# **WORLD SOCIAL PROTECTION REPORT**

Building economic recovery,  
inclusive development  
and social justice

2014/15

The implementation of nationally appropriate social protection systems for all, including social protection floors, is one of the key targets proposed by Open Working Group on Sustainable Development Goals for the Post 2015 framework. This report shows that more than 70 per cent of the world population is still not adequately covered by social protection. It brings together key social protection indicators to monitor progress and suggests core means of implementation to deliver on the social protection proposed target based on concrete successful country experiences.

**All are invited to attend.**
