- ▶ Invest on what, to ensure resilient OSH Systems?

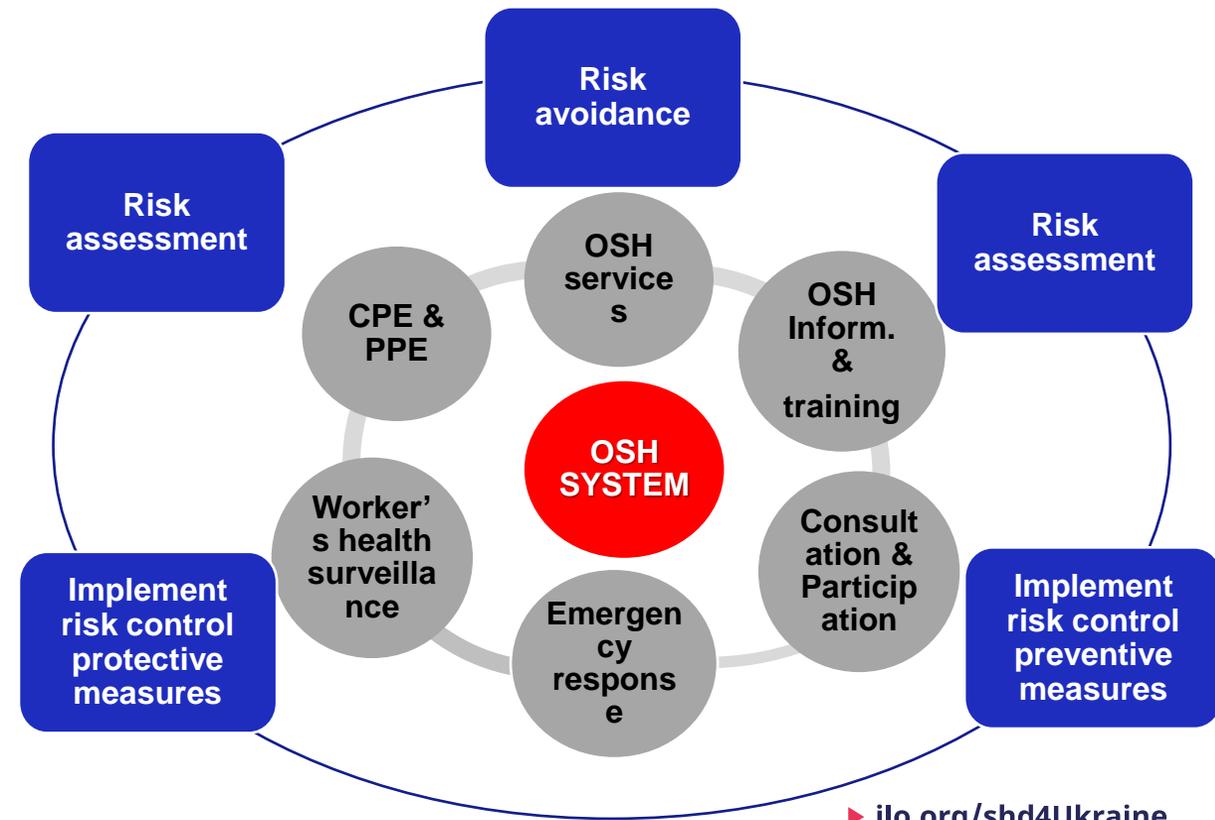

What is an OSH System?

National Level

- Laws, regulations, collective agreements, guidelines
- National authority(ies) responsible for OSH
- Mechanisms to ensure compliance (including LI)
- Arrangements for workers-employers cooperation at workplaces
- National tripartite advisory body on OSH;
- Training, information and advisory services on OSH
- Occupational health services
- Research on OSH;
- Mechanism for collection/analysis of data on occupational injuries and diseases
- Collaboration with insurance/SS schemes covering occupational injuries and diseases; and
- Support to SMEs/Informal Economy to improve OSH

Undertaking Level

► What is a resilient OSH System?

- Based on the International Labour Standards
- Reflect the continuous social dialogue (at national, sectoral and undertaking levels);
- Is framed by an adequate OSH policy and ensures the articulation and coordination of all OSH System actors (at all levels):
 - workers, employers and their representatives;
 - public or private entities responsible for: regulation, licensing, certification, standardization, research, training, information, consultation and participation, technical services of prevention and health surveillance, and inspection;
- Prevents, mitigates and ensures preparedness for crises and their adverse effects;
- Is based on the identification, assessment and control (management) of occupational risks;
- Integrates emergency response preparedness;
- Ensures business contingency and continuity management.

► Invest on what, to ensure resilient OSH Systems?

At national level, in:

- Align national legal framework on OSH with ILS and EU Acquis, starting on Dir 89/391/EEC
- Ensure and effective system of LI (aligned with ILO C81 and C129)
- Revitalize the National Tripartite Social Economic Council, in particular on OSH issues
- Organization of the training system on OSH
- Organization of the system of health systems
- Stimulate the research on OSH
- Improve the system of notifying/collecting/recording and analyzing data on Occ. Acc. & Diseases
- Reinforce collaboration between labour administration, social security and insurance system

At undertaking level:

- Formulate and implement an OSH preventive plan
- Put into practice a system for occupational risk management (risk avoidance, assessment and control)
- Ensure the organization and functioning of OSH services at workplaces
- Provision of training and information on OSH
- Ensure the consultation and participation of workers on OHS decisions (e.g., through workers' representatives, OSH committees)
- Ensure workers' health surveillance
- Implement the adequate preventive and protective measures and provide the necessary CPE and PPE
