

International Labour Conference

111th Session, Geneva, 5–16 June 2023

Date: 29 May 2023

General discussion on a just transition

► Points for discussion

1. How can a just transition be advanced across ILO Member States through:
 - (a) scaling up the development and implementation of integrated policies and measures across policy areas, including industrial policies and technology;
 - (b) the financing of such policies and measures;
 - (c) social dialogue and tripartism;
 - (d) institutional coordination and policy coherence at all levels; and
 - (e) the application of international labour standards?
2. What should be the roles of governments and employers' and workers' organizations in the transition, including with communities and people affected?
3. What should be the priorities and strategy of the ILO to assist its constituents? How can the ILO play a central role in the multilateral coordination for a just transition, including through partnerships?
