An employers’ guide on working from home in response to the outbreak of COVID-19
How to use this guide

This guide has been developed by the [NAME OF EBMO] in collaboration with the International Labour Organization Bureau for Employers’ Activities (ILO-ACT/EMP) to provide practical guidance to member companies that have implemented “working from home” protocols for their staff in 2020 as an alternative temporary arrangement during the COVID-19 crisis.

Companies have implemented working from home protocols as preventive measures or in response to the order or directive of the Government restricting face-to-face contact. This guide provides recommendations for companies, including the duties and responsibilities of employers and workers, considerations and challenges, and how to address and manage those challenges. It also provides a sample template for companies to enable them to develop a bespoke working from home policy.

This guide makes reference to international labour standards laid down in relevant conventions and recommendations. These standards are internationally negotiated and adopted by governments, employers and workers in the ILO and form the basis for many national labour laws.

Acknowledgements

Jae-Hee Chang, Maria Machailo-Ellis and Gary Rynhart led the development of this guide from ILO-ACT/EMP. It was reviewed by Samuel Asfaha, Magdalena Bober, Farid Hegazy and Vanessa Phala from ILO-ACT/EMP. Jon Messenger and Valentina Beghini from the ILO’s Conditions of Work and Equality Department also provided valuable inputs and comments. Finally, Miaw Tiang Tang drafted this guide.

Disclaimer: The responsibility for opinions expressed in this guide rests solely with their authors, and the publication does not constitute an endorsement by the International Labour Office of the opinions and guidance expressed in them. Reference to names of firms and commercial products and processes does not imply their endorsement by the International Labour Office.
Foreword by the President

In only a few months’ time, the coronavirus (COVID-19) pandemic has had a devastating economic, social and health impact across the globe. Hundreds of thousands of lives have already been lost, and the end of this crisis is not yet in sight. From the outset, [NAME OF EBMO] has been working with our members across the country to assist them in managing the negative economic, social and health implications of the COVID-19 crisis.

[NAME OF EBMO] will continue to provide support throughout this crisis. Our priorities throughout the crisis are to:

- provide strong leadership to ensure the health and sustainability of the workforce and our communities;
- represent the interests and needs of business in crisis to Government with innovative and quick action, measures and solutions;
- support business during this period with relevant information and services as well as opportunities for remote networking and engagement with peers as these alternative arrangements are becoming universal.

This guide is the latest example of our commitment to our members.

Employers navigate a complex and evolving landscape. In our daily discussions with government representatives, we are prioritizing measures to support business continuity. This is particularly critical for the hospitality, retail and related sectors that have already suffered a very significant demand shock.

Difficult decisions are being made each day and people’s safety must always come first. We urge our members to implement government measures as speedily and effectively as possible and implement positive action wherever possible.

This guide has been designed to help our members respond to a “new normal” that is changing day by day. Many companies are relying on “working from home” arrangements for the first time. Some are thriving while others are struggling to adapt. I hope this guide can provide timely assistance.

Finally, I would like to thank the International Labour Organization for their assistance in developing this guide.

Yours sincerely,

President of [NAME OF EBMO]

Introduction

The coronavirus (COVID-19) pandemic continues to severely affect public health and cause unprecedented disruptions to economies and labour markets. In line with the advice from the World Health Organization (WHO), many steps have been taken worldwide to contain the spread of the virus. Governments have implemented measures ranging from physical distancing, restrictions on the freedom of movement and the closure of non-essential companies and undertakings, to the lockdown of entire cities in different parts of the world. As the pandemic evolves, so have the measures governments have taken to address it.

Reducing face-to-face contact is an important action to mitigate the impact of COVID-19. According to the International Labour Organization (ILO), around 68 per cent of the world’s total workforce, including 81 per cent of employers, are currently living in countries with recommended or required workplace closures. In this new environment, employers have to be able to adapt and make contingency plans to respond to new measures as they arise. Many companies are exploring working from home (WFH) as a temporary or alternative working arrangement.

1. What is working from home?
WFH is a working arrangement in which a worker fulfils the essential responsibilities of his/her job while remaining at home, using information and communications technology (ICT). For the purpose of this guide and in the context of the COVID-19 pandemic, the term “working from home” is used to refer uniquely to home-based teleworking as a temporary, alternative working arrangement. It requires a shared responsibility and commitment by both employers and workers to ensure business continuity and employment.

2. How is working from home different from teleworking, telecommuting, or remote working?
Progress in ICT has enabled and facilitated alternative working arrangements, including WFH, teleworking, telecommuting and remote working. These terms are often used interchangeably to refer to new and evolving models of working outside the employers’ premises or workplace. There may be slight differences among these terminologies. For example, some may imply a temporary arrangement while others may imply a long-term arrangement. WFH is considered to be home-based telework the difference being that teleworking may include various locations away from the primary worksite or the employer’s premises (such as mobile working). Telecommuting refers to substituting telecommunications for commuter travel. There are some differences between the terms “teleworking” and “telecommuting”, mainly because telework is broader and may not always be a substitute for commuting, but they are relatively minor. For the purposes of this guide, the terms “teleworking” and “telecommuting” are used interchangeably.

---

2 Eurofound (European Foundation for the Improvement of Living and Working Conditions) and ILO, Working anytime, anywhere: The effects on the world of work (Luxembourg and Geneva, 2017).
3. Are all jobs suitable for working from home arrangements?

When worksites and premises are closed across the entire company as a precautionary measure or as a result of a government directive, companies may be able to implement WFH arrangements to achieve continuity of service, maintain productivity, and preserve jobs while safeguarding the safety and health of workers. The ILO estimates that close to 18 per cent of workers have occupations that are suitable for WFH and live in countries with the infrastructure to enable WFH.4

The responsibility for WFH arrangements is shared, and it requires the commitment of both employers and workers to make it successful. Both employers and workers should be practical, flexible and sensible to each other’s situation when implementing WFH arrangements.

Before rolling out WFH arrangements, employers should first assess if it is possible and practical for the job functions and the jobholder, as follows:

- Identify the job functions and tasks that can be done off-site. This may involve innovation and creativity to do things differently from the norm.
- Assess mechanisms for connectivity such as regular videoconferencing calls and other means.
- Assess the infrastructure, facilities and tools available for WFH, such as Internet connectivity and the availability of reliable power supply.
- Assess the legal requirements, obligations and potential liability, taking into consideration the worker’s situation and the job functions, equipment and tools needed5.
- Assess the worker’s situation in terms of safety and health in his/her domestic environment and actual ability to carry out the tasks required at home.
- Consider the potential impact of the worker’s living arrangements. For example, workers may have child or dependent care responsibilities, relationship strain or domestic violence, long-term health conditions or disabilities.
- Assess any mental health concerns or possible future concerns that could arise through a work from home arrangement.

It is important to note that while advances in ICT have enabled WFH, not all job functions and tasks can be done outside the employers’ premises or the specified workplace. There are companies, occupations and tasks where WFH is not practical or feasible, or it cannot be deployed in a short time frame.

Employers need to explore and implement an alternative plan for job functions and tasks that cannot be performed remotely, or for workers who have limitations at home or health and safety issues that prevent WFH. Subject to the provisions in national laws and regulations, government directives or company policy, employers may consider advising workers to take accrued or advance paid annual

---

5 Employers should consider whether the home workspace is insured. Many employer liability policies will encompass WFH arrangements, but this should be verified. Employees may alternatively be covered by their personal home insurance policy.
An employers’ guide on working from home in response to the outbreak of COVID-19

leave, extended leave at half pay or unpaid, or any other applicable leave that could be used in the situation in consultation with the workers’ concerned.

4. How are companies adapting to implementing WFH arrangements?

Some companies may have previous experience in implementing WFH arrangements or they may already have emergency WFH plans in place. However, many companies are likely to be implementing WFH arrangements for the first time, and they need to quickly and urgently adopt WFH arrangement across the entire company. For example, a survey conducted in March 2020 of 250 large firms in Argentina found that 93 per cent had adopted teleworking as a policy in response to the COVID-19 pandemic. Similarly, the Indian business process outsourcing giant, Tata Consultancy Services, reported that around 85 per cent of its 400,000 employees in India and elsewhere in the world were working from home as a result of lockdowns. 6

Although many companies recognize the benefits of WFH, some have had difficulty making the transition. In Japan, for example, a survey conducted prior to the 7 April announcement of a state of emergency, found that while 96 per cent of respondents agreed with the importance of WFH or working remotely, 31 per cent of companies were unable to adopt this form of working. The main reason was that paperwork was not digitized and the required internal rules and procedures for teleworking were not ready. Concerns over confidentiality of information or possible security breaches can also limit the use of WFH. Many small and medium-sized enterprises (SMEs) also struggle with WFH, and a number of recent surveys demonstrate this. The Argentine SME Observatory for example found that SMEs use telework much less than by large companies. 7

According to Mercer’s 2020 Global Talent Trends Study, only 22 per cent of companies were ready for mass remote working prior to the outbreak of COVID-19. The study also found that only 44 per cent of companies systematically assess jobs for their adaptability rather than allowing flexibility to be determined by the worker’s circumstances. Such assessments can help companies design flexibility into a job in a systematic manner, balancing the needs of the company and its workers.

EBMO to provide data on any national survey if available that shows number of national firms with WFH arrangements. If not, include a quote on WFH by the EBMO President/CEO or major company on the trend of WFH arrangements.

Example: “In [NAME OF COUNTRY] working from home is a relatively new experience for many companies. In our discussions with our member companies, we have found that many are adapting to these new realities and are seeing many advantages. However challenges remain for many and we are fully cognizant of those”.

5. Are workers obliged to observe the company’s directive to work from home?

Normally, WFH arrangements are implemented on a voluntary basis between employers and workers, often accompanied by a signed agreement setting out terms and conditions. In the current situation, however, WFH has been mandated in many parts of the world as a temporary public health measure.

6 ILO, “Working from Home”.
7 ILO, “Working from Home”. The Argentine SME observatory found the use of telework to be only 55 per cent of SMEs in the service sector, 24 per cent of SMEs in industry and 23 per cent of SMEs in retail trade.
In accordance with Article 19(a) of the Occupational Safety and Health Convention, 1981 (No. 155), workers are legally obligated to cooperate with the employer to secure a safe and healthy working environment in support of relevant statutory provisions, collective agreements or company policies. Workers are also responsible for taking care of their own health and safety and the safety of others, using devices and protective equipment and complying with the policies set forth by the employer. Additionally, in accordance with Paragraph 16 of the Occupational Safety and Health Recommendation, 1981 (No. 164), they should report any hazards or issues as soon as possible following the employer’s reporting procedures. It is important to be clear that the workers’ obligations and responsibilities apply even in the informal surroundings of WFH arrangements.

Therefore, when WFH is required to minimize the spread of a pandemic, workers must cooperate and comply fully with preventive measures or directives, take reasonable care of their own safety and the safety of others and observe company policies.8

6. What are employers’ responsibilities when implementing working from home arrangements in response to COVID-19?

It is important to note that temporary WFH arrangements do not require any permanent adjustment to the terms and conditions of employment. The arrangements can change in response to updated directives and the evolving needs of the company. Employers should consider modifying or developing a company policy or guidelines to provide clear guidance on implementing WFH arrangements (see annex for a template). They should communicate the policy effectively to all workers, and any changes to the policy should be communicated as early as possible.

Many countries around the world have begun legislating aspects of WFH/remote working arrangements, working conditions, the rights and responsibilities of employers and workers. For example, in the Netherlands, the Working Conditions Decree concerns paid work performed in the worker’s living quarters or another place chosen by the worker outside of the employer’s premises. It includes the employer’s duty of care to check on the worker and ensure legal obligations under the Decree are met. In Poland, the provision of the Labour Code that addresses “telework” emphasises that the location of work is away from the premises of the employer and is based on services rendered by electronic means, while in Austria, “telework” is regulated through working-time legislation, rather than as a separate issue.9 In March 2020, Chile enacted a law regulating teleworking, granting legal certainties to both employers and workers in teleworking arrangements and specifying their rights and responsibilities. For example, employers’ obligation includes bearing the costs of operation, functioning, maintenance and repair of equipment.10

---

8 In Singapore, a new COVID-19 (Temporary Measures) (Control Order) Regulations 2020 was passed on 7 April requiring companies to implement WFH, when possible, and making it an offence if a company does not implement remote working measures if the job scope allows it.

An employers’ guide on working from home in response to the outbreak of COVID-19

EBMO to insert any general comments on national WFH legislation or a statement from the EBMO President/CEO on “good practice”.

Example: “Operationally, managing workers from home is a new experience. In such a situation, it is critical that communication occurs regularly and for communication to be targeted and personal. Managers should be prepared to listen to workers to flush out any customer concerns so workers can respond correctly. Face-to-face conferencing and virtual team meetings should occur frequently. Setting up a routine for departments and employees will provide clear expectations and collaboration. Plan a weekly agenda and distribute it to team members to allow for input before the meetings.”

If there is no specific legislation on WFH, employers are advised to consult provisions in existing national laws and regulations related to labour and employment, occupational safety and health, or the relevant directives and guidelines issued by the respective national and local authorities.

(a) Safety and health of workers

Articles 3, 16, 18, 19 and 21 of Convention No. 155

The term health, in relation to work, indicates not merely the absence of disease or infirmity; it also includes the physical and mental elements affecting health which are directly related to safety and hygiene at work. Employers have the overall responsibility of ensuring that all practicable preventive and protective measures are taken to minimize occupational risks, and that includes providing, where necessary and so far as is reasonably practicable, adequate protective clothing and protective equipment, at no cost to the worker. Employers are also responsible for providing adequate information and appropriate training on OSH [occupational safety and health]; consulting workers on OSH aspects associated with their work; and providing measures to deal with emergencies.

Employers have a duty of care for all their workers and need to, insofar as it is reasonably practicable, provide a working environment that is safe and without risks to physical and mental health. This includes assessing, controlling and mitigating risks in locations other than the normal workplace, such as the worker’s home during WFH. Employers should also remind workers of their duties and obligations under their contracts of employment and applicable policies, in particular, their obligations and duties in relation to health and safety.

Even though it may be difficult for employers to carry out traditional health and safety risk assessments at a worker’s home in the current context, it remains the employers’ responsibility to check that:

- the work asked to be performed is one that can be safely performed from home;
- adjustments are made to the tasks, if needed, to ensure that they are safely doable when WFH;
workers have the right equipment and tools to work safely at home, including the required protective or safety equipment, where applicable;

arrangements are made to ensure the company’s equipment, if taken home to facilitate WFH, is accounted for and returned in the condition it was provided;

workers have relevant information, instruction, supervision and training, including measures to deal with emergencies;

reasonable accommodations are made for workers with disabilities in relation to the work they are required to perform from home;

arrangements are made for workers’ physical and mental welfare;

To facilitate WFH during COVID-19, Spain established an exceptional temporary legal measure allowing WFH risk assessments to be carried out by the worker based on a provided checklist.\(^{11}\)

**EBMO to insert relevant national OSH legislation that would cover WFH arrangements.**

Employers should establish a system for reporting and investigating injuries, illness or other accidents that occur because of work activities. Additionally, employers should be aware of any increased health and safety risk that may arise from WFH during the COVID-19 pandemic. This could include heightened psychosocial hazards connected to WFH, including a potential rise in occupational stress. It could further encompass increased odds for an incident of domestic violence to occur due to economic hardship and changed family demands at the household level and forced confinement to the home. There are reports in some countries of increased domestic violence and abuse during COVID-19 lockdowns.\(^{12}\) Employers should keep in regular contact with their workers and keep them apprised of any resources they may have. For example, some employers maintain employee assistance programmes that provide for confidential counselling and referral services.\(^{13}\)

(b) **Tools, equipment, supplies, and technology**

Employers should provide workers the specific tools, equipment, supplies, and technology needed for performing the required tasks when implementing WFH arrangements unless the terms and conditions of employment, collective agreement, or company policy state otherwise.\(^{14}\) Additionally, employers should see to the repair of such tools and equipment if necessary. The type of equipment and set-up required depends on the business and work involved. This may include a laptop, computer monitors, software, phone, access to the Internet, headset, access to host applications, and other applicable equipment as deemed necessary. In other situations, it may include the delivery of equipment and the installation of technical devices required for the job.

Employers could consider setting up a separate help desk or support email address where workers can forward issues related to workplace tools, equipment and technology to seek help and support

---

\(^{11}\) ECJA, COVID-19 Spain: FAQs for business.

\(^{12}\) The News International reported that in China's Hubei Province, police reports on domestic violence tripled during the coronavirus outbreak. In Brazil, state-run drop-in centres recorded a 40 per cent surge in cases attributed to COVID-19 isolation.

\(^{13}\) Employers can also provide information about national or local programmes established to support victims of domestic violence.

\(^{14}\) ILO, *Final report: Global Dialogue Forum on the Challenges and Opportunities of Teleworking for Workers and Employers in the ICTS and Financial Services Sectors*, GDTWFS/2016/9, p. 28. “Employers should unless there is an agreement to the contrary with the worker, shoulder the hardware and software costs.”
when needed. Employers should also make clear that the use of equipment and tools provided by the company for WFH is limited to the worker only and for work performance only.

(c) Home working setup and related expenses

WFH expenses traditionally are not reimbursable under most national laws and practices. However, in the current pandemic situation, WFH may be necessary and result in workers incurring related expenses. In the absence of legislative requirements or government directives requiring employers to reimburse workers for WFH expenses, employers should consider reimbursing workers for their reasonable and necessary home office expenses incurred in performing required tasks. This may include a portion of the expenses associated with:

- mobile phone or landline costs
- Internet costs
- personal computer or tablet
- teleconferencing software or hardware

However, employers may exclude home office expenses which are mainly for the convenience of the worker, which may include a faster Internet connection, additional computer monitors, ergonomic chairs, or printers. Employers should ensure the company policy specifies which expenses it will cover for WFH situations. This policy could specify that workers must seek the company’s prior approval for the reimbursement for expenses incurred in WFH situations.

(d) Worker’s compensation

Generally, in some countries, when WFH is implemented, any injury incurred during work hours and arising from or while performing work functions in the designated work area of the house may be covered by worker’s compensation insurance. In other countries however, employment injury insurance may not foresee the coverage of WFH arrangements. This would depend on national laws and judicial precedents.

Overall the number of workers’ compensation claims could fall during the pandemic, as fewer people are working. But that effect is unlikely be felt uniformly across all industries, and the workers’ claims may not be limited to COVID-19 exposures. Employers may face additional challenges in limiting work-related injuries during WFH due to a lack of oversight of work environments and the increased potential for improper use of equipment and in-home distractions. These challenges may be compounded by the current pandemic, which has contributed to rising anxiety and mental stress and forced many workers to share makeshift home workspaces with spouses, children, and pets.

**EBMO to insert applicable national workers’ compensation legislation.**

---

(e) Liability

Subject to national laws and regulations, the worker’s home workspace may be considered an extension of the employer’s workspace in a WFH arrangement. Thus in some countries, employers could be liable for accidents that arise out of and occur within the course of employment when the injury takes place in the worker’s home workspace during work hours. The timing, location and circumstances of the injury are usually important considerations to evaluate. If the injury occurred during regular working hours, in a location where the employer anticipated the workers to perform work and was in the midst of performing a required duty, employers may be held liable. If employers may be held liable for accidents in the worker’s home workspace under national laws and regulations, employers are advised to review the company’s existing employers’ liability insurance to ensure it covers WFH.

The employer should ensure the company policy on WFH assumes no liability for injuries arising in the worker’s home workspace outside the agreed work hours or any loss, destruction, or injury that may occur to the home of the worker. This includes family members, visitors, or others that may become injured within or around the worker’s home.

7. What are workers’ responsibilities when working from home?

**Convention No. 155**

Article 19

There shall be arrangements at the level of the undertaking under which—

(a) workers, in the course of performing their work, co-operate in the fulfilment by their employer of the obligations placed upon him;

(b) representatives of workers in the undertaking co-operate with the employer in the field of occupational safety and health;

...

**Recommendation No. 164**

16. The arrangements provided for in Article 19 of the Convention should aim at ensuring that workers—

(a) take reasonable care for their own safety and that of other persons who may be affected by their acts or omissions at work;

(b) comply with instructions given for their own safety and health and those of others and with safety and health procedures;

(c) use safety devices and protective equipment correctly and do not render them inoperative;

(d) report forthwith to their immediate supervisor any situation which they have reason to believe could present a hazard and which they cannot themselves correct;

(e) report any accident or injury to health which arises in the course of or in connection with work.

*EBMO to insert relevant provision on workers’ responsibilities from national OSH legislations.*
Workers have the duty to protect themselves and others and to cooperate with their employers in the implementation of preventive and control measures, in accordance with Article 19(a) of Convention No. 155. This includes following any information, instruction, or training provided by employers and adopting safe work behaviours, complying with instructions, ensuring good hygiene practices, and using safety devices and protective equipment.

Workers are obliged to notify the employer if they become aware that they are suffering from any disease or physical or mental impairment which affects their ability to do their job, and report any accident to management immediately. Workers should also keep in regular contact with their employer and inform of any health and safety risks at home or any need to change the home working arrangement.

In addition to safety and health, the general obligations and responsibilities of workers, including those stipulated in the respective national labour and employment laws, the terms and conditions of employment, or the collective agreement shall be applicable in a WFH arrangement. These responsibilities may include:

- complying with the company policy or guidelines on WFH, if any;
- complying with all existing policies and regulations, including safety and health policy, ICT and data protection policy, intellectual property, use of company tools and equipment policy;
- taking care of one’s own safety, physical and mental health and well-being;
- restricting working time to those agreed with the employer and in line with national working time legislation;
- fulfilling all normal duties or alternative duties assigned;
- practicing work-life balance, and staying active and connected;
- being available and accessible during work hours, and maintaining regular and timely communication with managers;
- refraining from holding meeting with customers or other workers at home without the company’s approval;
- making necessary child or dependent care arrangements;
- taking reasonable care of the company’s tools and equipment, including technology, data protection, confidentiality and security.

8. How do you measure workers’ productivity when working from home?

Companies with remote workers are generally concerned about productivity from two angles. Some employers wonder “are they working at all?” while others are more concerned with “are they working efficiently?” Yet measuring the productivity of a remote workforce should not be any more difficult or different than measuring a physically present workforce.

Well managed remote teams can be far more productive than physically managed workers as companies are required to measure productivity by objective metrics than the physical presence of “time in the building.”

Before a company establishes how to track and measures a workers’ performance, it should identify what needs to be measured. Choosing the most impactful and qualitative metrics is key.

Measuring productivity based on results requires quantifiable metrics, which can be challenging to define. Some sectors and jobs are easier to define than others. For example for a sales worker, it is very clear what can be measured and evaluated. In job functions like a call centre representative, a
simple metric of calls per hour can be used. However, when workers have varying responsibilities, creating metrics for each worker will be required, with some degree of frequent revision.

Additionally, meeting a measurement does not necessarily equate to productivity. If goals are set too low, a worker accomplishing the desired result may not be working at full capacity. Just because a worker is connected to the office by a virtual private network (VPN) does not mean work is being performed.

Performance is best determined by outcomes, and whether a worker is meeting measurable benchmarks or goals. Like any goal, worker performance cannot be achieved if no one knows what it is. The key to working well with remote workers is to be very clear and specific with all expectations.

Consideration should be given to how long it will take to know if someone is productive or not. Measurable results make sense, but the more frequent the measurement, the more susceptible is the feeling of micromanagement. However, measuring too infrequently means that the employer may not be aware of problems that need to be resolved.

Importantly, there are privacy issues that employers need to be aware of regarding workers and workplace monitoring.16

**EBMO to insert relevant national data privacy legislation.**

Five elements to consider in measuring remote workers’ productivity include:

- Set and communicate clear goals and deadlines in the same way with workers in a physical workspace.
- Form plans to increase accountability.
- Analyse important tasks and track progress on a time bound basis.
- Evaluate quality and quantity instead of time worked – shift the metrics to "tasks accomplished and their quality" versus "hours spent".
- Track achievements.

9. What are the main challenges in implementing working from home arrangements and what considerations should be made to address and manage them?

There are multiple benefits associated with WFH, including: the reduction in commuting times; greater autonomy and flexibility in the organization of work; a better work-life balance; increased motivation and reduced turnover; and enhanced productivity and efficiency.17 In addition, reduced travel associated with WFH leads to a reduction in carbon emissions.

---

16 In the European Union, the General Data Protection Regulation provides strong data protection and privacy for citizens.

17 Eurofound and ILO.
However, in such an unexpected and urgent situation as the COVID-19 pandemic, both employers and workers may be unprepared physically, mentally or infrastructure-wise to meet all challenges posed by WFH. According to a recent survey conducted by the Society for Human Resource Management (SHRM), 71 per cent of employers are struggling to adjust to remote work; 65 per cent of employers say maintaining employee morale has been a challenge; and more than one third of employers are facing difficulties with company culture, employee productivity and leave regulation.\(^{18}\)

It is therefore highly recommended that employers develop a workplace policy to provide clear guidelines and address the challenges. In addition, employers should regularly assess the effectiveness of the company policies and guidelines. Workers should regularly communicate challenges experienced with the company policies and guidelines to their employers.

**EBMO to insert quote from member company on how it is managing this communication aspect of WFH.**

Example: “We have found that employees who are not self-directed need advice and guidance. The best practice is to stick to your personal routine. Get up on time, get dressed, and set up an area that resembles a work site. Working from home means you are still working. Sure, it is flexible and has many time orientated benefits. But we feel that “you are still at work” is a core message that needs to be delivered”.

(a) Communication

Advances in ICT have enabled and facilitated WFH arrangements, yet ICT cannot overcome every limitation amid the rapid changes in the current situation. While employers and workers are both making efforts to keep up with the latest developments, changes announced by the Government or policy changes by the company could cause confusion among workers, especially if the changes could impact business operations or the expectations on workers, such as new restrictions on the movements of people. There are a range of software tools that make communication, collaboration and transparency easier. Many are free or low cost.\(^{19}\)

**Communicate regularly**

Communication should be quicker and much more frequent when WFH arrangements are in place. This improves collaboration and builds the necessary trust to successfully roll out new ways of working. Employers should do the following:

- Designate communication channels to enable the business to communicate with staff during WFH as necessary and ensure consistency of messages.
- Keep an up-to-date registry of contact details of all workers (phone number, email address, or physical address).
- Communicate with all workers regularly to keep them informed of updated developments related to COVID-19 and its impact on company operations, including any change in company policies.
- Encourage an exchange of views and ideas on business continuity strategies.

\(^{18}\) See www.shrm.org/resourcesandtools/pages/remote-work.aspx.

\(^{19}\) Slack for team collaboration and instant messaging; Zoom for video conference calls with team members and customers; Google Suite for email, document collaboration, file storage, shared calendar; Mural for team brainstorming workflow collaboration; Trello for project planning etc.
Hold periodic virtual meetings to update workers on the situation, review work and agree on how to deliver the company’s services. This will also help workers to feel less isolated during WFH.

(b) ICT equipment and workstation set-up

Staff may experience technical challenges, such as connectivity problems, if WFH arrangements were deployed quickly and possibly in an unorganized fashion. The COVID-19 pandemic makes it difficult for employers to plan ahead and allocate sufficient time for optimum preparation for WFH arrangements. Issues may arise where companies, especially SMEs, may lack the required communication infrastructure or sufficient equipment for all staff to work from home at the same time.

Establish shared responsibilities, commitment, and mutual understanding

Employers should seek cooperation, ideas and commitment from workers as to how they can best address and overcome the above mentioned challenge while ensuring business continuity and preserving jobs. Workers may have limited resources for WFH, or their home may offer a less optimal working environment than the workplace would (for example, it may be situated near a noisy construction site or factory or workers may have multi-generational household or cramped living conditions that are not conducive to WFH). Therefore, employers need to understand and assess the limitations that staff encounter and adjust expectations, responsibilities and tasks accordingly.

(c) Data protection and security

While the use of technology has enabled and facilitated WFH, it also presents higher risks of cyber-attacks and confidentiality breaches. Safe WFH processes are essential, especially if workers are using their personal laptops or devices to perform official duties and connect to the company network. Some companies have an existing data protection, confidentiality and security policy for this purpose.

Protect cybersecurity and privacy

Employers need to ensure that:

- data security is maintained even during WFH;
- a robust information technology system is in place with the necessary safeguards, including the safe transmission of confidential data outside the workplace;
- computers used for work have proper software installed, including anti-virus protection, secured virtual private networks or firewalls against cyber threats;
- workers are aware of the company data protection policy, if any;
- workers have the required skill to use the ICT in accordance with company policy. Reminders and online training can be used to refresh skills in this area.

EBMO to insert relevant national laws or data on protection and security.

21 IBEC.
(d) **Staff management and possible abuse of WFH arrangement**

As more and more companies choose to (or are required to) offer WFH arrangements during the COVID-19 crisis, issues of trust often advance to the frontline of workplace discussions. This is because WFH can impact the trust equation between workers and managers because the task of management is more challenging. In the absence of face-to-face contact, the traditional “command and control” style of management becomes less relevant and managers may struggle to find other ways to make sure that workers are getting their work done during WFH. If workers do not feel a sense of belonging during WFH, they may also distrust their managers and company leadership. This may lead to the manager’s loss of control, and certain workers may abuse the WFH arrangement. Hence, workers’ self-discipline and mutual trust and confidence between employers and workers are essential in this working arrangement. Furthermore, the effective management of WFH requires a results-based management approach. This involves identifying objectives, tasks and milestones, and then monitoring and discussing progress without overly burdensome reporting requirements.\(^{22}\)

**Build mutual trust and shared responsibilities**

The “glue” that holds WFH arrangements, together is trust. Managers, workers and their colleagues need to trust each other. WFH cannot be effective without it. Employers should build mutual trust and establish shared responsibilities with workers through open and transparent discussions about expectations and outputs, including:

- when workers will be available and be responsive;
- how they will keep in touch, such as online and telephone contact;
- how work-life balance will be managed, for instance through regular breaks and switching off from work at the end of the day;
- how performance and reporting will be managed, taking into consideration worker’s circumstances where necessary;
- who workers should contact if they have any work-related issue;
- who workers should contact if they have an emergency type situation.

Employers must also recognize some workers may find it hard to motivate and organize themselves when working from home. If this happens, the manager and worker should talk about practical steps to overcome those obstacles.\(^{23}\)

---

**Example:** “Remote working requires trust as well as digital infrastructure – trust in people’s reliability, capability and motivation”.

---

\(^{23}\) ACAS (Advisory, Conciliation and Arbitration Service), “Working from Home”.
(e) Organization of working time

The organization of working time is essential but it could be challenging, especially for workers with specified work hours or hourly paid wages.

The ILO report, *Ensuring decent working time for the future*\(^{24}\) referred to the European Union Framework Agreement on Telework, provides that the working time of teleworkers should be within the framework of the applicable national legislation, collective agreements and company rules. Teleworkers manage the organization of their working time, and can do their work at times that are most convenient for them, while remaining contactable during the normal business hours of the organization. Performance standards of the teleworker are equivalent to those of comparable workers at the employer’s premises. The report also indicated that Singapore and Sweden regulate telework, including work hours and rest provisions, through collective bargaining or guidance issued by public authorities.

Establish self-discipline and close monitoring

While some degree of flexibility should be deployed in a WFH arrangement, employers should:

- establish an expectation of the worker’s self-discipline and compliance with the agreed work hours;
- ensure work hours and rest breaks occur in line with national legislation, collective agreements, or the company’s terms and conditions of employment;
- ensure that workers record the total hours worked for each day or week;
- consider deploying online attendance or using email to record work hours.\(^{25}\)

(f) Occupational safety and health

As indicated in section 6(a), employers generally are responsible for the safety and health of workers at the workplace and during work hours. However, during WFH, supervisors are unable to ensure the health and safety of workers because they are not present at the employer’s workspace. Participants in the Global Dialogue Forum on the Challenges and Opportunities of Teleworking for Workers and Employers in the Information and Communications Technology and Financial Services Sectors, held in Geneva in October 2016, included this among their consensus points: “Occupational safety and health conditions are more difficult to monitor and control in teleworking arrangements, especially where the home is also the workplace.”\(^{26}\)

Furthermore, for a majority of individuals who are working from home for the first time, getting the correct home office set-up presents a challenge. Sometimes, space within the home is limited and office space may double as a dining space, kitchen counter or general use area. Other times, a desk and chair may be present but without the adjustability needed to provide a suitable long-term work environment. Ergonomic risks can be exacerbated as workers may not have access to the same ergonomically-friendly equipment as inside the company’s premises. For both employers and workers,

\(^{24}\) ILO, *Ensuring decent working time for the future*, p. 743.

\(^{25}\) IBEC.

the use of proper ergonomics can be overlooked while implementing WFH arrangements during COVID-19, possibly increasing the risk of injury or health problems to workers. Employers should consider how they could mitigate the potential for injuries to address potential ergonomic concerns for workers.

Promote awareness and ensure compliance
Employers should do the following:

► provide information and training on health and safety issues particularly relevant for workers in WFH arrangements (e.g. ergonomics, working in isolation, general fire and electrical safety issues);
► ensure that workers are aware of or provided with relevant information about their general obligations with regards to safety and health including taking care of their own health and safety and the safety of others;
► ensure that workers are aware of and comply with the company’s safety and health policy, if any, including the procedures for reporting work-related accidents and ill health or any health and safety concern;
► review the company’s safety and health policy, if any, and ensure it has provisions covering the worker’s home when WFH arrangements are in place;
► ensure workers are aware of the company’s liability under the applicable national laws and regulations and their liability insurance for injuries that occur in the worker’s home during the WFH hours;
► provide on-going evaluation of offsite workers’ workstation and offer guidance and monitoring of ergonomic conditions (however, managers will need to respect workers’ home privacy);
► offer ergonomics and safety training or resources to change work habits and improve the physical home-based work environment.

(g) Health and mental well-being
During the COVID-19 pandemic, many workers may be experiencing full-time WFH for the first time, while they are also isolated from co-workers, friends and sometimes even from family. Their daily living routines have been disrupted, which may cause added stress, tension, and physical and mental strain.\textsuperscript{27} The impact of these stressors is even stronger in the current economic situation. When companies are adversely affected there can be increased redundancy, lay-offs and terminations, causing workers to feel further anxiety, uncertainty and insecurity, which may result in feelings of depression. The situation is aggravated during mandatory and prolonged WFH when lockdowns prevent people from going out and social life is limited. Studies have indicated that being unable to interact with friends and isolation from colleagues are key disadvantages in WFH.\textsuperscript{28} Company policies on WFH should incorporate measure that respond to those factors.

Promote health and well-being and be supportive and understanding
It is important to stress that physical distancing does not require social isolation. While it is important for workers to find new ways to work and interact, employers must recognize the impact of isolation

\textsuperscript{27} WFH may impact a worker’s mental health such as from changed family demands, relationship strain or family and domestic violence.
and loneliness, hence they must be supportive and empathetic, and keep workers informed, connected and mentally healthy. Employers may consider taking the following actions:29

- regularly contacting workers to make sure they feel supported and being available, accessible and willing to listen when workers need support;
- creating opportunities for team communications by using online tools or apps to establish team-wide chat groups, for example;
- providing workers with appropriate control and flexibility over how they do their work;
- offering information and practical tools to support positive mental health, including access to the employee assistance programme;
- appropriately responding to signs of workers' distress and providing workers with a point of contact to discuss their concerns;
- raising awareness of workers' responsibility to take care of their own physical and mental well-being during WFH, including encouraging workers to stay physically active, eat well and regularly go outside for fresh air.

Companies may consider issuing a policy guideline on WFH, addressing the physical and mental health and well-being of workers, or they may refer to available resources on health and well-being during WFH.30

(h) Work-life balance

WFH can help workers to achieve a better work-life balance as they avoid long and stressful commutes between home and the workplace, and they have more time for family. Other benefits of WFH include increased worker satisfaction, productivity and loyalty, and reduced staff turnover.31 While WFH arrangements have a great deal of potential, the reality is often more complicated, especially when WFH arrangements are implemented to contain a pandemic and not necessarily because the workers voluntarily chose it. Maintaining work-life balance may be a particular challenge for those with family care responsibilities due to closures of childcare facilities and schools, and in the absence of alternative care arrangements.

Often, WFH leads to a blurring of the boundaries between work and personal life, an increase in work hours and an intensification of work. Thus, WFH can interfere with private life and cause work-life conflicts that can be challenging for workers' well-being, and affect overall work performance. A survey of teleworkers in Japan shows that the issue of the ambiguity of working time and time off was the highest-ranked disadvantage of remote working.32

The worry and stress of “work without end” are being recognized and regulatory measures have been introduced in response to separate paid work and personal life.33 For example, France introduced the “right to be disconnected” in the 2017 revision of its Labour Code. It is therefore crucial that the employer has clear guidelines on working time arrangements that are in line with national legislation.

Promote work-life balance and be supportive

---

31 Eurofound and ILO.
32 Eurofound and ILO, p. 301.
33 ILO, Ensuring decent working time for the future, p. 747.
While there may be some measures taken at the national level addressing work-life balance, employers should do the following:

- set clear expectations of work hours and encourage and empower workers to set boundaries on his or her work schedule;
- promote a healthy lifestyle and work-life balance, including regular breaks and rest, exercise and fresh air;
- provide mental well-being support to workers who experience work-life conflict;
- for guidance, refer to the applicable laws and regulations or the relevant guidelines promoting healthy work-life balance, such as those issued by the occupational safety and health or mental health department.

(i) Performance and productivity

Benefits of WFH for workers typically include less time spent commuting, fewer interruptions, and greater flexibility. Thus, WFH could lead to better performance and increased productivity and engagement, which could improve workers' satisfaction and reduce turnover. However, WFH implemented in response to COVID-19 lockdown measures may be different in practice. Additional care responsibilities of working parents may dramatically increase due to school closures. Working parents may need to be involved in home-schooling, surveillance and care of children of school-age or there may be more than one family member sharing the same space for online schooling or teleworking. The worker's family responsibilities, having to share working spaces, or even strains in relationship or domestic violence may interfere with his or her job responsibilities, alter working schedules, and affect work performance and productivity.

Change productivity mindset and be flexible and reactive

Employers could consider providing expanded support to parents and caregivers at this time. Employers may be able to provide flexibility, including changing the measures on productivity by focusing on outcomes delivered rather than on working time. Employers may also use collaborative online tools, such as shared calendars and public status to facilitate teamwork and boost productivity.34 Workers must adapt to their new WFH arrangement and environment and ensure the essential job responsibilities are fulfilled. Any issue on performance should be openly discussed between managers and workers.

(j) Caring for children and dependents

Working parents may have competing responsibilities between WFH their employer and caring for children whose school or day care is closed. It is unlikely that workers would be able to adequately perform their jobs while simultaneously performing dependent care duties. Employers and workers should agree on arrangements that would enable the worker to effectively perform the required work meeting the employers’ expectations while still being able to undertake care activities at home. Employers should be sensitive to the worker's situation, especially when WFH is implemented on short notice and workers had little time to prepare or make the required child or dependent care arrangement.

Be responsible and adaptive

---

Workers must communicate with their supervisors about their situation and determine whether modifications to WFH arrangements are necessary to balance the responsibilities of work and family care.

It is important for employers and workers to address the situation and agree on a more flexible WFH arrangement. For example, work hours can be scheduled around the needs of the family, temporary changes can be made to the work terms for a reduced workday or work hours and reduced targets, or the employer can be flexible about deadlines where possible. Some governments are adopting legislation allowing workers to take special paid leave\textsuperscript{35} or unpaid leave without risking their jobs if they have to care for children or if they are unable to work due to COVID-19.

(k) **Skills, staff training and development**

Staff training and development play an important role to ensure workers are equipped with the required knowledge and skills to keep up with the latest information and technologies. Workers may need to develop technical skills to use communications tools for WFH when it is implemented in response to COVID-19.

**Promote a learning culture**

Depending on the specific sector and context, different ICT skills will be required during WFH. Online training, remote coaching, peer-to-peer learning and ongoing support for software and other tools\textsuperscript{36} may be required to ensure workers develop the necessary skills and abilities to perform effectively from home. Employers should make use of ICT and online training tools and apps for regular contact with workers, and provide necessary training, coaching, or mentoring and ensure workers are motivated, developed and recognized.

(I) **Keep up with the Government’s policy and directives**

The COVID-19 pandemic has significantly impacted the operation of companies. Many are struggling to sustain themselves, leading to temporary shutdowns or closures. Companies may have to implement WFH as a preventive measure or in response to the Government’s orders and directives. Governments should allow a certain degree of flexibility and provide an assistance scheme to facilitate the implementation of the WFH policy. For example, the government of Malta, provided financial support to employers to partially cover the costs of technology and teleworking solutions incurred to implement telework during COVID-19. Employers are granted up to € 500 per teleworking agreement and maximum € 4,000 per employer to cover 45 per cent of the eligible cost (e.g. purchasing and/or leasing of computer hardware, communication solutions such as VPN) incurred between 15 February and 8 May 2020\textsuperscript{37}.

**Engage in policy discussion**

Companies all over the world are at the front line of a new way of working. It is happening in real time and in a less than optimal fashion. Companies have little time to respond to an enforced and necessary situation. Overall, the usual ways that workers and management would agree on WFH arrangements have been discarded.

\textsuperscript{35} Seychelles passed the Employment (Coronavirus special leave temporary measure) regulations 2020, introducing special leave for workers to care for the school-age children during the COVID-19 pandemic.

\textsuperscript{36} IOE.

For some companies, WFH can be a benefit for their bottom line. A company that can run its entire operation staffed by workers who (mostly) work from home will no longer need to lease large office spaces and long commutes will also be gone. Some companies will be able to hire a geographically diverse workforce without providing additional office space and without incurring any expense to relocate them.

During this challenging time, it is crucial that companies play an active role in providing constructive inputs in policy recommendations. It is critical that company experiences with WFH are shared with national employers and business membership organizations.

**EBMO to insert quote from EBMO President/CEO**

Example: “Companies across the country are adapting to the use of WFH arrangements, in some sectors of the economy this has undoubtedly been easier than others. But we are in a high-speed learning environment and [NAME OF EBMO] will consistently collect the experiences from members and relay to policymakers the concerns and needs of the business community”.

10. Should working from home continue after COVID-19?

The response to the COVID-19 pandemic is, among other things, a massive experiment in WFH arrangements. While some jobs cannot be done at home, the outbreak is accelerating the trend toward teleworking, possibly for the long term. Employers and workers are likely to adapt to and become more comfortable with WFH, learn to use ICT for WFH, and understand the benefits of WFH. Workers may even be able to maintain the same or higher levels of productivity during WFH. In mid-April, a survey was conducted in the United States of more than 1,200 full-time employees experiencing WFH during the pandemic. It found that nearly half of the respondents wanted to keep working remotely. More than 45 per cent said their employers are actively considering or are open to this strategy. Among respondents, 40 per cent had been teleworking regularly at least one day per week before the COVID-19 pandemic.

The WFH arrangements implemented by employers due to the COVID-19 response is temporary. Workers will normally be obliged to resume normal working arrangements when the situation permits and as directed by employers. Employers however may want to assess the benefits and challenges of WFH during this pandemic and decide on a case-by-case basis and in consultation with workers or unions, if any, on the feasibility of implementing regular WFH arrangement, if workers request it.

---

Annex: Working from home policy template

A working from home (WFH) policy is a key element for an effective contingency plan to ensure business continuity, productivity, and job preservation. It is drafted based on applicable national laws and regulations, collective agreement and company’s policy or terms and conditions of employment, and subject to change in response to the changing directive and needs of the company.

The following template aims to provide a practical guide to companies that intend to develop a company’s policy on WFH. While there is no one-size-fits-all solution to respond to ongoing changes, the template lists out the main components to be included in the policy and other elements for consideration to suit the different situations and needs of the company.

(a) Purpose

Describe one or two sentences that explain why the company is implementing WFH. It is important to note that WFH is not a formal or universal workers’ entitlement but an alternative temporary arrangement for business continuity in response to an emergency, such as the current COVID-19 pandemic and forced shut down, and is subject to change as the situation develops.

For example:

- This WFH policy is in effect due to the COVID-19 pandemic and Government’s directive recommending work from home when feasible. This policy will be reviewed when the directive or business needs change.
- WFH is not a universal workers’ entitlement but an alternative temporary arrangement in response to the COVID-19 pandemic.

(b) Definition

Provide a definition of WFH in the current context of COVID-19. Refer to the definition in the relevant laws and regulations, if any.

In short, WFH is a working arrangement that workers working from their home, using ICT and still fulfil the essential responsibilities.

For example:

- WFH is a working arrangement in which a worker works from home, using ICT, and still fulfils essential work responsibilities.

(c) Scope and application

Provide statements on when and to whom the WFH policy is applicable, limitations and conditions, including other applicable and existing policies. It is important to note that it is at the discretion of the company to implement the WFH arrangement.

Adapted from Telework Toolkit, Guide to Writing a Telework Policy.
An employers’ guide on working from home in response to the outbreak of COVID-19

For example:

- WFH does not change or replace the terms and conditions of your employment or the required compliance with the existing company policies, rules, and practices.
- This policy applies to all workers undertaking remote work from home. All workers should be familiar with the contents of this policy.
- The implementation of the WFH arrangement is at the sole discretion of the company.
- The company reserves the right to change, modify, or discontinue the arrangement for any worker at any time as it deems fit, upon which the worker shall resume the normal working arrangement.

(d) Eligibility

Include a statement on the eligibility of workers to perform work remotely from home. It is important to state that the WFH arrangement is implemented as a response to COVID-19 to contain the spread of the virus, ensure continuity of service and productivity, minimise adverse impact to work quality, production, or service quality. Based on the suitability of the jobs, the home environment, and the manager’s ability to manage remote workers, there may be workers who are not eligible for WFH.

For example:

- WFH is implemented in response to COVID-19 as a preventive measure to contain the spread of the virus and to ensure the continuity of business and productivity of our workforce.
- While efforts are being made to accommodate all workers into WFH, there will be some workers who may not be eligible for WFH due to the specific roles or the job function or situation surrounding the home environment that made it not practicable to perform work from home. The departmental manager will be in direct contact with the workers regarding eligibility for WFH.

(e) Main elements for consideration

1. Compliance to company policies

Most companies have existing policies on a range of workplace obligations. It is important to note that all workers on WFH must comply with existing company policies as applicable.

For example:

All workers on WFH must abide by existing company policies, which include:

- Occupational safety and health
- The use of ICT, data protection and confidentiality
- Intellectual property
- Company’s Code of Conduct
- Use of company’s tools and equipment, such as laptop, software, and so on
- Social media
- Anti-discrimination/anti-harassment/equal opportunity

2. Compensation and work hours

WFH should not change the normal work hours, compensation, benefits or work responsibilities. However, it should be noted that due to the current circumstances, some flexibility may be required with the agreement between the manager and worker concerned and in compliance with applicable laws, regulations and company policy.
For example:

- The working hours, compensation, benefits, and work status and responsibilities of workers shall remain unchanged.
- Due to the current situation, some flexibility in working hours may be permitted with the approval of the company.
- Upon application by workers and if feasible, the manager may agree on specific work hours, provided the total weekly work hours remain unchanged, and in compliance with the company’s existing policies.
- Any changes to the total weekly work hours shall be approved by the human resources department.

3. Safety and health

Employers have the duty to provide a safe and healthy working environment, thus should ensure the home workplace is safe. Employers should look after the health of their workers, including mental health. It is also important to note the duty of workers to protect themselves and others and to take care of their own safety, health and mental well-being.

For example:

- All workers must abide by the company’s safety and health policy (if any) during WFH arrangements.
- All workers have the responsibility to take care of their own physical and mental well-being during WFH and ensure they are physically active, eat and sleep well, and exercise regularly.
- It is important for all workers to maintain work-life balance, stick to the agreed work schedule, and take a necessary break and rest to stay active and healthy.

4. Equipment, tools and supplies

The company’s position with regards to equipment, including hardware, supplies, or furniture should be outlined. It should address if, and under what conditions, the company will provide the equipment for the workers to perform their duties from home. This may include computer hardware, computer software, phone lines, access to the Internet, access to host applications, and other applicable equipment and supplies as deemed necessary. It should also highlight the duty of workers to care for the equipment and to use the equipment as authorized.

For example:

- The company will provide the required tools and equipment for the workers to carry out the job function from home. This includes computer hardware, software, access to the Internet, access to host application, and so on.
- The use of equipment, software, data supplies, and furniture, when provided by the company are for use by the authorized persons and for purposes relating to company business only.
- Workers have the duty to take good care of such tools and equipment and shall contact the company (technology dept or manager) if there is any issue with regards to the equipment, software, or connectivity.
5. Technology, data protection and security
The use of technology for WFH can present higher risks of cyberattacks and confidentiality breaches as well as increased risk of cyberbullying. Most companies have data protection, confidentiality, security, and an anti-harassment policy for this purpose.

For example:
- It is important that all workers on WFH read, understand, and abide by the company ICT policy to safeguard data protection, confidentiality and security.
- All workers on WFH must take up the ICT online training, which is accessible for all workers.
- All managers and workers on WFH must do no harm when using work-related communication, including those enabled by ICT.

6. Workstation at home
Company’s guidelines and requirements concerning home-office setup, equipment installation, safety, cost, and so on should be taken in to consideration when designing a WFH policy.

For example:
- The worker shall designate a workspace at his/her home for placement and installation of equipment to be used in a safe condition. This designated area of the home is deemed to be the workplace (all other areas of the worker’s home is not classified as the workplace).
- The worker is responsible for following the instructions given by the company on establishing and maintaining a designated workplace in a safe, healthy, professional and secure manner.
- For reimbursement of expenses incurred, such as remodelling, electrical modifications, or other improvements to the home office workspace must obtain prior approval of the company.

7. Communication
Communication is critical to remote working. Managers and workers on WFH should agree on how they would be in contact. It is important to note that the workers must be accessible to their managers and co-workers during the agreed core work hours.

For example:
- Workers on WFH must be available and accessible to their manager and co-workers during the agreed work hours.
- The manager and the worker shall agree on the communication channel and how they would keep in touch with each other, utilising the ICT available.
- The workers remain obligated to comply with all company rules, practices and instructions.

8. Performance standards
Employers should reinforce the standards of performance are expected to be maintained during WFH. However, the company should recognise as the WFH is implemented in such an urgency situation; there could be obstacles at the workers’ home that need to be managed. Certain degrees of flexibility should be considered while upholding the standard expected.

For example:
- Workers must maintain the same level of productivity and work quality during WFH.
Professionalism, in terms of job responsibilities, work output, and customer service, will continue to meet the company’s high standards.

Employers recognise there could be obstacles at workers’ homes that might impact the work performance; workers who experience difficulties should contact their manager to assess the feasibility of WFH and flexibility required.

Any adjustment to outputs and performance is at the sole discretion of the manager, taking into consideration the specific circumstances of the workers and the job requirements.

9. Dependent care and other family responsibilities

The issue of child care and other personal obligations that may impact WFH should be addressed between the concerned manager and worker. It is, however, important to stress that while the company may be able to extend a certain degree of flexibility, workers must make arrangements for dependent care and family responsibilities to enable WFH. Workers need to manage and adapt to the situation and ensure the essential responsibilities of the job are fulfilled.

For example:

Workers with dependent care and other family responsibilities at home must address the situation with the respective managers and agree on a more flexible homeworking arrangement, such as different work hours, reduced workday or work hours with reduced work targets or flexible deadlines where possible.

While the company may permit a certain degree of flexibility, WFH may be incompatible with dependent care and family responsibilities. The worker must make arrangements for family care and ensure the essential duties of the job function are fulfilled.

10. Worker’s compensation and liability

Employers generally are responsible for the safety and health of workers at the workplace and during work hours. They could be liable for job-related accidents that occur in the worker’s home workspace during work hours. Employers should check applicable national laws and regulations, such as the Occupational Safety and Health Act, the Employment Act and the Workers Compensation Act. Work-related injuries that occur during work hours, and while performing work functions in the designated work area of the home are usually covered by worker’s compensation. Employers may consider developing or extending the existing safety and health policy to cover worker’s homes during WFH. They should ensure workers are aware of the policy, including the procedures for reporting work-related accidents and ill health or any health and safety concern.

For example:

If the worker is injured while performing work duties during the agreed work hours at the designated work area, the worker is covered under the Workers Compensation Act. The worker must notify the supervisor immediately and complete the required form.

The company assumes no liability for injuries occurring in the worker’s home workspace outside of work hours, or for any non-work-related injury that might occur in the home, even if it occurs during the worker’s agreed work hours.

11. Emergency and illness

The policy may include a clause providing guidance to workers on what action they should take in the event of an emergency, such as illness and injury, power failure, or loss of Internet connectivity.
Employers may also consider including lockdown or company shut down as an emergency to activate the WFH arrangement.

For example:

- The worker on WFH must notify his or her immediate supervisor in the event of any emergency, including illness, injury, power failure, or loss of Internet connectivity.
- If an office closure or emergency prevents workers from commuting to the office or working in the office, upon consultation with their respective manager or supervisor, workers should commence work remotely from home or at any other suitable location, as approved by the company.

12. Expenses

The WFH arrangement is deployed to ensure business continuity and job preservation and, therefore, it should be implemented with the shared responsibility and commitment of both employers and workers. The employer should make it clear if will bear the expenses of a WFH arrangement, as it may create additional costs for the workers in terms of workstation setup, access to the Internet, electricity, insurance. As reimbursement is at the sole discretion of the employer, the worker must seek approval before any expenses are incurred for WFH.

For example:

- The worker must seek approval from the company before any expenses are incurred for and during WFH.
