

Complementary health insurance

14:00-16:30 (EAT)
December 16-18

Online (via Zoom)

Deadline to register
December 11
Registration fee
100 USD

Join us for this online training to learn all about:

- The **key elements** of health insurance
- Designing **health insurance products for low-income households that complement government schemes**
- The **benefits of health microinsurance (HMI)** from the perspective of clients
- The **challenges** for HMI schemes and **approaches to overcome them**
- The challenges and opportunities for **HMI programmes and initiatives in your organization**

Agenda

Below is an overview of the different sessions of this three-day workshop. Each day consists of 2.5 hours of online lectures and interactions.

Day 1

- Core understanding of health insurance
- Health microinsurance and key stakeholders
- Health insurance product development and servicing

Day 2

- Promoting client value and business viability in HMI
- Applying the “3Ps”: A case for HMI

Day 3

- Applying the “3Ps”: A case for HMI (continued)
- Building upon lessons learned

Trainer

Lisa Morgan is a UK qualified health actuary and supports the Facility by providing technical expertise on health insurance in the public and private sectors, offering insights into m-Health, actuarial analysis and strategy development. She has two decades of insurance experience, mostly in actuarial consultancy in Europe, Africa and Asia. Her experience includes pricing, reserving, benchmarking and budgeting for private and national health insurance schemes as well as advising on microinsurance. She is a Fellow of the Institute and Faculty of Actuaries in the UK.
