## Optimising Performance through Resource Efficiency and Circularity

SCORE4Climate is a training module from the **ILO Sustaining Competitive and Responsible Enterprises (SCORE) programme** that improves productivity and working conditions in small and medium enterprises (SMEs) through practical classroom training and in-factory consulting.

The module supports SMEs in starting their path toward a circular economy. It presents key concepts, good practices and practical tools to help SMEs identify opportunities and generate innovative solutions to **improve resource efficiency, clean production and circularity.**

### How does the SCORE4Climate module support SMEs to move towards a circular economy?

# Benefits of SCORE Training SCORE4Climate module

How can **SMEs** benefit from improving resource efficiency and circularity?

- ▶ **Boost productivity and save costs** by improving resource efficiency
- ▶ **Increase competitiveness** by accessing new markets
- ▶ **Enhance product quality** through product diversification and innovation
- ▶ **Improve working conditions** by reducing workers' exposure to accidents and risks
- ▶ **Build resilience** against natural disasters, price volatility and resource scarcity

What can **lead buyers** gain from investing in SCORE Training SCORE4Climate module?

- ▶ **Meet growing consumer demands** for sustainable products and services
- ▶ **Improve credibility and reputation** through decarbonising supply chains
- ▶ **Comply with environmental standards and regulations** set by governments and international entities

Why should **SCORE Implementing Partners** promote SCORE Training SCORE4Climate module?

- ▶ **Demonstrate commitment** to global action against climate change
- ▶ **Promote job creation** in the emerging green economy and renewable sectors
- ▶ **Strengthen resilience of national economy** by reducing dependence on natural resources
- ▶ **Prevent economic losses** due to natural disasters

# Success stories from SCORE Training

How have SMEs around the world benefited from improved resource efficiency & cleaner production?

## India

- ✓ 78 % to 95 %  
Increased yield
- ✓ 22 % to 0 %  
Reduced rubber waste

### Increased yield, reduced waste and improved OSH

- ▶ Procured machines to improve effectiveness
- ▶ Sold waste to rubber manufacturers
- ▶ Introduced dust collectors to reduce emissions

▶ Since SCORE Training we have been able to achieve our targets because time and waste is reduced in the packing process. We even often exceed our targets which is a plus to us!

*Ebenezer Owusu, Operations Manager*

## Ghana

### Improved efficiency and waste management

- ▶ Introduced quicker & safer bagging process that reduce spillages
- ▶ Designated place to discard and treat waste lime,
- ▶ Turned waste lime into paint sold to local communities

## China

### Improved productivity and OSH

- ▶ Purchased advanced chemical-free cleaning equipment
- ▶ Improved water efficiency and workers' safety

- ✓ 75%  
Reduced water consumption
- ✓ Doubled  
Clients served
