### Promoting social dialogue in the electronics industry in Indonesia

The ILO Governing Body decided to follow up the 2007 tripartite meeting in the electronics industry with country-level activities in the biennium 2010-11. Country reports were prepared in Indonesia and Vietnam and a tripartite workshop was held in Bogor, Indonesia in June 2011. The workshop had over 40 participants, employers and workers, from some of the major companies operating in the electronics industry in Indonesia and from the government. The participants concluded that a sectoral social dialogue should be launched and that best practices of industrial relations should be exchanged and disseminated.
