# ► ILO Voluntary Contributions for Development Cooperation

Annual Report 2019

## Trends in ILO approvals in 2019

The ILO registered a record-setting US\$ 459.0 million in total approvals in 2019, marking a 46 per cent increase over 2018 and coming in at 24 per cent more than in 2017, which was previously the ILO's highest approval year on record. In addition, the ILO received US\$ 27.3 million in Regular Budget Supplementary Account (RBSA) funds, or voluntary core funding, for the biennium 2018-9.

### Voluntary funding highlights in 2019

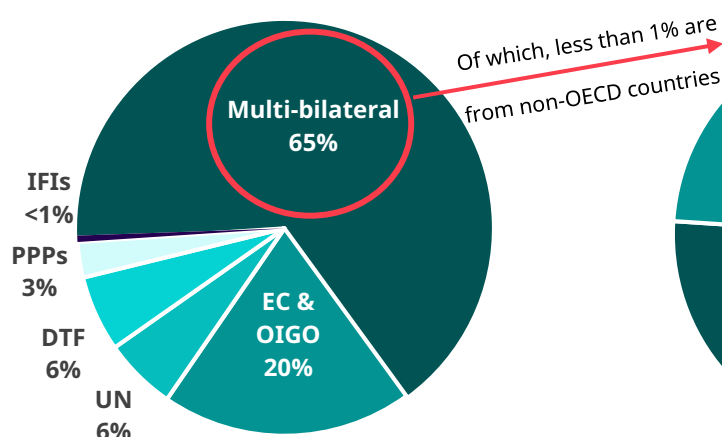

- Approvals have steadily increased since 2010. Total approvals for the period 2010-2013, on average, totalled US\$238.0 million per year. For the period 2016-19, average annual approvals reached US\$ 345.9 million thanks to record-setting years in 2017 and 2019.
- The Netherlands became the biggest contributor to ILO's voluntary funding in 2019, almost doubling its contributions compared to 2018 and marking a significant increase compared with other years. Its support is focused primarily on meeting the decent work needs of forcibly displaced people and their host communities in eight countries: Egypt, Iraq, Jordan, Lebanon, Ethiopia, Kenya, Uganda, and Sudan through the PROSPECTS programme.
- For multi-bilateral approvals in 2019: 32% were contributed by the Netherlands, 15% by Germany, 13% by the United Kingdom, 11% by the United States and 5% by Switzerland. The largest part of multi-bilateral funding is invested in employment promotion, especially employment-intensive investment, and improving labour standards in global supply chains as well as meeting the specific needs of refugees and host communities. While an important potential funding source for resource diversification, non-OECD-DAC countries constituted only one percent of all multi-bilateral approvals.

### The Top 10 voluntary funding sources\* in 2019

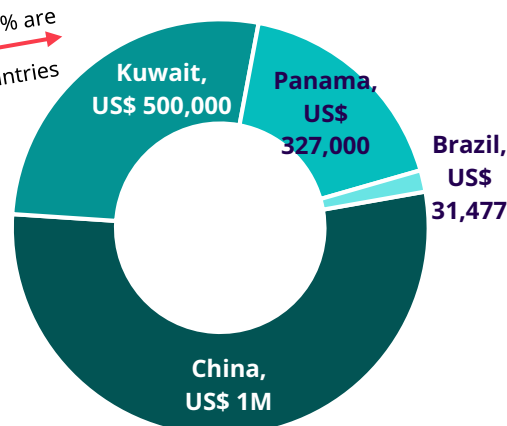

Development Partner	Budget Approved (US\$)
1. the Netherlands	\$95.7 million
2. European Commission (EC)	\$89.8 million
3. Germany	\$45.5 million
4. United Kingdom	\$38.8 million
5. United States	\$33.0 million
6. Domestic Trust Funds	\$27.1 million
7. United Nations	\$26.0 million
8. Switzerland	\$15.0 million
9. Norway	\$13.2 million
10. Sweden	\$13.0 million

\*Ranking does not include RBSA contributions.

### Voluntary funding contributions by funding source, 2019

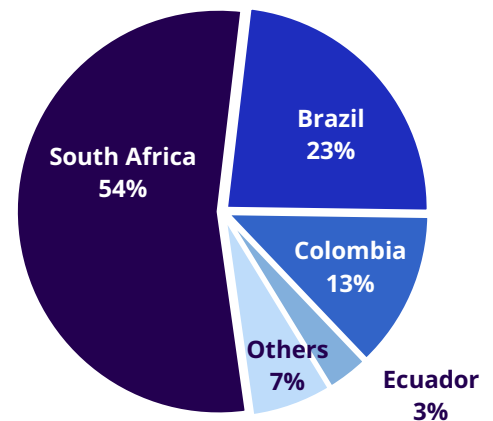

### Voluntary Contributions from non OECD DAC countries, 2019

- Accounting for 66 per cent of total approvals in 2019, multi-bilateral development partners remained the largest source of voluntary funding, buoyed by the large contributions for the PROSPECTS project, followed by the European Commission (20%), which showed a marked increase compared with 2018 in alignment with its two-year funding cycle. Domestic Development Funding (6%), the United Nations (6%) and PPPs (3%) round out the top five sources of voluntary funding for 2019.

**Domestic development funding contributors, 2019**

- Domestic Development Funding continues to play an important role in ILO's voluntary funding portfolio. More than doubling in 2019 compared with 2018, thanks largely to contributions from South Africa, Brazil and Colombia, such funding focused on employment intensive investment and technical capacity building in fields ranging from social protection to improving the application of labour standards.
- PPP approvals totalled US\$12.7 million in 2019, which marked a decline from 2018 but also an increase in private sector support for key value chains such as the garment sector as well as skills development and the promotion of social dialogue.
- UN approvals have more than doubled in the last biennium - from US\$ 13.6 million in 2016 to US\$ 26.0 million in 2019. While this marks a slight decline from 2018, the overall trend remains a larger UN portfolio with an increasing number of Joint Programmes/Multi Partner Trust Funds (MPTFs), which represent 33% of total UN funding to the ILO in 2019. While the ILO partners with a diverse group of UN partners, . The main areas of focus are Workquality and Employment in the Africa and Asia regions as well as several global programmes – in the thematic areas of employment-intensive investment (29% of UN funding), gender, equality and diversity (23%), and social protection (16%).
- In 2019, Employment-related activities continued to attract the largest proportion of extra budgetary funding (40%), followed by DDG/P (20%) – which is an integrated field that covers multiple policy areas thanks to the PROSPECTS project – and then by Governance (16%), Workquality (10%), Social Protection (7%), and Enterprises (4%).
- In 2019, 22% of total approvals were for Africa and 22% for Asia, followed by Europe (8%), the Arab States (5%) and the Americas (5%). Reflecting an increase in larger, multi-regional programmes, a significant percentage of resources were also allocated to interregional or global projects (40%) – a 16 percentage point increase over 2018. While figures for the Americas aligned with the same trends observed in 2018, Approvals in Asia increased by 76%, 68% in Europe and 32% in Africa. In contrast, approvals for the Arab States, where record approvals were recorded in 2017 and 2018 to support response efforts for the Syrian refugee crisis, declined by approximately 64% but remained above the average the contributions historically received in the region.

- Of the total of extra-budgetary funds approved in 2018, 44% were financially managed by headquarters; and 56% by the field. This distribution represents a significant change compared to 2017, where 25% of approvals were managed by headquarters and 75% by the field. This can be explained in part by the large increase in global projects with activities in multiple regions, particularly the PROSPECTS project and skills development projects supported by the United Kingdom. Such projects are often coordinated at headquarters, with funds to be disbursed to regional and national offices through sub-projects.
  - ▶ In the Africa region, activities are mainly focused on employment promotion and governance issues, particularly ending child labour and forced labour.
  - ▶ In the Americas region, projects focus on promoting decent work for Venezuelan refugees and their host communities as well as supporting enhanced social protection and ending child labour and forced labour.
  - ▶ In Europe and Central Asia, there was a strong focus on projects related to the Syria refugee crisis as well as promoting employment and work quality issues.
  - ▶ In Asia and the Pacific, the ILO's Regional Office in Bangkok received close to four times more in contributions than in 2018 – due largely to a regional project on skills development supported by the United Kingdom. The portfolio of the Country Office in Suva increased 18-fold in 2019 thanks largely to the ILO's participation in a UN joint programme supported by the European Commission on employment-intensive investment in Papua New Guinea.
  - ▶ In the Arab States region, projects focused on responding to the Syria refugee crisis and promoting employment-intensive investment. Funding declined from 2018 but remained above the historical average for the region as 2017 and 2018 were both record years for contributions to the Arab States region.

The following tables provide more detailed information about total voluntary non-core funding approvals in 2019, with some tables providing a comparative overview of approval data for the period 2016-2019. Information is presented by source of funds, partner category, technical field, geographical distribution, administrative responsibility, and a combination of all of the above. For information about voluntary core funding contributions, please refer to the information available at [this link](#).
