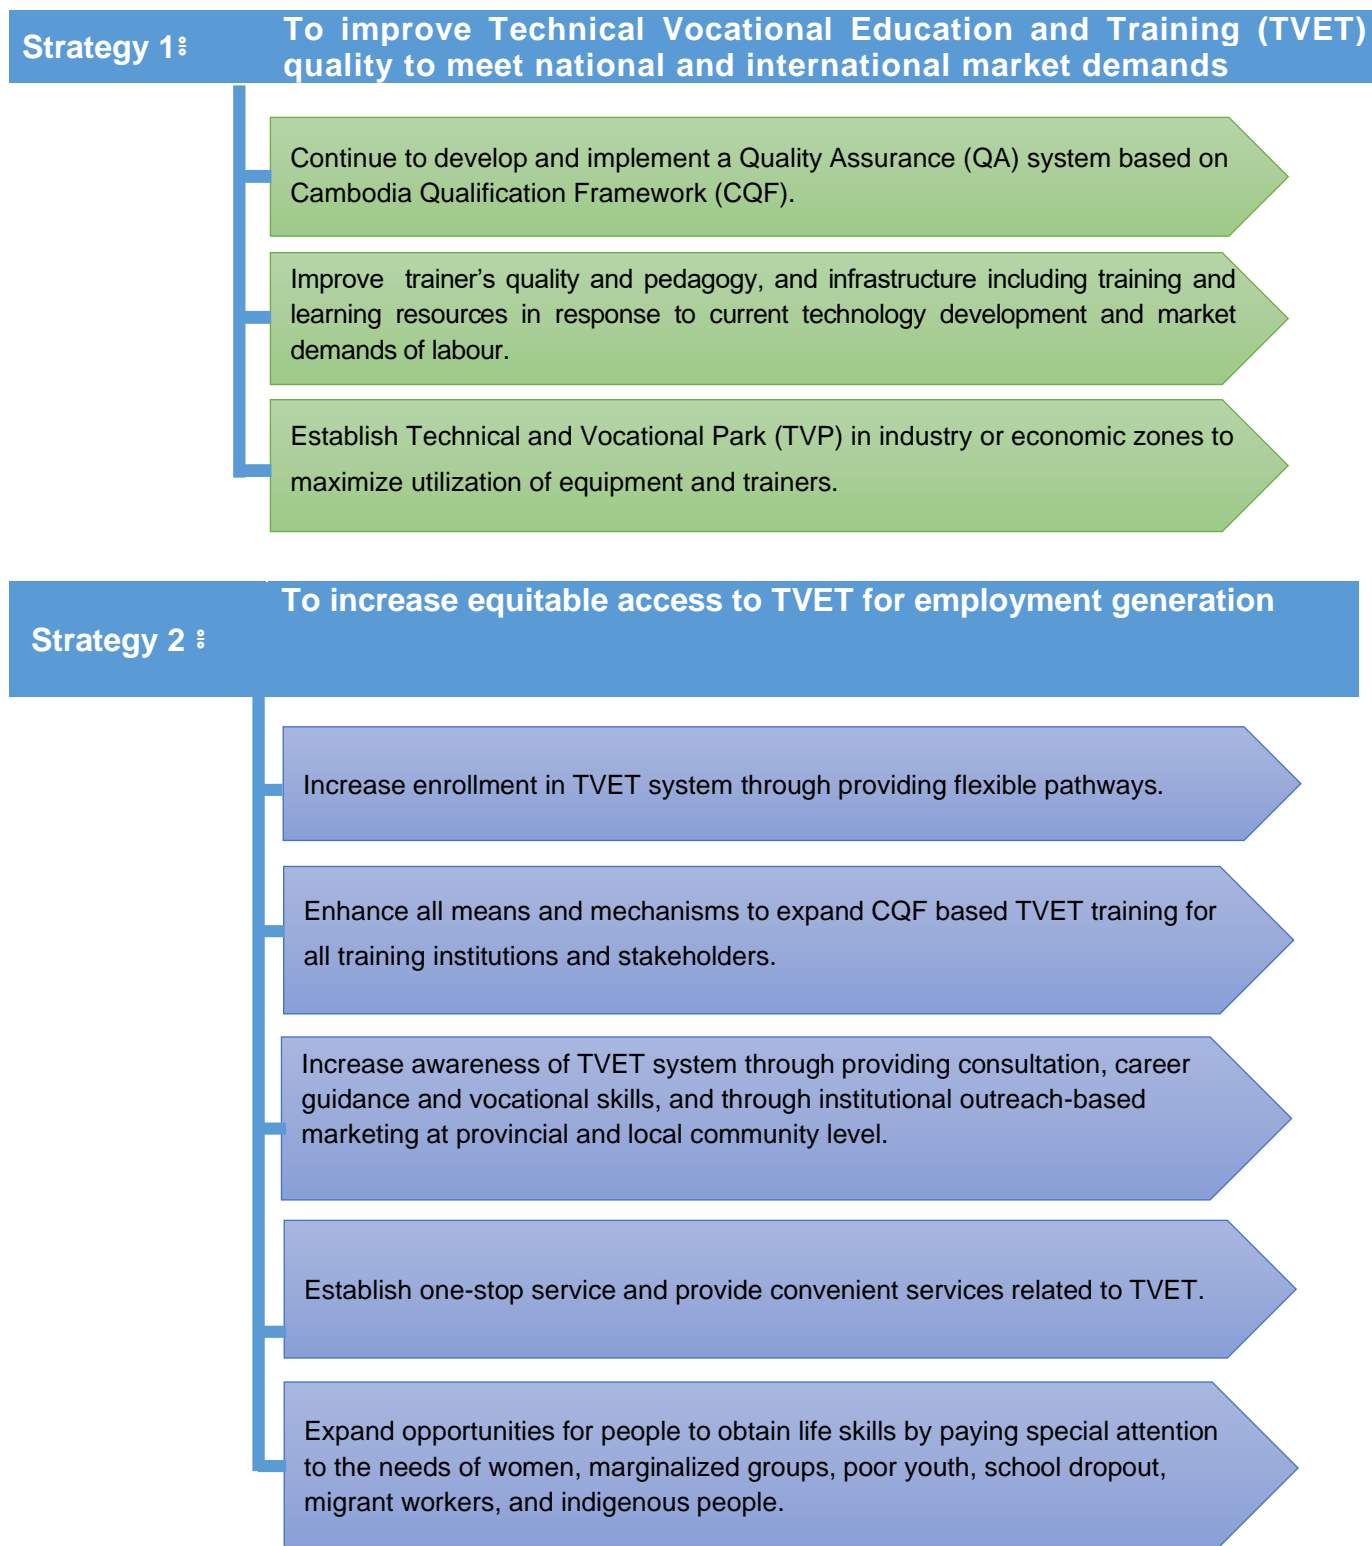

### B. Objective

To achieve the above vision, there is a need for further development of the management system and the promotion of a system of skills development, based on demand for labour force, for decent work to develop the industry, in the direction of economic growth and high productivity. Therefore, the National Technical Vocational Education and Training Policy 2017-2025 has defined the following objectives:

- ✓ To improve TVET quality to meet national and international market demands
- ✓ To increase equitable access to TVET for employment generation
- ✓ To promote public-private partnerships (PPP) and aggregate resources from stakeholders to support for sustainable development of TVET
- ✓ To improve the governance of TVET system

### C. Strategy

To address the weakness in quality assurance, management, promotion in technical vocational education and training to support job opportunities in geographical areas leading to social development and national economy growth. National TVET Policy in 2017-2025 outlined the four major strategies:

**Strategy 3:**

**To promote Public-Private Partnerships (PPPs) and aggregate resources from stakeholder to support for sustainable development of TVET**

Enhance PPP and partnership with stakeholders in TVET system.

Expand PPP and partnership with stakeholders to develop training curriculum based on market needs in order to strengthen skills that respond to new and existing technology.

Establish coordination mechanism with stakeholders to set up National Skills Development Fund.

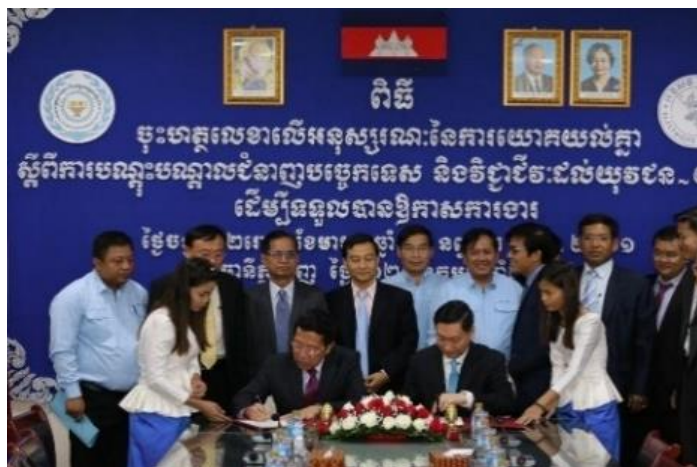

Develop a student fees policy for TVET providers and offer scholarships for poor students, and particularly women and indigenous people.

#### Strategy 4 : To improve the governance of TVET system

Strengthen regulatory framework for TVET to link skills training to labour market demands.

Develop a result-based funding mechanism for operating TVET institutions.

Continue to improve TVET Management Information System (TVETMIS) and Labor Market Information System (LMIS) and strengthen Labor Market Forecasting Analysis and Skills-Needs Assessment.
